

A DEVELOPMENT
PLAN FOR THE PARISH
OF SAFFRON WALDEN

SAFFRON WALDEN
TOWN COUNCIL

SAFFRON WALDEN NEIGHBOURHOOD PLAN

2020-3035

Page intentionally blank

Our proposed pre-submission version of the Saffron Walden Neighbourhood Plan is being published in accordance with Regulation 14 of The Neighbourhood Planning (General) Regulations 2012.¹

The start date of the Consultation period is Wednesday 8th January and the closing date is Tuesday 18th February. The Consultation runs for 6 weeks.

The Proposed Saffron Walden Neighbourhood Plan can be viewed and representations made via the interactive website www.waldenplan.org. Paper copies of the plan are available to view at the Town Council offices at Emson Close, the Tourist Information Office on the Market Square, the Library on the Market Square and at reception at Lord Butler Leisure Centre (during the normal opening hours of each establishment).

Comments can be made via the website, via email to answers@waldenplan.org or by post to Saffron Walden NP, 11 Emson Close, Saffron Walden, CB10 1HL.

Please note that we will not be able to accept anonymous comments. Comments will be made public as part of our consultation statement, but not your name or any other personal details. Any personal information you provide to us through this website will be dealt with in accordance with the Saffron Walden Town Council Data Protection and Data Retention Policy. These details will only be used as part of the neighbourhood plan preparation process and will only be shared with Uttlesford District Council to enable them to carry out their statutory responsibilities relating to this neighbourhood plan.

1. WHAT IS A NEIGHBOURHOOD PLAN?

1.1 A Neighbourhood Plan is a document which is drawn up at a community level, and which gives the community the direct power to develop a vision for its neighbourhood and shape the development and growth of the local area. For this Neighbourhood Plan the whole parish of Saffron Walden has been designated as the 'neighbourhood area'. This includes both the town of Saffron Walden and the hamlet of Little Walden. Unless otherwise specified, references to "Saffron Walden" encompass the whole parish.

OS PSMA LICENSE NUMBER: 0100057521

1.2 A Neighbourhood Plan has legal status within its Local Planning Authority Area (Uttlesford).

1.3 Once a Plan is “made” (has been voted for by the community), all new development and growth should meet the requirements of the Neighbourhood Plan. The Neighbourhood Plan lasts for 15 years, after which time it should be reviewed. It can be reviewed at any point before the 15 years is up, if appropriate to do so.

1.4 Government guidance on Neighbourhood Plans states that *“A neighbourhood plan attains the same legal status as the Local Plan once it has been approved at a referendum. At this point it comes into force as part of the statutory development plan. Applications for planning permission must be determined in accordance with the development plan, unless material considerations indicate otherwise (see section 38(6) of the Planning and Compulsory Purchase Act 2004).”*

WHAT IS THE DIFFERENCE BETWEEN A NEIGHBOURHOOD PLAN AND A LOCAL PLAN?

1.5 There is a hierarchy of development plans.

1.6 At the top is the National Planning Policy Framework (NPPF). It was first published in 2012 and was last updated in February 2019. Written by the Ministry of Housing Communities and Local Government, it sets out the Government’s planning policies for England, and how these should be applied. From time to time the planning policies are adjusted and it can be considered that planning regulations are immediately updated as these adjustments are made.

1.7 In the middle is the Local Plan (LP). This is written by the District Council (Uttlesford in the case of Saffron Walden). It takes into account the general policies of the NPPF and sets out the District Council’s planning policies for Uttlesford, and how they should be applied. The SWNP refers in places to the emerging Local Plan (eLP) and to the current 2005 Local Plan.

1.8 At grassroots level, a Neighbourhood Plan sits beneath these two. A Neighbourhood Plan cannot contradict either the National Planning Policy Framework or the Strategic (key) Policies in the Local Plan.

WHAT CAN A NEIGHBOURHOOD PLAN ACHIEVE?

1.9 The core purpose of a Neighbourhood Plan is to plan for future residential and commercial building development. This includes the locations that will be acceptable, the types of buildings that can be constructed, and stipulations on build standards and aesthetics.

1.10 It sets out focused, specific and appropriate planning policies for the Neighbourhood, with a level of local detail that would not be possible at national or district level.

1.11 A successful Neighbourhood Plan makes it very clear what sort of development the community wants, and therefore adds greater clarity and definition to local needs, providing evidence-based policies for planning committees and other decision-making bodies. It also provides early guidelines on what the community expects from developers.

WHAT IS THE FORMAL NEIGHBOURHOOD PLAN PROCESS?

1.12 *“Provided a neighbourhood development plan or order is in line with national planning policy, with the strategic vision for the wider area set by the local authority, and with other legal requirements, local people will be able to vote on it in a referendum. If the plan is approved by a majority of those who vote, then the local authority will bring it into force.”* – A Plain English Guide to the Localism Act - Communities and Local Government Publication.

1.13 Saffron Walden Town Council is the designated authority able to prepare a neighbourhood plan in Saffron Walden.

1.14 The Saffron Walden Neighbourhood Plan Steering Group was established in 2016 and individuals and groups either volunteered or were invited to be part of the NP process. The NP team includes Town Councillors, Town Council officers and a number of local volunteers, each with specialist knowledge including local heritage, architecture, infrastructure, commerce and the arts. The wide range of skills, experiences and interests of the team helps to ensure that there is a fair and diverse representation of views and opinions helping to form the NP.

1.15 In accordance with the Neighbourhood Plan Regulations 2012 (as amended), this Plan must satisfy “basic conditions” before it can come into force. It must:

- Have appropriate regard to national policies and advice contained in guidance issued by the Secretary of State;
- Contribute to the achievement of sustainable development;
- Be in general conformity with the strategic policies contained in the development plan for the area of the authority (or any part of that area);

- Not breach, and be otherwise compatible with, EU regulations; and
- Not breach the requirements of Chapter 8 of Part 6 of the Conservation of Habitats and Species Regulations 2017.

1.16 In addition, this Plan must meet the prescribed legal requirements. This statement confirms that the Saffron Walden Neighbourhood Plan 2019-2034 (referenced throughout this document as “SWNP”), which will be submitted by Saffron Walden Town Council, meets all the necessary requirements.

HOW WAS THE SAFFRON WALDEN NEIGHBOURHOOD PLAN RESEARCHED?

1.17 The SWNP Steering Group carried out quantitative and qualitative research into the core local issues to be addressed by the Neighbourhood Plan. This included:

- Public consultation events which Saffron Walden residents were invited to attend and give opinions and suggestions;
- Information stands at community events at which Saffron Walden residents were invited to give opinions and suggestions;
- Feedback and comments from WaldenPlan.org, the Saffron Walden Neighbourhood Plan website;
- Information and updates in the local press and magazines;
- Focus Groups, at which local experts were invited to submit concerns and suggestions regarding their professional fields;
- Regular ongoing meetings with representatives of local organisations;
- A report on the Heritage and Character Assessment of Saffron Walden written by AECOM;
- Consultation with the Local Authority (Uttlesford District Council);
- Review of Evidence and Background Studies which inform the preparation of the Uttlesford Local Plan;
- The existing Uttlesford District Local Plan 2005;
- The Uttlesford District eLP; and
- Surveys sent to a long list of potential stakeholders in the following fields / areas of interest (listed here in alphabetical order) : Access/Disabled; Community groups; Developers; Education providers; Economic planners; Emergency services; Environmental organisations; Faith organisations; Government bodies; Healthcare providers; Housing Associations; Local Government (elected members and officers); Sports providers; Transport organisations and Utility companies.

1.18 The Saffron Walden Neighbourhood Plan Consultation Statement details the input provided by stakeholders and research conducted by the Steering Group.

2. SAFFRON WALDEN TODAY

HISTORY AND CHARACTER OF SAFFRON WALDEN

2.1 The Heritage and Character Assessment, carried out by AECOM, broke the parish into four distinct character areas.

THE TOWN CENTRE

2.2 Saffron Walden is the largest town in the District of Uttlesford and is the administrative and commercial centre. This very attractive town is one of the finest preserved examples of a medieval market town, with a wealth of listed buildings in the town centre and Conservation Areas which cover much of the town.

2.3 The town centre has a market square surrounded by medieval streets. It has a diversity of architectural styles and a street layout which together document the historic development of the town. It includes the Common, which is officially registered as a village green and has a turf-cut maze which is listed as a scheduled monument. Walden Castle and the Repell Ditches are also listed as scheduled monuments. Amongst many fine buildings, the town centre hosts the Town Hall, St Mary's Church, Bridge End Garden and Jubilee Gardens, and the old Corn Exchange which is now the library. A great number of buildings in the town centre are listed.

RESIDENTIAL NEIGHBOURHOODS

2.4 The residential neighbourhoods are characterised by predominantly inter-war through to current day residential housing estates with mostly semi-detached and terraced houses. The main roads cut through the neighbourhoods and lead directly to the town centre. Away from the main roads, streets are mainly quiet cul-de-sacs. Schools, an industrial area and supermarkets are located within the residential neighbourhoods.

RURAL LANDSCAPE

2.5 The rural landscape is characterised by rolling open arable land which is accessible to the public to enjoy via a network of public rights of way, which includes the HarCamLow Way. In the hamlet of Little Walden, dispersed farm houses and associated buildings, and cottages serve to complement the sense of openness and remoteness from development.

HISTORIC LANDSCAPE

2.6 The historic landscape comprises Audley End House, the surrounding and associated parkland designed by Lancelot “Capability” Brown, and the immediate surrounding area which includes the golf club and St Mark’s College.

2.7 As well as having immense aesthetic appeal, Saffron Walden also benefits from good schools and a charming town centre. It has a very active and friendly community which is often remarked upon by visitors and newcomers to the town.

2.8 Saffron Walden is accessible to both London and Cambridge, with the M11 motorway and Audley End railway station being a few miles outside the town.

2.9 The Heritage and Character Assessment regards views into and out of both the Conservation Areas and the countryside as being key assets of the parish. The key risk identified for all areas was any development which might impede the views. Accordingly, the SWNP maps the key views.

DEVELOPMENT IN SAFFRON WALDEN OVER THE PAST DECADE

2.10 The sum of the town’s attributes offers such an attractive proposition that new and existing housing is relatively easily sold to people wishing to escape the larger urban conurbations, especially London and Cambridge.

2.11 The high quality of amenities in the town has contributed to a virtuous circle, as development has brought in more residents, who in turn have become clients for the amenities and so by any measure Saffron Walden can be described as a thriving market town. It is regularly listed amongst the best places to live nationwide.

2.12 Whilst the increased population brings additional and welcome participants to the town’s activities and consumers to the town’s businesses, the property purchasing power of incomers outbids that of existing residents and of many people who work locally. Affordability of housing has consequently become a key local issue, reported both in public consultations and in official Strategic Housing Market Assessments commissioned by the District Authority. A Halifax report in 2018 stated that Saffron Walden was the 9th most expensive market town in the UK in which to buy a home.

2.13 There is a widely-held perception that infrastructure development has not kept pace with housing development and that the town is “at capacity”. The road network is constrained by the physical structure of the medieval street plan and highways assessments have not identified any possible alterations which would materially reduce congestion or improve air quality. The busiest junctions are at capacity, or are forecast to be at capacity by 2033. Despite

the increases in population in the last ten years, the town has not had the proportionate addition of essential infrastructure such as schools, doctors' surgeries, playing fields or other open spaces.

THE COMMUNITY OF SAFFRON WALDEN

Population	2011 Census	2018	% Change
Saffron Walden	15,504	16,719 (1)	+7.8%
Uttlesford	79,443	86,200 (2)	+9%
England	53,012,456	55,619,430 (3)	+5%

Dwellings	2011 Census	2018	% Change
Saffron Walden	6,510	7,361 (4)	+13%
Uttlesford	31,316	38,159 (5)	+22%
England	22,063,368	23,900,000 (6)	+8%

Average Population per Dwelling	2011 Census	2018	% Change
Saffron Walden	2.4 (7)	2.4	
Uttlesford	2.5	2.3	-11%
England	2.4	2.3	-3%

Sources:

- (1) This was the ONS estimate in 2017, although the actual figure is likely to be higher since then given the part construction and occupation of two major new housing developments.
- (2) UDC eLP
- (3) Office for National Statistics estimate at 30 June 2017
- (4) UDC Council Tax Base at 22 March 2018 not including partially completed dwellings
- (5) UDC Council Tax Base at 4 July 2018 not including partially completed dwellings
- (6) ONS estimate at 30 June 2017
- (7) The UDC sports strategy, published 2019, uses a population per household rate of 2.4 for its calculations, so for clarity the SWNP also uses this figure.

2.14 Uttlesford has had a much higher increase in the number of dwellings than England has had as a whole, +22% compared to +8%. The population has also increased, although not by as much: +9% in Uttlesford compared to +5% in England as a whole. The average number of people living in each dwelling has dropped in both Uttlesford and England as a whole; however the drop has been greater in Uttlesford.

2.15 Forecasted changes in the population, as relevant to housing need, are published in the Uttlesford District Council Housing Strategy 2016-2021 (Dec 2015). Page 13 states:

- *"The Uttlesford District is projected to increase from 83,500 people to 105,800*

by 2035.

- *The number of residents living in the district who are aged 65 and over is expected to increase from 15,800 people to 28,000.*
- *Growing ageing population with 1,070 people aged over 65 in Uttlesford are thought to have dementia. This figure is estimated to rise to 1,920 by 2030.*
- *70% of the population own their own home.*

Our population is getting older, living longer and requiring greater care. This is already having implications for the housing market. Requirements for extra care, residential homes and a specialist dementia facility are needed to meet these needs.”

2.16 High house prices are an issue in Saffron Walden. The Uttlesford District Council Housing Strategy 2016-2021 (Dec 2015) quotes:

- *“Average house price of £450,300 compared to regional average of £299,400 (August 2015)*
- *Average house price is 18 times the average income.*
- *Average income in Uttlesford is £24,575 per annum.*

The evidence base shows that house prices are high in Uttlesford and incomes low, meaning that mortgages are unaffordable for a large percentage of our population. This places a strain on the Council’s housing stock and the private rented sector. Young people, families and those providing our key services (for example care staff, teachers, cleaners etc.) are moving out of Uttlesford away from family and support to be able to buy their first home.”

2.17 Uttlesford is a rural district where household car ownership is recognised as being higher than the national average. In the 2011 Census the average number of vehicles per household was 1.2 nationally, 1.4 in Essex and 1.7 in Uttlesford. This reflects the rural nature of the majority of Uttlesford and the relatively sparse public transport provision. According to the 2011 Census, 76% of residents in Uttlesford commute to work by car.

2.18 According to the 2015 UDC Strategic Environmental Assessment¹, almost half of all residents in Uttlesford travel to work outside the district, and just under half of all jobs in the area are taken by people living elsewhere. House prices, traffic volumes and busy commuter trains are further evidence that a significant number of residents of Saffron Walden commute out each day to achieve higher incomes than are generally available in the parish or in Uttlesford as a whole. Conversely, local employers report that a significant number of the key services in Saffron Walden are supplied by people commuting into the town each day, for lack of housing affordability within the town.

¹ Place Services: Uttlesford District Council Local Plan Sustainability Appraisal and Strategic Environmental Assessment Scoping Report: Annex B – Baseline Information July 2015 (page 29)

3. SAFFRON WALDEN'S FUTURE

3.1 In order to ensure that the SWNP addresses the issues which are important to the residents of the parish, the survey questions and the focus groups asked people to describe their thoughts about development in relation to the following topics:

- Saffron Walden's heritage;
- Housing types, housing and development design and spatial planning and design;
- Transport and getting around;
- Green infrastructure;
- The local economy and business including retail and consumer, professional services, tourism and light industrial;
- Mental and physical health;
- Arts;
- Education and skills; and
- Sport and physical activity.

3.2 It was inevitable that some issues arising from public consultations were conflicting because not everyone wants the same thing for the future of the parish. For example, some survey respondents expressed concern about the aesthetics of new developments while others focused on high house prices. Some welcomed development that may enable them or family members to stay living in the town, while others thought the town was too big already.

3.3 Some issues that arose could be viewed as both a positive and a negative. For example, on the positive side, and as an asset to Saffron Walden, the schools offer a very high standard of education. On the other hand, this attracts new families to the area resulting in the schools being at capacity. This is something that can be mitigated when addressed at the early stages of planning applications.

3.4 Naturally many of the issues which emerged from the surveys, the focus groups and from primary evidence documents overlapped more than one topic. For example, the issue of high school run traffic volumes overlaps the areas of spatial planning, transport capacity issues and physical health.

3.5 The Neighbourhood Plan team recognised that many of the issues and concerns raised by residents during the initial public surveys and consultations are not technically planning issues, because they cannot be resolved by planning solutions or policy. Therefore, it is clear that some issues listed in this section technically sit outside the SWNP. Nonetheless they provided a critically important insight into public opinion and thus provided a useful lens through which to assess and determine the direction of travel. They are included here for that reason.

3.6 The recurring comments made in public consultations have been summarised into the following categories:

- **Assets to Saffron Walden**, which the SWNP seeks to protect for future generations.
- **Opportunities for Saffron Walden**, which the SWNP seeks to embrace for the benefit of future generations.
- **Challenges for Saffron Walden**, where improvement or mitigation measures are required to create a sustainable future for Saffron Walden.

SAFFRON WALDEN'S ASSETS – AS NOTED IN PUBLIC CONSULTATIONS

1. Saffron Walden is a market town with a town centre which provides a range of services and commerce to an extensive rural catchment area.²
2. Saffron Walden has an excellent range of independent and interesting shops, which makes for a commercial centre which offers a novel experience to visitors.³
3. Saffron Walden has well-regarded schools.⁴
4. Food and drink offers are successful in the town, seen in the success of individual market stalls, the occasional French market (predominantly food), and in the large number of cafes and restaurants operating in the centre.⁵
5. Saffron Walden has a strong community feel.⁶
6. The town contains a variety of historically and aesthetically interesting architecture and attracts tourists and new residents from outside areas.⁷
7. Saffron Walden sits in a bowl and the views from Saffron Walden out to the surrounding countryside are a key part of Saffron Walden's appeal.⁸
8. The town is rural and this feel is supported by a number of important greenspaces in and around the town which are both formal and informal.
9. Saffron Walden has a strong offer of art-related activities which support health and a community spirit.

² This opinion is supported by **Uttlesford District Council Regulation 19 Local Plan 2018, para. 2.5** and **(Uttlesford) District Retail Study Savills, May 2018 Update, para. 2.41** "the centre's function [is] one of meeting the main food shopping requirements of the town in its wider hinterland and a significant proportion of the comparison retail needs of the Study".

³ This opinion is supported by **(Uttlesford) District Retail Study Savills, May 2018 Update, para. 3.7** "Saffron Walden [has] a reasonably wide representation of comparison traders, most of which are independent."

⁴ This opinion is supported by **Ofsted** St Mary's CofEVA Primary School Good (2017), RA Butler Infant School Good (2015), RA Butler Junior School Good (2017), St Thomas More Catholic Primary School Good (2018), Saffron Walden County High School Outstanding (2013), Katherine Semar Junior School (no results listed at time of writing), Katherine Semar Infant School (no results listed at time of writing), Dame Bradbury's (Independent Primary School)

⁵ This opinion is supported by revenue generated by Saffron Walden Town Council Market.

⁶ Saffron Walden has a regular programme of free events arranged by voluntary groups, a strong voluntary sector, and community centres well-booked for clubs, groups and classes.

⁷ This opinion is supported by the Saffron Walden Tourist Information Centre

⁸ This opinion is supported by the Heritage and Character Assessment

10. The Slade watercourse is a wildlife asset.

SAFFRON WALDEN'S OPPORTUNITIES – AS NOTED IN PUBLIC CONSULTATIONS

11. Saffron Walden has a strong performance art community which could be built upon as a revenue source.⁹
12. Tourism could play a larger part in the economy.¹⁰
13. The town is located on the London /Cambridge corridor. New technology will find wide applications which will encompass work, and work/life balance, transport, health and education. A well-educated community, and proximity to Cambridge and London, gives Saffron Walden the opportunity to adopt an agile approach and benefit from future investment and benefits.
14. The evening economy could be more vibrant and there is support for a more café-style culture.
15. Many residents in Saffron Walden actively support, or at least accept, the need for development.

SAFFRON WALDEN'S CHALLENGES – AS NOTED IN PUBLIC CONSULTATIONS

HOUSING COSTS

16. Homes are too expensive for many residents of the town. The average house price in Uttlesford is 18 times the average income.¹¹
17. There are not enough one and two and three bedroom homes so it is difficult for starter families and singles to live and remain in the town.¹²

⁹ **Saffron Walden Arts Trust** and various performing groups regularly present performances. **Saffron Screen** has a current business plan which would support expansion should space become available. **Saffron Hall** has regular fully booked events.

¹⁰ This opinion is supported by **Visit England** Audley End House (English Heritage) received 150,591 visitors in 2015 and 165,799 visitors in 2016, an increase of 10.1%, and **Saffron Walden Bid Campaign** (referencing trial event in which Saturday visitors to Audley End were offered free transport to and from the town centre) "The Horse and Carriage Trial in July 2017 and vintage bus (December 2017) brought over 1,000 people into town and more than 1/5 of them said they would not otherwise have visited".

¹¹ This opinion is supported by facts reported in the **Uttlesford District Council Housing Strategy 2016-21** – (see section on housing for further details).

¹² This opinion was widely supported by the Neighbourhood Plan survey, in which 76% of votes supported more 2 and 3-bedroom houses being built. 6% were against this suggestion, and 18% were neutral.

HOUSING DESIGN

18. The style of architecture of new builds is rarely original and new estates in Saffron Walden are largely indistinguishable from other new build developments anywhere else in the country.
19. There isn't enough off-road parking on developments for the cars required for each household, so cars are inevitably parked along the street. This creates congestion, can be an obstruction for emergency vehicles and detracts from the vision originally presented by the developers.
20. New build houses tend to be small, so garages get used for storage rather than for parking, with cars ending up along the street.
21. Recently built gated developments reduce the social interactivity and connectivity in their locations in town.
22. None of the developments in Saffron Walden are "eco-builds" or built to Passivhaus standards (where very little energy is used for heating or cooling).
23. New developments have solid paved parking which has limited permeability.
24. House extensions are very popular in Saffron Walden, including on the newest developments less than 4 years old, reducing the garden sizes and putting more pressure on the communal green spaces for play and general recreation.¹³

INFRASTRUCTURE

25. Infrastructure improvements have not happened in step with past housing development and many residents are disillusioned with regard to further development and feel that the town is too big already.
26. The volume of traffic using the medieval road structure of the centre of the town has led to traffic congestion and accompanying air quality issues which are not easily resolved because the roads cannot be widened.¹⁴
27. During peak hours and during term time, congestion on many roads and junctions is much heavier than outside of term times, which indicates that the school run generates many car journeys.
28. Highways schemes¹⁵ seem to be designed only to speed up traffic, which directly conflicts with measures which would be implemented were pedestrian and cyclist safety at the top of the agenda.
29. The vast majority of new houses have been built on the East of the town which is difficult for the road network to support, given that the external destinations in highest demand (Audley End train station in Wendens Ambo, the M11 and Cambridge)

¹³ This opinion is supported by the 10 or so planning applications per fortnight for home extensions which are presented to the Saffron Walden Town Council Planning and Road Traffic Committee, the vast majority of which are approved. This would be equivalent to roughly 260 home extensions per year.

¹⁴ This opinion is supported by **Essex Highways** Uttlesford Local Plan Highway Impact Assessment 2013.

¹⁵ For example, removing parking from Peaslands Road, with the intended effect of speeding up traffic.

are accessed via the West of the town. All traffic must pass through the centre of the town as there is no relief road.¹⁶

30. Saffron Walden has higher than acceptable levels of air pollution and the town centre is subject to an Air Quality Management Area (AQMA).
31. HGVs have access through town which causes damage to streets and buildings, high levels of pollution, and creates a road environment which is unfriendly to cyclists and pedestrians, as long vehicles can't turn corners without mounting kerbs and/or making several manoeuvres.
32. Public transport options for workers commuting into town are limited.¹⁷
33. The town has poor public transport links which means that not only is it hard to commute out of the town without using a private car, it is also difficult to come in as a visitor.¹⁸
34. Non-car driving residents needing access to hospital for appointments are recommended by the NHS to use the Uttlesford Community Travel Service which is run by volunteers.
35. There are not enough connections between town and surrounding countryside for access on foot or by bicycle.
36. Recent new developments are not well connected by footpaths to the rest of the town, which encourages driving thus compounding the problem of traffic volumes.¹⁹
37. There is little cycle parking available in the town centre, and hardly any dedicated cycling infrastructure in the parish.²⁰

HERITAGE ASSETS

38. The historic buildings in Saffron Walden are very close to the edge of narrow roads and are regularly struck and damaged by vehicles.²¹
39. Vibration from traffic causes damage to old buildings.

¹⁶ Land ownership constraints and protected designations such as Scheduled Monuments, Listed Buildings and Registered Parkland around the town have meant that the only land coming forward for development has been to the east of the town. This has led to far more development in the east than would have been recommended had development land also been available to the west.

¹⁷ For example – no late buses from Saffron Walden to nearby Ashdon after 2.30pm, making it possible to commute in to SW by bus but not to get back in the evening.

¹⁸ This opinion is supported by the **Uttlesford District Transport Study December 2016 page 20, para 3.3.3 Table 1 – 2011 Census: Mode of Travel to Work (Usual Residents)** *“The data reflects the rural nature of the majority of Uttlesford and the relatively sparse public transport provision. For many residents the car is the only feasible mode of transport.”*

¹⁹ This opinion is supported by a map showing missed opportunities for connectivity in Section 5.

²⁰ This opinion is supported by **Uttlesford District Cycling Action Plan March 2018** which identifies improvements to this.

²¹ Buildings are regularly damaged, and some building owners report that they now find it difficult or impossible to insure their buildings. Town Council owned CCTV cameras occasionally struck by high vehicles.

ARTS AND CULTURE

40. Saffron Walden does not have an arts performance space that is large enough, or that can be booked for long enough, for full staged productions to be viable.
41. Saffron Walden does not have a space to host large arts exhibitions.
42. Cost of hire of rooms and availability of storage space is an issue for arts groups.

SPORTS AND RECREATION

43. Saffron Walden has a lack of recreational facilities for organised sports and informal activities relative to the population size.²²
44. There is no provision for many sports activities in town, with rugby being mentioned most frequently in public consultations.²³
45. There is a lack of community halls and facilities.²⁴

GREEN SPACE AND WILDLIFE

46. There is no in-town provision specifically for dog walking.
47. Saffron Walden does not have enough accessible open space.²⁵
48. There is a good network of out of town cross-field footpaths for ramblers to the north and the east of the town, but no real network of bridle-paths.
49. Gardens on new build estates are smaller than on older estates, reducing the green footprint of the town as it expands and increasing the pressure on public playgrounds.
50. As greenfield sites are developed additional pressure is placed on the green lung spaces within the town which are essential to an urban area.
51. Wildlife corridors and natural habitats are decreasing within the Neighbourhood Plan zone as greenfield sites are developed.
52. Residents of new developments often find that the green spaces are not of good quality.
53. New housing developments are relatively cramped with less space for street and garden trees than on older developments. This can be seen from the 'rooftop view' of the town.

²² This opinion is supported by the **Uttlesford Open Space Strategy 2012** which identified a number of additional recreational facilities that should be established with contributions from developers to meet demand.

²³ The Saffron Walden rugby club is based in Henham 8.5 miles away for lack of pitches in Saffron Walden. All sports clubs report that they have to use facilities out of the parish to meet the needs of their members.

²⁴ The Neighbourhood Plan group surveyed groups with halls for hire (for example Church halls) and they all reported to be working at capacity and often having to turn down booking requests.

²⁵ This opinion is supported by **Fields in Trust** which recommends 3.2ha per 1,000 of population which would equate to a requirement of approximately 54ha in Saffron Walden. Current provision in Saffron Walden is around 15ha.

EDUCATION

54. There is a sense that schools at all levels are at capacity.²⁶

HEALTH

55. There is a sense that doctors' surgeries are at capacity.²⁷

56. There is no walk-in health centre.

BUSINESS AND LOCAL ECONOMY

57. Bricks and mortar retailers are under threat from internet shopping trends (as they are everywhere in the country). The challenge is finding ways to keep the town centre vibrant.

58. Many people consider that there are too many charity shops in the centre of Saffron Walden and cite high rent and rates as a cause of this.

59. The town does not have many high street shops so when not ordering online, local shoppers will naturally travel outside the area when wanting to visit these types of stores whether for a specific purchase or for a leisure shopping outing.

60. The cost of parking in town is too expensive for many people who commute into Saffron Walden (those who cannot afford the cost of living in the town itself).

61. Signage to Saffron Hall and Saffron Screen is not clear enough for out of town visitors.

62. Saffron Screen and Saffron Hall are out of the centre and therefore events held there do not generate a positive knock-on impact on the evening economic activity of the town centre.

²⁶ There are instances of children not getting into their first or closest school.

²⁷ There can be a wait of 4-5 weeks for an appointment.

VISION STATEMENT

3.7 During the public consultations, the Neighbourhood Plan team gained a comprehensive understanding of the issues that are important to the people living and working in the Saffron Walden Civil Parish.

3.8 This understanding enabled the Neighbourhood Plan team to create a vision for the future of Saffron Walden, as follows:

Saffron Walden will retain its unique identity as a visually beautiful market town with its rich heritage, a large number of listed buildings and a number of historic green spaces within the town and across the parish. It will be a settlement of the highest environmental sustainability due to provision for pedestrians and cyclists, continued reduction in carbon emissions, encouragement of recycling and use of green energy. Movement within the town will be safe and easy and journeys by car will be minimised. Economic activity will develop so that as many residents as possible will be able to earn their livings in the town. The traditional long-established links with the artistic community will be maintained and its proximity to Cambridge will enable it to become a popular tourist destination. The existence of many local interest groups, combined with activities organised by residents demonstrates a high level of civic pride. Little Walden will maintain its separate identity and integrity as a rural village served by Saffron Walden.

NEIGHBOURHOOD PLAN OBJECTIVES

3.9 The vision informed the Neighbourhood Plan core objectives.

Objective 1

Saffron Walden will be an economically active and self-sustaining town, offering equal opportunities to all.

Objective 2

Saffron Walden's residents will be able to live as healthily as possible.

Objective 3

Saffron Walden will be an environmentally sustainable town.

Objective 4

Saffron Walden's heritage assets, high quality landscape and conservation areas will be protected or enhanced.

Objective 5

Saffron Walden will retain its market-town feel and community spirit.

Each policy within the SWNP addresses one or more of the following core objectives.

4. FUTURE HOUSING NEED IN SAFFRON WALDEN

4.1 SAFFRON WALDEN NEIGHBOURHOOD PLAN SITE ALLOCATIONS

4.1.1 The Spatial Strategy which is part of the eLP allocates sites suitable for development. This list of site allocations began with a 'call for sites', to which landowners were able to put forward land to be considered for development. Each parcel of land was then rigorously assessed for "suitability", "achievability" and "availability" by the District Council. The SWNP considers the findings of the Site Assessments and Policies on Site Allocations to be robust.

4.1.2 As at December 2018, Uttlesford District Council has 3.46 years housing land supply. The SWNP allocates sites for development (see policy SW1). Together this means that when the SWNP is formally "made" (adopted), the local planning authority has an adequate number of dwellings planned so that the policies in this Neighbourhood Plan are binding in planning decisions. This remains the case so long as the District Council has a land supply of over 3 years, and only if the SWNP allocates sites for development.

4.1.3 The eLP Spatial Strategy for Saffron Walden sets out a requirement for 1,393 dwellings to be built over the lifespan of the eLP i.e. until 2033. Since its publication at Regulation 19 stage, an additional site for 100 dwellings, not included site allocations, has been granted planning permission.

4.1.4 In total 1,460 dwellings will be delivered between 2011 and 2033, not including any additional dwellings which will come forward on small windfall sites as urban infill. This represents a minimum of a 23% increase in the number of dwellings in Saffron Walden between 2011 and 2033.

4.1.5 Some of these 1,460 dwellings have been built and outline or detailed planning permission has already been granted to build most of the remainder.

4.1.6 The town of Saffron Walden and the hamlet of Little Walden both have defined development limits and development beyond these limits will be restricted except where allowed by exception according to NPPF. The eLP Policy H5 "Residential Development in Settlements without Development Limits" does not therefore apply to the parish of Saffron Walden because both settlements have defined limits.

SAFFRON WALDEN NEIGHBOURHOOD PLAN SITE ALLOCATIONS (SW1)

Status and Site	Total number of dwellings	Subtotals by site
Dwellings built 2011-2016 on sites of 6 more dwellings	533	
Sites with planning permissions granted as at 1st April 2017		235
Reg 19 Policy SAF 8 Land south of Radwinter Road UTT/16/1856/DFO		200
Reg 19 Policy SAF 9 Land rear of The Kilns, Thaxted Road UTT/16/1444/OP		35
Sites with planning permission granted between 2nd April 2017 and publication of the SWNP		582
Reg 19 Policy SAF 1 Land north of Thaxted Rd UTT/18/0824/OP		150
Reg 19 Policy SAF 2 Land east of Little Walden Road UTT/16/2210/OP		85

Land at Shire Hill (*indicative outline only, please refer to planning application
UTT/17/2832/OP for precise outline*)

OS PSMA LICENSE NUMBER: 0100057521

4.1.8 The SWNP makes the following site allocations for residential development:

- SAF 3 as noted in the eLP and mapped above;
 - SAF 4 as noted in the eLP and mapped above;
- These are both in the north map of the town. SAF3 is immediately adjacent to Bridge End Garden, which is a Grade II* Listed Park and Garden, and for this reason SAF3 has a bespoke policy in the SWNP; and
- Land North of Shire Hill Farm. This site has outline planning permission currently pending agreement of Section 106 contracts²⁸, UTT/17/2832/OP.

At time of writing the SWNP, the eLP is at examination stage and therefore it is considered appropriate to include the sites also included in the eLP. Should there be any delay in introducing a new Local Plan at District level, these sites will remain protected as development sites by their inclusion in the SWNP. Appendix 9 shows extracts from the eLP of SAF3 and SAF4.

The Land North of Shire Hill is outside the development limits of Saffron Walden. It has been included in the SWNP only because the principle of development at this site for up to 100 dwellings was established in December 2018, and crucially this principle of development included the provision of a spine road which would link the developments to the north (SAF8) and the development to the south (SAF 1). Without such a linking road capable of taking

²⁸ As at 07.10.19

considerable volumes of traffic including buses and HGVs, development at this site would not be acceptable. Should development not proceed as per the application UTT/17/2832/OP, then any subsequent application for this site would be required to demonstrate that it would not have any adverse impacts on air quality, biodiversity, human health and landscape, and must not rely on evidence provided in support of UTT/17/2832/OP. Any new application will be assessed on its own merits within the context of the level of development in Saffron Walden at the time of the application. Any new application must provide a connecting road between the developments to the north and south.

POLICY SW1 SWNP SPATIAL STRATEGY

1. SAF3 as described in the eLP is a SWNP site allocation and proposals for up to 10 dwellings will be supported subject to specific requirements which are set out in Policy SW3 Land at Viceroy Coaches, other relevant policies in the Neighbourhood Plan and with the following site-specific requirements:

- (a) The development provides for a mixed and balanced community;
- (b) Development respects the amenity of existing dwellings adjoining the site;
- (c) A Transport Assessment may be required to support a planning application and appropriate access arrangements to be agreed and to the satisfaction of the highway authority;
- (d) An Air Quality Assessment will be required to demonstrate the development will have no adverse impact on the Saffron Walden AQMA. The Air Quality Assessment will also need to demonstrate that if there is a potential impact on the AQMA, suitable mitigation measures are put in place;
- (e) A Landscape and Visual Impact Assessment will be required and should inform the design and layout of the site proposals;
- (f) Appropriate ecological survey will be required;
- (g) Development will need to be implemented in accordance with design guidance approved by the Council and other Development Management policies.
- (h) Implementation of the proposals will be regulated by legal obligation in association with the grant of planning permissions;
- (i) The development is designed to mitigate adverse effects upon existing residential and community interests and may be required, by legal obligation, to provide or contribute towards wider and longer-term planning benefits reasonably associated with the alleviation of any such impact; and

Continued on next page

Policy SW1 SWNP Spatial strategy

(j) Development does not have an adverse impact on the setting of the Conservation Area and does not impact upon the Listed building of 12 Bridge Street or the surrounding listed buildings or the Bridge End Garden.

2. SAF4 as described in the eLP is a SWNP site allocation and proposals for up to 12 dwellings will be supported subject to the proposals complying with other relevant policies in the Neighbourhood Plan and with the following site-specific requirements:

- (a) The development provides for a mixed and balanced community;
- (b) Development respects the amenity of existing dwellings adjoining the site;
- (c) A Transport Assessment may be required to support a planning application and appropriate access arrangements to be agreed and to the satisfaction of the highway authority;
- (d) An Air Quality Assessment will be required to demonstrate the development will have no adverse impact on the Saffron Walden AQMA. The Air Quality Assessment will also need to demonstrate that if there is a potential impact on the AQMA, suitable mitigation measures are put in place;
- (e) Implementation of the proposals will be regulated by legal obligation in association with the grant of planning permissions;
- (f) The development is designed to mitigate adverse effects upon existing residential and community interests and may be required, by legal obligation, to provide or contribute towards wider and longer-term planning benefits reasonably associated with the alleviation of any such impact;
- (g) A Landscape and Visual Impact Assessment will be required and should inform the design and layout of the site proposals; and
- (h) A Contamination report will be required to identify and potential contamination on site and mitigation measures.

Continued on next page

Policy SW1 SWNP Spatial strategy

3. Land at Shire Hill as defined by the outline in planning application UTT/17/2832/OP is a SWNP site allocation and proposals for up to 100 dwellings will be supported subject to the proposals complying with other relevant policies in the Neighbourhood Plan and with the following site-specific requirements:

- (a) The development provides for a mixed and balanced community to include at least 5% older persons 1 and 2 bed dwellings across tenure;
- (b) Development respects the amenity of the existing dwellings adjoining the site;
- (c) A Transport Assessment will be required to support a planning application and appropriate access arrangements to be agreed and to the satisfaction of the highway authority;
- (d) An Air Quality Assessment will be required to demonstrate the development will have no adverse impact on the Saffron Walden AQMA. The Air Quality Assessment will also need to demonstrate that if there is a potential impact on the AQMA, suitable mitigation measures are put in place;
- (e) A Landscape and Visual Impact Assessment will be required and should inform the design and layout of the site proposals;
- (f) An appropriate ecological survey will be required;
- (g) Development will need to be implemented in accordance with design guidance approved by the Neighbourhood Plan, Uttlesford District Council and other Development Management policies.
- (h) Implementation of the proposals will be regulated by legal obligation in association with the grant of planning permissions;
- (i) The development is designed to mitigate adverse effects upon existing residential and community interests and may be required, by legal obligation, to provide or contribute towards wider and longer-term planning benefits reasonably associated with the alleviation of any such impact;
- (j) Development will need to be implemented in accordance with the Master Plan and design guidance approved by the Neighbourhood Plan, Uttlesford District Council and other Development Management policies. Implementation of the Master Plan proposals will be regulated by legal obligation in association with the grant of planning permissions;

Continued on next page

Policy SW1 SWNP Spatial strategy

(k) The Master Plan needs to make provision for the delivery of a link road between Thaxted Road and Radwinter Road; and

(l) A Contamination Report will be required to demonstrate there is no contamination on site due to the nearby landfill site.

(m) The layout must not site play areas and other public open spaces alongside the link road.

4. This housing requirement is not a ceiling for housing growth. However, the only additional development outside the identified allocations or beyond the development limits which might in principle be acceptable will be:

(a) community-led development; or

(b) proposals brought forward by a Community Land Trust group.

In each case the development must be for affordable housing.

5. The SWNP acknowledges that eLP policies H7 Affordable Housing on Exception Sites, H11 Specialist Housing, H12 Agricultural/Rural Workers' Dwellings and SP10 Protection of the Countryside will also apply to the SWNP area when the eLP is adopted.

This policy supports the Neighbourhood Plan Objectives 3,4,5

4.1.9 Apart from some recent developments, almost all of Saffron Walden sits in a bowl, as is demonstrated in the map below which shows the contour lines. (Orange shaded areas show built out or consented development not yet illustrated on online maps) The fact that the town is in a dip provides a considerable amenity to residents and visitors; because from almost any vantage point on the outside of the town, it is possible to see clearly over the top to open countryside beyond. The photographs below the map illustrate this point.

OS PSMA LICENSE NUMBER: 0100057521

This photo is taken from the south east of the town from a public footpath and it clearly shows the south of the town hidden in a dip.

Picture taken by SWNP

This photo is taken from the west of the town from a public footpath; but for the church spire there would be no indication that there is a settlement hidden in the dip.

Picture taken by SWNP

The rural setting of the town is an important characteristic and must be preserved.

POLICY SW2 PROTECTION OF VIEWS

Planning applications for development will have to demonstrate that they will not have a detrimental impact on the rural setting of the town by removing or diminishing the views over the town.

This policy supports the Neighbourhood Plan Objective 4

4.1.10 Because of its proximity to Bridge End Garden, a specific policy has been written for the site SAF3: Land at Viceroy Coaches.

POLICY SW3 SITE ALLOCATION - LAND AT VICEROY COACHES, TO REAR OF 10-12 BRIDGE STREET

The SWNP supports the Local Plan allocation SAF3 but requires the following criteria to be met:

- a) Provision for a mixed community;
- b) Prior approval of a Development Brief which identifies how the development will respect the building line, form and materials of the immediate area and enhance the wider Conservation Area;
- c) The retention or replacement in sympathetic materials of the brick walls of the existing buildings to a height of 2.4m between the site and Bridge End Garden; and
- d) The retention and protection of mature trees and hedging within Bridge End Garden.

This policy supports the Neighbourhood Plan Objective 4

4.2 HOUSE SIZES

4.2.1 It is important that the SWNP plans for the right size, type, tenure and range of housing that is required in the parish.

THE CURRENT STOCK OF HOMES IN SAFFRON WALDEN

4.2.3 A significant proportion of existing housing stock at the 2011 Census was of detached and semi-detached family houses. The Census registered 57% detached or semi-detached properties, 23% terraced houses and 20% flats/maisonettes.

4.2.4 Recent development (going back to slightly before the Census in 2011) in Saffron Walden has been heavily weighted towards larger properties particularly in the open market category. The newest developments have been constructed as follows:

Open Market Housing:

1 bed.	2 bed.	3 bed.	4 bed.	5 bed.	Total
0	40	179	174	38	431

Affordable Housing (combining affordable rent and shared ownership)²⁹:

1 bed.	2 bed.	3 bed.	4 bed.	5 bed.	Total
44	109	42	9	0	204

Source: Developer plans and Uttlesford District Council Housing Department

4.2.5 Many smaller homes in Saffron Walden have been extended, as it can be cheaper and more convenient to extend a home rather than move. This has further reduced the stock of smaller homes.

WHAT SIZE HOMES DO PEOPLE NEED?

4.2.6 Public surveys and consultations for the SWNP always show a demand for “smaller” and “more affordable” homes. In order to test whether the survey results show a true picture of demand, the SWNP looked at the local authority evidence base to assess demand for affordable housing, and private sector market data to assess demand for open market homes.

4.2.7 The local authority housing waiting list shows that social housing need is highest for 1, then 2, then 3, then 4 bedroom houses.

The local authority housing waiting list in Uttlesford is as follows (as at 23/07/2018)³⁰

1 bed.	2 bed.	3 bed.	4 bed.	5 bed.	Total
581	291	102	30	0	1004

Source: Uttlesford District Council Housing Department

4.2.8 Local Housing Allowance (LHA) (*housing benefit*) is assessed and paid at a rate which depends on the household size. Around half the people eligible for housing benefit are in work, but do not earn enough to afford rent without subsidy. Around half the people in employment and in receipt of LHA qualify for a two-bedroom rate, while almost all the people out of work and qualifying for LHA receive a one-bedroom rate.

²⁹ Note that a care home was provided as part of an affordable housing contribution, not included in these numbers due to the specialist nature of the dwelling.

³⁰ Households classed as in housing need bands A-D (i.e. not including band E)

The number of people in Uttlesford in receipt of LHA is as follows (as at 07/03/2019)

Employment Status	1 bed.	2 bed.	3 bed.	4 bed.	5 bed.
Employed	20	85	41	17	0
Unemployed	133	20	12	2	0

Source: Uttlesford District Council Housing Department

4.2.9 Noting that people in receipt of LHA should be no different to people not in receipt of LHA, other than the fact that they have lower household incomes, this data clearly shows by a considerable margin that the dominant household sizes in Uttlesford, where the household is counted as employed, require 2 or 3 bedrooms.

4.2.10 To assess private sector demand, a bespoke data research project was commissioned from Rightmove, which was asked to provide data on what sizes of property were being searched for, and where the search originated; whether it was inside or outside the town of Saffron Walden itself. The data is from searches which resulted in actual enquiries to estate agents, in order to eliminate any potential skew caused by idle browsing. The data covered the 12 months to 31st March 2019.

4.2.11 The Rightmove figures show that prospective buyers from outside the area greatly outnumber prospective buyers from within the area, with 96.5% of the searches coming from outside compared to 3.4% coming from within Saffron Walden.

Enquiries through Rightmove ranked by percentage of searches (note that this adds up to 99.9% through rounding)

House size	Percentage of searches leading to enquiry with estate agent	Origin of the search (identified by IP address of searcher)
2 bed	32.6%	Outside Saffron Walden
3 bed	31.8%	Outside Saffron Walden
4 bed	24.7%	Outside Saffron Walden
5 bed	4.2%	Outside Saffron Walden
1 bed	3.2%	Outside Saffron Walden
3 bed	1.5%	Within Saffron Walden
2 bed	1%	Within Saffron Walden
1 bed, 4 bed, 5 bed	0.3% each	Within Saffron Walden

4.2.12 The figures also show that 66.9% of searches are for 2 or 3 bedroom homes, while 29.5% of searches are for 4 or 5 bedroom homes. This means that recent housebuilding, in

which roughly 219 2 and 3 bedroom houses have been built, compared to 212 4 and 5 bedroom houses, is out of kilter with the market demand.

4.2.13 This is backed up by the indexed demand statistics, which further break down demand between houses and flats, as follows:

Indexed demand through Rightmove, as measured by email enquiries over 12 months

Property enquiries from lowest to highest measured as demand relative to supply

- 2 Bedroom house 4.0 (highest demand relative to supply)
- 3 Bedroom house 2.7
- 4 Bedroom house 2.2
- 5 Bedroom house 2.1
- 2 Bedroom flat 2.0
- 1 Bedroom flat 1.8
- 3 Bedroom flat 1.0 (lowest demand relative to supply)

This research shows that in Saffron Walden, houses are more in demand than flats. 2 bedroom houses on the market receive twice as many enquiries as 2 bedroom flats, and almost twice as many enquires as the next most sought after sized property, which is a 3 bedroom house.

4.2.14 This ‘heat map’ produced by Rightmove shows that the M11 corridor from inside London and up to Cambridge is the origin of most enquiries. The “house” icon is Saffron Walden.

4.2.15 This migratory trend is confirmed and identified in the UDC 2015 Strategic Housing Market Assessment (SHMA), which notes that larger houses tend to be sold to newcomers to the area, and that they have higher buying power than existing residents. The recent trend therefore has been for larger houses to be built to satisfy this market segment. Therefore, despite the market demanding far more 2 and 3 bedroom houses than 4 and 5 bedroom houses, developers have been able to sell 4 and 5 bedroom houses by marketing them widely. Thus the 2015 SHMA (and associated policy in the eLP) is based on the ability of developers to sell homes of a particular size, rather than being an assessment and reflection of market demand.

4.2.16 While the overall supply of dwellings in Saffron Walden has increased since the 2011 Census, the skew towards larger homes has meant that the provision has not satisfied demand, local or otherwise, and it has not satisfied the immediate needs for housing across all ages and incomes. Neither has it taken into account future trends including an aging population or the generally shrinking population per household.

4.2.17 Housing need in Uttlesford has been set out in the 2015 UDC Strategic Environmental Assessment³¹. The data in the assessment confirms the Rightmove research. This table is copied from page 14 of the assessment:

Table 15: Size mix of housing requirement, 2007 – 2021

All Housing		
1 bedroom	1300	12.2%
2 bedroom	2100	24.6%
3 bedroom	3200	40.5%
4 bedroom	1200	18.0%
5 + bedroom	300	4.7%
Sub-total	8100	100.0%

4.2.18 The Neighbourhood Plan seeks to ensure that Saffron Walden can accommodate a diverse range of age groups and types of households, and that it can retain second generations of residents. Over the plan period, the SWNP seeks to rebalance the supply of housing towards smaller homes, in line with local demand, which is in itself in line with national trends.

4.2.19 Development is irreversible and the SWNP wishes to ensure that best possible use of land is achieved to support the future sustainability of the parish. Open land has a social, economic and environmental value, and this value should only be lost to development if on balance the benefits of the development outweigh the benefits of the open land. If the type of development required by the planning policies is not immediately deemed viable then it is preferable to pause development rather than to continue with inappropriate development. Inappropriate development uses up valuable land to the long-term detriment of the parish.

³¹ Place Services: Uttlesford District Council Local Plan Sustainability Appraisal and Strategic Environmental Assessment Scoping Report: Annex B – Baseline Information July 2015 (page 14)

POLICY SW4 HOUSING MIX ON NEW DEVELOPMENTS

1. All residential development proposals should include a mix of sizes which reflects local needs but also provides for balanced and vibrant neighbourhoods. Unless supported by more up-to-date local evidence of need, market homes in developments of 10 or more homes will consist of:
 - i) Up to 10% 1 bedroom homes
 - ii) At least 30% 2 bedroom homes
 - iii) At least 30% 3 bedroom homes
 - iv) Up to 20% 4 or more bedroom homes
 - v) With a 10% flexibility allowance that can be added to any of the above categories taking account of local circumstances.
2. For developments solely comprising flats, a significant proportion should be 1 and 2 bedroom flats.
2. The mix of market homes in developments of 9 or fewer homes will take account of local circumstances and the nature of the surrounding area.
3. The housing mix of affordable homes is to be determined by local housing need and policies set out by the planning authority.
4. Developments may not be subdivided into smaller parcels to avoid the housing mix policy.

This policy supports the Neighbourhood Plan Objectives 1,2,3,5

4.3 AFFORDABLE HOUSING

4.3.1 The issue raised most frequently in public consultations with regard to housing was that of affordability. The Uttlesford District Council Housing Strategy 2016-21 states that the average Uttlesford house price is 18 times the average Uttlesford income, which is £24,575. 60% of Uttlesford residents earn below £34,000pa and 40% earn below £25,000.³²

4.3.2 New build homes sell for a premium; a new build house costs on average £573,000 in Uttlesford, much higher than a new build house in the wider region which costs around £357,800.³³

4.3.3 The eLP notes para 4.3 page 78, *“because of high house prices there are some members of the population, particularly younger people and those on low to modest incomes, unable to access the housing market. High housing costs have also led to a growing number*

³² Source: Uttlesford District Council Housing Strategy 2016-21

³³ Source data: Uttlesford Housing Market Report – June 2018 (Q1)

of households who do not necessarily require subsidised affordable housing, but due to inflated house prices, are financially restricted from entering the private housing market.”

4.3.4 Lack of supply of smaller homes has a high cost to the public purse in the form of need for social housing and housing allowance.

4.3.5 ‘Affordable housing’ has different meanings to different audiences. In the main, “affordable housing’ is understood by the general public as being the type of housing that isn’t too expensive for the average person to live in.

4.3.6 However, in strict planning terminology, ‘affordable housing’ is a precise description for housing which is subsidised and either rented or owed, and provided to eligible households. There is a precise way of calculating prices for affordable housing; as a broad-brush description it is housing that is 20% below open market prices. The full definition is set out in the NPPF³⁴. Information on what qualifies a household as eligible is available on the Uttlesford District Council website³⁵.

4.3.7 The SWNP uses the strict planning terminology definition of ‘affordable housing’, because this is a quantifiable measure and the only legally workable definition which can be used in a neighbourhood plan. Nonetheless, it recognises that even the 20% discount on market rates still places the prices above the reach of many.

4.3.8 Paragraph 4.18 of the eLP sets out the reasoning and evidence for the requirement for affordable housing to be 40%, as follows: *The 2017 SHMA identified that the affordable housing component of the District’s total housing need is 19.5%. In the light of national policy which does not permit affordable housing contributions from sites of 10 units or less, it is considered appropriate to require developments of 11 dwellings or more to provide 40% of the total number of dwellings as affordable dwellings to ensure that the affordable housing need is met.”* The SWNP adopts this reasoning and evidence.

4.3.9 Developments of 11+ homes have to provide 40% of them in the form of affordable housing. 70% of these are Affordable Rent and 30% are Shared Ownership. Affordable Rent housing is subject to the Right to Buy rules and can be transferred to the open market after only three years from completion.

4.3.10 The Community Land Trust model is gaining traction nationally as a method of safeguarding in perpetuity homes which have the same purpose as the traditional affordable rent housing, without the risk of transfer to the open market.

4.3.11 If the disparity between what is needed and can be afforded locally, and what has more recently been built is not addressed, there is a very real risk that Saffron Walden will become a dormitory town. This would further increase both inward and outward commuting,

³⁴ <https://www.gov.uk/government/publications/national-planning-policy-framework--2>

³⁵ <https://www.uttlesford.gov.uk/housing>

thus worsening air quality, and be damaging to the overall social structure and community feel that the town currently enjoys and which makes it so attractive in the first place.

POLICY SW5 AFFORDABLE HOUSING

1. Developments on sites which provide for 11 dwellings or more, or residential floorspace of more than 1,000 sq. m (combined gross internal area), will be required to provide 40% of the total number of dwellings as affordable dwellings on the application site and as an integral part of the development.
2. In exceptional circumstances, where this cannot be achieved, off-site provision and/or commuted payments in lieu of on-site provision may be supported where this would offer an equivalent or enhanced provision of affordable housing.
3. Affordable housing units will be distributed through the development in appropriately sized, non-contiguous clusters. The tenure mix of affordable housing should reflect the most up to date local housing need as defined by the planning authority.
4. To prevent the loss of affordable housing to the general housing market, Community Land Trusts are the preferred delivery model for affordable housing.
5. Sites may not be artificially subdivided. Where sites are sub-divided, each subdivision or smaller development will contribute proportionally towards achieving the amount of affordable housing which would have been appropriate on the whole or larger site.
6. Residential proposals which do not meet the Neighbourhood Plan's affordable housing requirement of 40% will only be supported if the proposals are justified by an open book assessment of viability.
7. Where this policy makes the scheme unviable, careful consideration will be given to the overall scheme, and the scheme should be refused unless it strongly meets all the other objectives in the SWNP.
8. Should the Community Infrastructure Levy (CIL) be introduced during the timespan of the SWNP, CIL should not be levied on affordable housing or residential care homes.

This policy supports the Neighbourhood Plan Objectives 1,2,3,5

4.4 HOUSING DENSITY

4.4.1 The density of residential development plays an important part of the character of the area and the quality of life of residents. In order to ensure an efficient use of land, and at the same time respect the character and architectural heritage of the area, housing density will be appropriate to the location.

4.4.2 Higher density housing will bring a corresponding need for more green space.

4.4.3 High density housing was built at the development known locally as Crabtrees (which includes neighbouring roads). The density at this location is around 60 dwellings per hectare. Insufficient provision for parking is a continual issue at this location, and serves as proof that the car ownership levels which are necessary in Saffron Walden cannot be supported by high housing densities.

4.4.4 A housing density of 40 dwellings per hectare is considered appropriate for Saffron Walden. Exceptions to this may be considered where underground parking is proposed as part of the scheme. Planning applications which come forward with inadequate parking provision will be resisted.

POLICY SW6 HOUSING DENSITY

1. Densities should be appropriate to site context including location, and scale, character and grain of built form in neighbouring developments. As a rule, this will mean achieving the average net density of:

- a) 40 dwellings per hectare in urban extensions to Saffron Walden;
- b) 40 dwellings per hectare in infill sites within Saffron Walden; and
- c) 35 dwellings per hectare in rural exception sites, should any come forward during the SWNP period.

2. Higher densities will be acceptable if this can clearly be justified to the site context and where the development proposal complies with the SWNP policy on parking and it is clear that there will be no additional pressure placed on town-centre parking or there are achievable solutions available to the site such as underground parking, which will not impact on the viability of the development such that it cannot meet standard obligations to make the development acceptable in planning terms.

This policy supports the Neighbourhood Plan Objectives 1,2,3,4,5

5. TOWN LAYOUT AND DESIGN

5.1 INTRODUCTION

5.1.1 The NPPF Section 12 *Achieving Well Designed Places* puts significant weight on the design aspect of the planning process:

NPPF Paragraph 124: “The creation of high-quality buildings and places is fundamental to what the planning and development process should achieve. Good design is a key aspect of sustainable development, creates better places in which to live and work and helps make development acceptable to communities. Being clear about design expectations, and how these will be tested, is essential for achieving this.”

5.1.2 Saffron Walden has grown over time, with the historic core surrounded by more recent development. The historic core contains a blend of styles from previous eras, and a large part of the town is designated Conservation Area. The surrounding developments are built in a style that reflects the more generic approach of national housebuilding companies. Some approaches to the town are characterised by older style industrial buildings, which limit the aesthetic appeal of the approach.

5.1.3 It is notable that the NPPF not only seeks to protect areas which are already considered to be attractive or “good design”, but also seeks to improve areas which are not.

NPPF Paragraph 130. Permission should be refused for development of poor design that fails to take the opportunities available for improving the character and quality of an area and the way it functions, taking into account any local design standards or style guides in plans or supplementary planning documents.

5.1.4 Saffron Walden is a small town and it can relatively easily be crossed from one side or end to the other on foot by a reasonably fit person. This human scale is important because it emphasises the need for design in all locations to be well-considered. The quality of design of all developments, both residential and commercial, will be given equal importance. Housing design must be appropriate to the scale, character and grain (scale of layout) of the existing built form; however, a site bordering existing poor design will not be a reason to allow additional poor design. Instead it must seek to improve its immediate environment.

5.1.5 The Essex Design Guide, first published by Essex County Council in 1997, and revised in 2005, is a very useful document which contains well-reasoned design guidance for developers, and local and neighbourhood plans, without being prescriptive. In its own words it “*should help many of those responsible for producing the built environment understand that housing developments should have a sense of place, be legible, pedestrian friendly and*

sustainable which help create successful living environments". The Essex Design Guide as most recently amended is considered to be suitable for the architectural vernacular of Saffron Walden.

5.1.6 The Urban Place Supplement is a supplementary document which builds on the Essex Design Guide with a particular focus on developments of over 50 dwellings per hectare. It is appropriate for developments in the centre of Saffron Walden.

5.1.7 Both documents outline ways in which neighbourhoods can be created so that residents and visitors are encouraged to walk or cycle instead of traveling by car; to eliminate the creation of dead areas which would encourage crime; to reduce the negative impact on feeder roads; and to assist the elderly, less mobile or those with dementia to engage with the wider community.

5.1.8 Building for Life 12 (BfL12) was designed in 2012 in response to the National Planning Policy Framework's commitment to build more homes and better homes. It describes itself as a *"government-endorsed industry standard for well-designed homes and neighbourhoods. Local communities, local authorities and developers are encouraged to use it to guide discussions about creating good places to live"*.

5.1.9 BfL12 sets out 12 urban design criteria in the form of questions. It gives recommendations of things to consider and recommendations of things to be avoided, and is a very simple framework for assessing developments.

5.2 DESIGN CONSIDERATIONS FOR SAFFRON WALDEN

5.2.1 More recent housing developments in Saffron Walden have not generally been built to the standards proposed by the Essex Design Guide, either in terms of the architectural style of the buildings or of the estate layouts. The image below demonstrates a missed opportunity in development layouts in terms of layouts and porosity (how many ways in or out of the development there are). The policy SW7 provides specific direction and policies on the design of footpaths and layouts.

5.2.3 This development (Tudor Park) on the eastern edge of the town illustrates the problems of a lack of vision at development stage and therefore missed opportunities to encourage sustainable transport modes. It has a single access point for vehicles and pedestrians at the north of the development. There was no provision for a pavement to the west of the development so pedestrians immediately have to cross a busy road to go anywhere. Residents have noted that if pedestrian links had been created to the south, it would be a very quick walk to the nearest supermarket. Instead, they have to walk north up and out of the development, cross Ashdon Road, walk along the pavement to the north of Ashdon road, cross back over Ashdon Road, then walk down Elizabeth Way, and then turn left along Radwinter Road towards the store. Faced with such a journey, many may well choose to take the car instead. Similarly, no link was made to the west of the development, which could have been an opportunity to create a 'quiet route' for pedestrians. The red lines illustrate potential links which could have been made.

5.2.4 As has been identified in the Heritage and Character Assessment, the street scene aesthetic varies throughout the town. The centre of the town has a mix of older architecture from various periods and the Conservation Area designation affords these streets a high degree of protection. Elsewhere the town is characterised by pockets of land which have been developed for housing at different times and in the prevailing styles of the 1920s and onwards.

5.2.5 The SWNP recognises that there is the potential for the more modern developments to evolve in the same way, so that where buildings on a development may currently look very much the same, in future years as renovations and improvements take place, the streets may come to also have what has been described as a “pleasing jumble” of styles of architecture.

5.2.6 To ensure that neighbourhoods remain pleasant places in which to live, infill buildings will be resisted if they have a detrimental impact on the amenities enjoyed by their immediate neighbours, or if they are visually detrimental to the overall street scene.

5.2.7 The SWNP seeks to protect the Conservation Areas from small incremental changes which individually could be overlooked, but which in aggregate can result in a noticeable step-change of appearance. The visual aspect of the older parts of the town has changed many times over the centuries, and now they demonstrate a rich heritage which must be preserved in its current form.

5.2.8 The special character and appearance of the Conservation Areas can be derived from many different aspects including the scale, style and materials of the buildings, the historic street pattern, street frontages and building lines, boundary structures, street furniture, trees and open spaces. Consideration must be given to the form of new or replacement street furniture within the Conservation Areas. For example, new or replacement street lighting must match the existing styles.

5.2.9 Any development which includes more than ten dwellings is considered by the SWNP to be substantial relative to the size of the town and has the potential to have a considerable impact on the overall aesthetics of the town. It must make a positive contribution to the town’s architectural vernacular.

5.2.10 The SWNP notes that of the 356 households on the Uttlesford housing waiting list for Saffron Walden as at 2018, 33% are over 60³⁶. The Uttlesford Viability Study June 2019 concludes that land values in Saffron Walden are such that accessible and adaptable homes may be built without impact on viability.

5.2.11 Gated communities are contrary to the objective of retaining a sense of town-wide community spirit and they restrict pedestrians and cyclists from using ‘quiet routes’.

5.2.12 Having an adequate amount of home living space is vital and the Nationally Described Space Standards set out what is considered as a reasonable minimum for a good standard of living. Adoption of the Space Standards is appropriate for Saffron Walden, which, as a small market town, naturally doesn’t have the same level of public indoor leisure spaces that larger towns have, such as shopping malls and cinemas.

³⁶ Data provided by UDC

5.2.13 Saffron Walden has a lack of public parks, with many housing developments being further away from public open space than the Fields in Trust guidelines³⁷. In the absence of the ready availability of public parks and gardens, private gardens gain extra importance for the health and well-being of residents.

5.2.14 The demonstration of a design-led approach will be in the Design and Access Statement (in the case of developments of 10 dwellings or more) or in the Design Statement (in the case of developments of under 10 dwellings).

5.2.15 Approximately one in three people will suffer from dementia and Dementiastatistics.org estimates that the annual cost to the UK of dementia is £26 billion, and this is expected to rise to £55bn by 2040³⁸. The symptoms of dementia include difficulties in thinking, with memory loss, and using language.

5.2.16 The difficulties experienced by people with dementia and their carers can be reduced when their surroundings are not confusing. The Royal Town Planning Institute's 2017 publication *Dementia and Town Planning* describes six broad urban planning principles which, if considered throughout the design process, help to reduce confusion.

5.2.17 These planning principles have been endorsed by the Alzheimer's Society and the Essex Design Guide. Additionally, the Royal Town Planning Institute notes that following these six principles makes urban design and layouts more pleasant for everyone, and not just for people with dementia and their carers.

5.2.18 Saffron Walden has the aim of becoming a "dementia-friendly" town, and the SWNP works towards this objective by ensuring that all urban design changes, whether domestic or commercial, acknowledge and respond to the six planning principles to create an environment which is:

- **Familiar** - functions of places and buildings are obvious, any changes are small scale and incremental;
- **Legible** - a hierarchy of street types, which are short and fairly narrow. Clear signs at decision points;
- **Distinctive** - a variety of landmarks, with architectural features in a variety of styles and materials. There is a variety of practical features, e.g. trees and street furniture;
- **Accessible** - land uses are mixed with shops and services within a 5-10-minute walk from housing. Entrances to places are obvious and easy to use and conform to disabled access regulations;

³⁷ Amenity green space should be available 480m from dwellings, parks and gardens 710m, and natural and semi-natural green space 720m

³⁸ <https://www.dementiastatistics.org/statistics/cost-and-projections-in-the-uk-and-globally/>

- **Comfortable** - open space is well defined with toilets, seating, shelter and good lighting. Background and traffic noise should be minimised through planting and fencing. Street clutter is minimal so as to not impede walking or distract attention; and
- **Safe** - footpaths are wide, flat and non-slip, development is orientated to avoid creating dark shadows or bright glare.

POLICY SW7 DESIGN

1. All development in Saffron Walden must contribute positively to the parish's sense of place through a design-led approach underpinned by good design principles and reflecting a thorough site appraisal, and must comply with the other detailed policies.
2. Following the Design and Access Statement or Design Statement will be a condition of approval of outline planning applications.
3. All planning applications for development with the potential to impact on the Conservation Areas and/or heritage assets including listed buildings will be accompanied by a Heritage Statement that describes the significance of the Conservation Area and/or heritage assets and assesses the impact of the development. This includes planning applications outside the Conservation Areas but which will impact on any of the Conservation Areas and/or heritage asset for example because of the generation of additional traffic or the impact on views.
4. Developments and extensions of buildings and spaces must demonstrate that they:
 - a) Display a high level of architectural quality which responds positively to the best of Saffron Walden's context;
 - b) Evidence a positive response to the landscape, local and longer views and the natural and historic environments;
 - c) Integrate well with existing neighbourhoods while seeking, where appropriate, to improve the aesthetic of the immediate area;
 - d) Refer to Secured by Design principles to reduce crime and encourage safer communities;
 - e) Create well connected and accessible new streets which provide for a rich choice of routes, prioritising active and sustainable travel. In the case of doubt on this matter the Essex Design Guide or any other locally applicable design guide will be referred to for best practice;
 - f) Have active frontages, particularly at street level, and provide a clear distinction between areas of public and private realm;

Continued on next page

Policy SW7 Building Design

- g) Respond to and enhance the amenity value of an area through consideration of matters such as overlooking, natural light, micro-climate, outlook and amenity space, both for existing neighbours and future residents; and
 - h) Meet the nationally described space standards [Department for Communities and Local Government, Technical Housing Standards, March 2015 (Updated May 2016 and as may be updated in the future)].
5. Infill development will be supported subject to it meeting the following criteria:
- a) Maintains a high level of amenity for occupiers of surrounding properties and provides for high levels of amenity for future occupiers of the proposed development, particularly in terms of noise, privacy, overshadowing and access to daylight;
 - b) Respects the existing street scene;
 - c) Reflects prevailing boundary treatments;
 - d) Provides adequate parking, bin storage and access arrangements; and
 - e) Preserves and enhances Saffron Walden's heritage assets and their setting
6. Any developments which have a relatively large footprint (including car parking facilities) in the scale and context of Saffron Walden will have their impact minimised through appropriately detailed frontages that wrap around the unit.
7. While all residential schemes must contribute positively to the quality of Saffron Walden as a place, any developments of more than 10 dwellings will demonstrate how a scheme does this through a completed Building for Life 12 assessment.
8. Development sites of more than 30 dwellings, or any development in a Conservation Area, or in a sensitive setting, will be subject to an independent design review. The nature of the design review will be appropriate to the scale of the development.
9. Gated communities will not be permitted except in cases where the housing caters for groups of people classed as "vulnerable".

Continued on next page

Policy SW7 Building Design

10. To improve the legibility of street layouts, and wayfinding: streets with spurs will have separate names for the spurs; street numbering will follow a logical pattern; and streets will be named at each corner.
11. Three-storey housing will be acceptable, other than in settlement edge locations, and subject to the building height and form respecting and complementing the buildings and landscape in the immediate vicinity. Buildings higher than this would not normally be supported unless the surrounding buildings and context make them appropriate.
12. Garden and outdoor spaces must conform to the Essex Design Guide guidelines.
13. Street furniture, including lighting, must be designed to be sympathetic to its surroundings, and where possible to propose an improvement to the aesthetics of the area.
14. Article 4 Directions may be sought where appropriate to preserve the historic fabric of the town.

This policy supports the Neighbourhood Plan Objectives 1,2,3,4,5

5.3 PARKING DESIGN ON NEW DEVELOPMENTS

5.3.1 Car ownership across Uttlesford is higher than the national average, reflecting its rural location and limited public transport network. At the Census in 2011 83% of households in Saffron Walden reported ownership of at least one car or van, compared to 75% of households across England as a whole. In Saffron Walden 78% of travel to work is by private car.

5.3.2 The 2005 Local Plan states *“Uttlesford communities lack high quality public transport. In common with many other rural communities, using the car is the only practical way of getting to work, accessing services and making leisure trips. Car ownership levels are relatively high and existing car parking provision is well used. It is important that car parking for new development is adequate. Where there is a lack of off-street parking on older residential areas this results in a high level of on street parking. In some localities this results in obstruction of roads and footpaths, causing particular problems for those with limited mobility. The level of parking on new developments should neither exacerbate existing parking problems in communities nor create problems where they do not presently exist.”* There is

evidence that this is still the case, and car parking availability remains a contentious issue in the town³⁹.

5.3.3 Bus services in Saffron Walden are limited, with many services finishing mid-afternoon, so are not useful for commuters. They are even more limited on Saturdays and on Sundays there are no buses at all. Buses in Uttlesford are difficult to run as a commercial venture and therefore are largely subsidised. Services tend to run close to the point where the subsidy per passenger is at the limit of viability. Essex County Council funds are under pressure, and bus provision is not a statutory requirement, making it an obvious place for cost savings. Bus services are not forecast to increase in Saffron Walden and the use of private vehicles is not forecast to decline.

5.3.4 Saffron Walden residents tend to rely on the private car to access other services and facilities:

Healthcare: Saffron Walden has two doctors' surgeries, but one is on two sites, with one of the sites being in Great Chesterford, some 4.5 miles away and only accessible by car. Saffron Walden retains its community hospital which offers some specialised outpatient appointments, for example x-rays and audiology, and has geriatric in-patient wards. For more general round the clock healthcare, for example walk-in health care, A&E, maternity, surgery and general wards, Saffron Walden residents must travel to Cambridge.

Food shopping: Saffron Walden town centre has a mid-sized Waitrose. On the edge of the town to the east is a mid-sized Tesco store which also has a petrol station, and there is an Aldi on the edge of town to the south. The nearest supermarket in "superstore" format (including clothing and home goods) is 12 miles away in Haverhill.

5.3.5 Despite hopes that private car ownership and use will reduce over time, the SWNP must take a pragmatic approach to the reality that any change will not be immediate. Higher needs for private vehicles and long distances travelled by commuters will make initiatives such as car sharing clubs, for example, less immediately feasible in market towns and rural locations.

5.3.6 For the timescale of the SWNP, it is assumed that private vehicle use will remain more or less at current levels, and policies on parking reflect this.

5.3.7 It is anticipated that any surplus parking spaces generated by the policies below will be regularly used by delivery vehicles.

5.3.8 Good parking design is therefore an important part of urban planning in Saffron Walden. Poor design can very much detract from the overall street scene, whereas good design can promote the sense of the neighbourhood as a friendly space. Alongside the *Essex*

³⁹ For example, the 2019 campaign by residents of Museum Street to obtain additional residents' parking spaces, after 19 resident permits were issued for 6 spaces.

Design Guide, the Essex Works Publication *Parking Standards Design and Good Practice September 2009* sets out standards and examples of layouts which work well, and which are supported by the SWNP.

5.3.9 Tandem parking (where cars are parked one behind the other) is to be discouraged where the street layout might in reality encourage on-street parking instead for convenience. Where on-street parking is not possible, tandem parking works well.

5.3.10 Ownership of electric vehicles will increase throughout the plan period and beyond and housing must be designed with charging requirements in mind. Thus, all developments must provide either actual electric charging points or the ducting for future charging points, so as to avoid expensive and disruptive retrospective installation.

5.3.11 Bicycle parking needs to be secure and covered to encourage people to use bicycles regularly. High density developments characterised by smaller footprints and small storage space will not have enough space for bicycles to be stored within the home.

5.3.12 Delivery vehicles on tight time schedules and taxis dropping off or picking up passengers will always need to park as close as possible to the destination dwelling. The street layout of new developments should not be so narrow that these temporary vehicle parking manoeuvres block the whole street.

POLICY SW8 PARKING ON NEW DEVELOPMENTS

1. All new developments must provide for parking spaces for residents and visitors as per the Essex Works publication *Parking Standards Design and Good Practice September 2009* or later equivalent.
2. All new developments will demonstrate how they refer to the Essex Design Guide 2018, or later equivalent for layout of vehicle and cycle parking spaces.
3. All dwellings will include electric vehicle (EV) charging points, and the following provision is the minimum:
 - For dwellings with driveways, one EV charging point per house;
 - For dwellings with parking courts, half of the spaces in the parking court to have EV charging points; and
 - For commercial developments, EV charging points to be provided at 2% of the total parking spaces.

This policy supports the Neighbourhood Plan Objectives 2,3,4,5

5.4 ENERGY EFFICIENT AND ENVIRONMENTALLY SUSTAINABLE DESIGN

5.4.1 13% of UK emissions come from our homes, and the emissions created by heating our homes and businesses account for almost a third of UK emissions. The Climate Change Act passed in 2008 committed the UK to reducing greenhouse gas emissions by at least 80% by 2050, compared to 1990 levels.⁴⁰ The Government has since then stated an ambition that the UK will be carbon neutral by 2050. At the time of writing the SWNP this has not been backed up by legislation which might, for example, enforce zero carbon emission building standards, except in London. It is expected that this will be rolled out across the UK during the SWNP period.

5.4.2 Energy efficient design is a thoughtful process which helps a home use less energy for heating and cooling. An example is the Passive House (or Passivhaus) standard, in which buildings use very little or no energy. Energy efficient houses can be built in a wide variety of ways, as appropriate to the materials and the location.

5.4.3 Renewable energy is generated from continually self-replenishing natural resources. Households and developments can install renewable technology or micro generation / low carbon technology to generate their own energy, as an alternative to buying all their energy from suppliers. Larger developments would benefit from on-site energy generation.

5.4.5 It is likely that in the future more widespread energy efficient design and increasing implementation of renewable energy will provide residents with sustainable low running cost and low carbon impact homes. When starting a new building from scratch, or extending or adapting an existing building, the greatest results will be achieved through consideration of the following factors in this particular order:

- Design optimisation (e.g. considering how best to orient the building, where to place windows or provide shade)
- Fabric improvement (e.g. building in the most effective insulation)
- Installation of renewable energy sources (e.g solar panels)

This is known as the Energy Hierarchy.

5.4.6 Water resources in the whole of Uttlesford are stressed and planned development will put additional pressure on an already limited supply. The April 2018 Uttlesford District Water Cycle Study describes this and sets out the need for robust policies on water conservation as follows: *“The Uttlesford District is partly underlain by a chalk aquifer of regional importance and the Environment Agency currently class the surface water and groundwater resources within the District as over-licensed or over-abstracted, meaning that there is no additional water available for supply. This highlights the importance of further*

⁴⁰ HM Government: The Clean Growth Strategy – Leading the way to a low carbon future

developing policies to encourage the conservation of water in new and existing dwellings and commercial properties.” (Paragraph 1.1)

5.4.7 The Government’s Planning Practice Guidance allows latitude for local plans to set local requirements for environmental sustainability targets, subject to the development schemes remaining financially viable. Neighbourhood plans are not allowed to set higher energy efficient standards than the Local Plan. Nonetheless the SWNP sets out a non-binding policy on construction standards viewed as desirable and which will be binding if and when permitted.

POLICY SW9 ENERGY EFFICIENT AND SUSTAINABLE DESIGN

The following standards are known to be best practice at the time of writing.

Where new development or building extensions or conversions is deemed to be acceptable following other policies in the SWNP, design and construction to these standards is strongly encouraged:

1. Development proposals are encouraged to demonstrate how they have implemented the principles and requirements set out below, unless the proposal is for non-residential development of 1000m² or more and it achieves a BREEAM Outstanding rating. All development proposals are encouraged to meet paragraph 9, below.
2. Land and building should be reused wherever feasible, and where local character and distinctiveness can be enhanced by so doing.
3. Materials arising through demolition and refurbishment, including excavated soil and hardcore, should wherever possible be reused and recycled within the site.
4. Development is encouraged to prioritise the use of materials and construction techniques that have smaller ecological and carbon footprints, help to sustain or create good air quality, and improve resilience to a changing climate where appropriate.
5. Where technically feasible, green roofs and/or walls should be incorporated into the building to improve water management, provide space for biodiversity and aid resilience and adaptation to climate change.
6. The lifecycle of buildings and public spaces should be considered, including how they can be adapted and modified to meet the changing social and economic needs and how materials can be recycled at the end of their lifetime.

Policy SW9 Energy Efficient and Sustainable Design

7. Adequate and well-designed space should be provided to encourage greater levels of recycling of domestic and commercial waste.
8. The Energy Hierarchy should be implemented within the design of new buildings, by prioritising fabric first, passive design and landscaping measures to minimise energy demand for heating, lighting and cooling.
9. Development proposals are encouraged to demonstrate, for example through an Energy and Climate Statement, that they will achieve the following:
 - a) A 19% carbon reduction improvement upon the requirements within Building Regulations Approved Document Part L 2013, or achieve any higher standard than this that is required under subsequent national planning policy or Building Regulations;
 - b) Provision of on-site renewable energy generation, or, should it become available, connection to a renewable or low carbon community energy scheme, that contributes to a further 20% reduction in the residual carbon emissions subsequent to (a) above.
 - c) Calculate Indoor Air Quality and Overheating Risk performance for proposed new dwellings, and implement a recognised quality regime that ensures that the 'as built' performance matches this calculation.
10. All newly constructed buildings are encouraged to achieve an estimated water consumption of no more than 110 litres/person/day.
11. Water reuse and recycling and rainwater harvesting should also be incorporated wherever feasible to reduce demand on mains water supply.
12. Community energy schemes will be supported, subject to the design and location being sensitive to local built and natural landscapes and environment.
13. To future-proof the SWNP: If or when the Local Plan, or national planning practice guidance or Building Regulations supersedes these provisions with higher standards or newer technologies, or permits them to be required, development will be required to meet the higher standards and/or use the newer technologies.

This policy supports the Neighbourhood Plan Objectives 2,3

5.5 ACCESSIBLE AND ADAPTABLE HOMES

5.5.1 Saffron Walden, like all communities, will need to consider and address the needs of the ageing population. These needs will be addressed through provision of infrastructure and the 'right kind' of urban design which will ensure social inclusion and maintain the safety of individuals as they age.

5.5.2 The NHS regularly publishes statistics on the numbers of in-patients who are medically fit to be released from hospital, but who cannot be because their homes are not suitable for their recovery process. This unnecessary use of NHS hospital beds carries a huge cost to society.

5.5.3 Care homes provide high levels of care, but are expensive to run. Many elderly people will be able to remain in their own homes if the homes are adequately designed for them to do so. This will reduce the financial pressure and capacity issues in the care sector.

5.5.4 Research and recommendations from the Homes and Communities agency "Housing our Ageing Population: Panel for Innovation (HAPPI)", published in 2009 makes a number of recommendations. It calls upon a wide range of stakeholders to collaborate to improve living standards, one of the stakeholders being planning bodies. Vera Bolter MBE, a panel member, says *"we need to encourage people to think ahead, and work to raise expectations. Unless you have a vision about how things could be, you will be confined by what is available now."*

5.5.6 The recommendations from HAPPI broadly cover two fields. One is the way that housing design can actively promote wellbeing through its structure and fabric. The HAPPI recommendations include ten components of design for housing, many of which, being best practice for any design, are covered by other policies in the SWNP.

5.5.7 The other HAPPI recommendation is the use of technology to improve lifestyles: Building management environmental systems and person-centred equipment, which perform monitoring, information and security functions through 'telecare' and assistive technologies, help to manage thermal comfort and support independence. 'Care-ready homes' will have provision for the highest standards of connectivity so that as these technologies come forward they can be easily adopted by residents.

5.5.8 Provision of the highest standards of connectivity in all homes will benefit all residents, not exclusively the elderly. They will also benefit people working from home, and children and students will be able to make best use of emerging technologies to learn and develop their skills, ensuring that the next generation is well positioned to make the most of the new economy and future jobs market. Policies on connectivity are covered in Policy SW18.

5.5.9 Building Regulations include optional requirements as follows:

- M4(2) is met where a new dwelling makes reasonable provision for most people to access the dwelling and incorporates features that make it potentially suitable for a wide range of occupants, including older people, those with reduced mobility and some wheelchair users.
- M4(3) is met where a new dwelling makes reasonable provision, either at completion or at a point following completion, for a wheelchair user to live in the dwelling and use any associated private outdoor space, parking and communal facilities that may be provided for the use of the occupants.⁴¹

5.5.10 The Government's Planning Practice Guidance allows latitude for local plans to set local requirements for accessible and adaptable homes, subject to the development schemes remaining financially viable. Neighbourhood plans are not allowed to set higher standards than the Local Plan. Nonetheless the SWNP sets out a non-binding policy on accessibility standards viewed as desirable and which will be binding if and when permitted.

⁴¹ The Building Regulations 2010: *Access to and use of buildings M.*

POLICY SW10 ACCESSIBLE AND ADAPTABLE HOMES

1. Self-contained ground floor accommodation will be included on developments of over 10 dwellings.
2. Housing designed specifically for older people should demonstrate that they are designed in accordance with HAPPI principles.
3. On developments of more than 10 dwellings, all housing (market and affordable) should meet the Building Regulations Requirement M4(2): Category 2 (Accessible and Adaptable dwellings).
4. On developments of more than 10 dwellings, 10% of market housing and 15% of affordable housing should be required to meet Category 3 M4(3) Wheelchair user dwellings.
5. To future-proof the SWNP: If or when the Local Plan, national planning practice guidance or Building Regulations, supersedes these provisions with higher standards or newer technologies, or permits them to be required, development will be required to meet the higher standards and/or use the newer technologies.
6. Where an open book assessment of viability concludes that policies on accessible and adaptable homes may not be applied, careful consideration will be given to the overall scheme and the scheme should be refused unless it strongly meets all the other objectives in the SWNP.

This policy supports the Neighbourhood Plan Objectives 1,2,5

6. COMMERCIAL PREMISES

6.1 OVERVIEW OF PROVISION

6.1.1 The town centre of Saffron Walden provides a range of services to an extensive rural catchment area. The town provides vital facilities for the Uttlesford District such as schools, health services and nearly all the local area's food shopping needs.

OFFICE SPACE

6.1.2 Having assessed office space provision in Saffron Walden, the eLP states that (Paragraph 5.25) *"There is an acute lack of modern office accommodation to meet the needs of Saffron Walden. Potential sites in and around the town are limited and rental values may mean development is not viable"*.

INDUSTRIAL PREMISES

6.1.3 The main industrial area of Shire Hill is just one mile from the town centre and therefore within walking distance of all of the housing areas. Other smaller industrial areas are also within walking distance of the housing. On the east side of the town is Ridgeon's, a builders' merchant, and the south of the town has a new development which will host several big-box retailers. Regarding industrial space, the eLP notes in Paragraph 5.25 *"There is a current surplus of industrial and particularly warehouse units in Saffron Walden, partly as a result of the recession and partly because of the difficulty of access to the M11."*

RETAIL OFFER

6.1.4 A fine example of a vibrant market town, Saffron Walden town centre hosts over 200 independent shops, restaurants and cafés, together with many well-known national retailers, cafés and restaurants. The market on Tuesdays and Saturdays draws locals and visitors to the town. The town has three mid-sized supermarkets (Tesco, Waitrose and Aldi) and several smaller convenience size stores.

6.1.5 The District Council commissioned a retail study by Savills as background evidence for the Local Plan. The study, updated in May 2018, forecasts the following needs to have arisen by 2026:

- an additional mid-sized convenience store; and
- an additional 5,370m² retail space for comparison shopping (non-food).

These numbers are additional to the recently developed out of town retail space at Knight retail park. The retail study update assumes that the existing towns and villages will accommodate all of the retail requirements of the garden villages and that the garden villages do not have their own retail provision. This may change, and indeed, for the garden villages

to be sustainable it will need to. It is not clear therefore that there is a need in Saffron Walden for additional convenience retail space and no sites are identified in the eLP.

6.1.6 The Uttlesford Retail Study Update notes that the centre of Saffron Walden, which accommodates much of the existing comparison floorspace in the district, is characterised by old, historic fabric, many listed buildings and embraced by Conservation Areas. It further notes that the ability of such units to increase their efficiency is considered to be very limited. Therefore, opportunities to create modern retail space within the town centre should be seized.

VISITOR ATTRACTIONS

6.1.7 The town has many old buildings and two public gardens that are tourist attractions, as well as Saffron Hall concert hall, Saffron Screen, Saffron Walden Museum, and the Fry Gallery. Audley End House which is maintained by English Heritage, and Audley End Mini railway, are nationally significant visitor attractions and are within two miles of the town centre. The One Minet skate park attracts people from a very wide area and regularly hosts competitions.

6.1.8 Ongoing projects by the Tourist Information Office and business groups encourage tourists to visit the town. The 200,000 visitors per year to Audley End House, and the many hundreds of thousands of annual visitors to Cambridge have been identified as potential additional consumers for Saffron Walden's retail and hospitality businesses. Spending by additional tourists may help to offset the increasing appeal of online shopping which has been identified as a general threat to bricks and mortar retailers everywhere.

6.1.9 A Premier Inn hotel has been granted planning permission.

6.2 COMMERCIAL OBJECTIVES

6.2.1 The economic objective of the SWNP is for Saffron Walden to be economically active and as self-sustaining as possible. It must be desirable for residents and tourists to visit, shop and work in, without inappropriate development detracting from the historic and commercial appeal of the town.

6.2.2 In order to achieve this objective, and assessing current provision and use of commercial spaces, the SWNP identifies the following priorities:

- To promote the development of a widespread range of commercial use classes, including retail premises and hot food dining-in establishments in the town centre that enhance the appeal of the town to residents and visitors;
- To support initiatives that increase footfall in the town, including tourism that generates income;

- To encourage development of facilities for new start-up businesses; and
- To support proposals that enhance the attractiveness and competitiveness of commercial units, both in use and vacant, for existing and new businesses.

6.2.3 In April 2019, the Gambling Commission launched the new National Strategy to Reduce Gambling Harms⁴². The future prevention plan foresees a range of universal measures which will protect the whole population, including placing “*regulatory requirements/restrictions on product, place and provider*”. The Gambling Commission Report “*Gambling participation in 2018: behaviour, awareness and attitudes*” of 2018 found that 79% of respondents “*were of the view there are too many opportunities to gamble nowadays*” and “*71% considered gambling is dangerous for family life*”. Saffron Walden has two gambling operators, and the SWNP is not supportive of planning permission being granted for additional operators.

6.2.4 Hot food takeaway premises sit in a planning category which would include all kinds of food once permission is granted. In assessing planning applications for additional hot food takeaways, consideration will be given to the likely impact on local amenity and public health.

6.3 CHANGE OF CLASS FOR COMMERCIAL SPACES

6.3.1 The retail environment of Saffron Walden represents both an asset and an opportunity to the town. The town centre of Saffron Walden is categorised as either Primary Frontage or Secondary Frontage and is mapped below. This map broadly reflects the map included in the eLP⁴³. The SWNP map differs by defining the High Street as Primary Retail Frontage and not Secondary Retail Frontage, in order to protect the retailers already located on the High Street and to prevent this street from being eroded away from the retail core of the town.

⁴² <http://www.reducinggamblingharms.org/>

⁴³ <http://udc.maps.arcgis.com/apps/webappviewer/index.html?id=7cc9bd5aef43445bbbf6c454741364a7>

6.3.2 Main town centre uses are defined by the NPPF as including: retail development; leisure; entertainment and more intensive sport and recreation uses; offices; and arts, cultural and tourism development.

6.3.3 The map above defines the core of the town centre, and the primary and secondary frontages within the core⁴⁴. Primary frontages are the retail core of the town and this is where the majority of the footfall occurs. The retail core of the town must be protected as incremental changes away from retail use within these streets would gradually reduce footfall, making remaining retail units less viable. Secondary frontages can include a higher mix of town centre but non-retail use.

6.3.4 In efforts to promote housebuilding, as well as to bring vitality to town centres where it is lacking, the NPPF encourages a mix of residential and commercial use within town centres. This NPPF policy may be most relevant to, and helpful for the rejuvenation of, the centres of large (and possibly post-industrial) towns which are combating decline. In contrast the small market town of Saffron Walden has a compact and busy town centre, immediately bounded on all sides by housing. Additional housing at ground floor level within the town

⁴⁴ The map is based on the UDC eLP town centre map, with slight increase of primary frontage and decrease of secondary frontage, where this can be justified by current uses at the time of writing the SWNP. The outline showing the footprint of the town centre is identical.

centre would be detrimental to footfall and will not be supported, while housing will generally be supported on first and higher floors. However, applications for residential development on first floors will need to be carefully assessed, particularly where the footprint of the store below is small. Many stores require the first floor for storage and office space, and removing this may in turn make the store on the ground floor unviable.

6.3.5 Town centre use of space should not decline in provision, as once lost it is hard, if not impossible, to return a domestic dwelling into commercial space, and keeping an interesting town centre for residents and visitors is key to the economic survival of Saffron Walden. Article 4 Directions will be sought to support the policy on town centre uses.

6.3.6 Consideration must always be given to the concept that the town centre is first a commercial centre, and commercial ventures that are in line with the objectives of the SWNP will be supported. For example, visitors to Saffron Walden who come for Audley End House or Bridge End Gardens may be persuaded to turn a day trip into a weekend if the evening economy offers restaurants. Residential development in suitable locations will attract people who value having an evening economy on their doorstep. The 'agent of change' principle is described in paragraph 182 of the NPPF: *"existing businesses and facilities should not have unreasonable restrictions placed on them as a result of development permitted after they were established. Where the operation of an existing business or community facility could have a significant adverse effect on new development (including changes of use) in its vicinity, the applicant (or 'agent of change') should be required to provide suitable mitigation before the development has been completed."* Application of the agent of change principle ensures the continuing viability of commercial premises, particularly those that serve the hospitality economy. Similarly, local residents' objections to new premises applications in the town centre, for example, should be considered carefully against the wider potential benefits of the proposed new business.

6.3.7 In order to protect the vibrancy of town centres, the NPPF instructs planners to use a 'town centre first' hierarchy when allocating uses for sites. This means that the first choice for new retail space should always be in the town centre. Should space not be available, the next choice should be the edge of the centre. Allocating and building retail sites in out of town locations should be seen as a last resort.

PLANNING CLASSES

6.3.8 Property is categorised by planning use class, as set out in the table below.

Class	Use	*Main Town Centre uses as per NPPF
A1	Shops and retail outlets	*
A2	Professional and financial services	*
A3	Food and drink	*
A4	Drinking establishments	*
A5	Hot food and takeaway	*
B1	Business offices	*
B2-B8	Industrial	
C1	Hotels	
C2	Residential – specific residents e.g. care homes	
C3	Residential – dwelling house	
C4	Residential – houses in multiple occupation	
D1	Non-residential institutions, including health, education, museums, libraries, places of public worship	*
D2	Entertainment and leisure	*
Sui Generis	Uses which do not fall into any of the other categories.	

POLICY SW11 TOWN CENTRE USES

1. The following policies do not apply to the 17 Market Hill & 29-31 Church Street (part of the old Sun Inn) Grade I listed building, which has its own policy.
2. Along Primary shopping frontages as identified on the map *Saffron Walden Town Centre* at paragraph 6.3.1:
 - i) Change of use of the ground floor from A1 to NPPF-defined ground floor main town centre uses will only be permitted if the applicant is able to demonstrate that the unit is not viable as an A1 shop use. The non-viability of the A1 unit would need to be proven by marketing and an independent assessment in accordance with the requirements set out by Uttlesford District Council; and
 - ii) Change of use of the ground floor from NPPF-defined ground floor main town centre uses to uses falling outside that definition will only be permitted if the applicant is able to demonstrate that the unit is not viable as a main town centre use. The non-viability of the unit would need to be proven by marketing and an independent assessment in accordance with the requirements set out by Uttlesford District Council
3. Along Secondary shopping frontages as identified on the map *Saffron Walden Town Centre*:
 - i) Change of use of A1 shop units to NPPF-defined main town centre uses of retail, leisure, office and other main town centre uses will be permitted; and
 - ii) The change from NPPF-defined main town centre ground floor uses to uses falling outside that definition will only be permitted if the applicant is able to demonstrate that the unit is not viable as a main town centre use. The non-viability of the unit would need to be proven by marketing and an independent assessment in accordance with the requirements set out by Uttlesford District Council.

Continued on next page

Policy SW11 continued

4. Where it will not compromise the ability of local ground floor businesses to remain viable, along both Primary and Secondary shopping frontages change of use to residential will be permitted on upper floors.
5. Proposals for C1 hotels will be supported subject to the policy on building design.
6. The 'agent of change' principle applies to all conversions to residential (C) class uses.
7. No more than two gambling operators may be licensed in Saffron Walden at any one time.
8. Planning applications for additional hot food takeaway establishments will be subject to considerations of impact on local amenity and public health.

This policy supports the Neighbourhood Plan Objectives 1,4,5

6.3.9 Whilst welcoming the 'town centre first' objective of the NPPF, the SWNP makes an exception to this rule for convenience stores which may be built in residential areas. By providing everyday essentials locally to where people live, these shops can be a lifeline to the elderly and less mobile and can help to reduce traffic.

POLICY SW12 CONVENIENCE STORES IN RESIDENTIAL NEIGHBOURHOODS

1. Proposals for convenience stores integrated into residential neighbourhoods will be supported subject to the following:
 - a) They will not undermine the viability or vitality of the town centre;
 - b) They are located and designed to encourage access on foot or by bicycle, or near to a bus stop; and
 - c) They will not exacerbate traffic levels in the neighbourhood.

This policy supports the Neighbourhood Plan Objectives 1,4,5

6.3.10 17 Market Hill & 29-31 Church Street (The Old Sun Inn) is a Grade I listed building and is particularly special to the town centre. Any usage of the building must be respectful of the delicate fabric of the structure, and therefore the building has its own policy. Without setting a definitive list of uses it is appropriate to consider the impacts of each use, and the policy gives guidelines for consideration.

Photo reproduced from UDC website

POLICY SW13 17 MARKET HILL & 29-31 CHURCH STREET

In assessing potential suitable uses that are compatible with the historic nature of the building (part of the old Sun Inn), the following considerations must be borne in mind:

- The need to minimise harmful or intrusive intervention, for example, a preference for occupants that use freestanding fittings, pose a low fire risk and do not rely on messy activities (such as heavy use of water internally).
- Compatibility between ground floor and first floor activities, for example, avoiding uses at street level that could adversely affect first floor residential occupation (by being noisy, smelly or unsociable).

This policy supports the Neighbourhood Plan Objectives 1,4,5

6.4 SHOPFRONT DESIGN

6.4.1 Saffron Walden's town centre lies within a Conservation Area, and a great part of Saffron Walden's appeal lies in its visual charm. A balance must be sought between accepting change and innovation, while retaining the character and grain of the historic environment.

POLICY SW14 SHOPFRONT DESIGN

1. Alteration, reinstatement or enhancement to historic shopfronts and other shop fronts will not be supported unless they:
 - a) contribute positively to the character and distinctiveness of Saffron Walden's historic environment; and
 - b) are of a high quality of visual design, are of an appropriate scale and proportion, and use appropriate materials and detailing.
2. Uttlesford District Council sets out guidance for shopfront design in its emerging Shopfront Design Guide, and (1) above should be read in conjunction with this document, or its successor.

This policy supports the Neighbourhood Plan Objectives 1,4,5

6.5 DEVELOPMENT AND RENOVATION OF COMMERCIAL SPACES

6.5.1 The SWNP would like to encourage the provision of modern office space which would be attractive to start-ups wishing to benefit from the proximity to London and Cambridge. It recognises that industrial premises which require large volumes of space are unlikely to be attracted to Saffron Walden because of the distance from the M11 and the high value of land, although it is hoped that specialised manufacturing may be encouraged to stay and grow.

6.5.2 Many of the offices in the town centre are above shops in buildings with small footprints. Most of the buildings are old and many are listed, as is demonstrated in the map below (green dot is Grade II, yellow is Grade II* and red is Grade I). The challenges of converting these to modern office spaces are considerable, and ten have been converted to residential spaces between 2016 and 2019, with further conversions in the pipeline. Any opportunity to renovate additional spaces for commercial use would be of benefit to the town and would be welcomed.

OS PSMA LICENSE NUMBER: 0100057521

6.5.3 The eLP identifies six sites for commercial development:

Site	Use Class in eLP	Permission Granted as of publication of SWNP
Reg 19 Policy SAF 11 Land North of Ashdon Road 4.25 Hectares	Business, General Industrial and storage and distribution uses (use classes B1, B2 and/or B8) and other ancillary employment creating uses	Yes: UTT/13/2423/OP Permission granted for B1, B2 and/or B8, A3, A4 and C1
Reg 19 Policy SAF 12 Land South of Ashdon Road 1 Hectare	B1	No
Reg 19 Policy SAF 13 Land at Thaxted Road 1 Hectare	Mixed uses, including retail, retail warehousing and leisure uses	YES: UTT/13/0268/FUL
Reg 19 Policy SAF 14 (1) The Fire Station/Saffron Walden Laundry (0.2 HA) (2) Emson Close/Rose and Crown Walk and car parks to the rear of Boots and Saffron Building Society (0.5HA) (3) 56 High Street (0.09 HA)	Town Centre Uses	No

6.5.4 The SWNP notes the inconsistency between permission granted for site SAF11 and the uses listed in the eLP. The more the use classes are limited, the harder it would be for the developer to make use of the site. Therefore, the SWNP supports the uses as the permissions granted, and not the narrower list of classes in the eLP.

6.5.5 56 High Street, referenced in eLP Policy SAF14, currently has the Scout Hall on the site. Development of this site will cause the loss of the Scout Hall and this will then need to be replaced elsewhere.

6.5.6 Saffron Walden needs all of these sites to be safeguarded for commercial use, in order to support employment and local services for the growing population of the town.

6.5.7 Any new planning applications for sites not in these allocated sites will necessarily refer to Paragraphs 86-87 of the NPPF which sets out sequential tests for locations.

6.5.8 Saffron Walden has high land values because of the attractiveness of the area for residential use. The town is relatively inaccessible to major national artery roads, with most locations necessitating routes through the town centre. For these reasons, Saffron Walden will not attract businesses with heavy industrial requirements.

6.5.9 For inward light industry and office space investment, Saffron Walden must compete with other locations in the region which offer modern and attractive space.

6.5.10 The eLP site allocation SAF14 covers three re-development sites:

- 56 High Street (outline on left), and the fire station / Saffron Walden laundry (outline on right)

Map reproduced from eLP

- Emson Close and Rose and Crown Walk

Map reproduced from eLP

6.5.11 SAF14 at 56 High Street could be considered in conjunction with the development of George Street, as follows:

OS PSMA LICENSE NUMBER: 0100057521

This photo shows the back of the buildings 16-18 George Street and illustrate the opportunity for regeneration.

Photo taken by SWNP

6.5.12 SAF 14 / 56 High Street, with or without the additional areas indicated above, sits on the primary shop frontage zone of the town centre. The eLP says that the District Council will support development and redevelopment opportunities for town centre uses. There is an opportunity to develop these areas into larger and more modern footprint retail units and modern office space on the first floor. This site would ideally be developed as a complete parcel because the alternative of breaking it up into small parcels could prevent the creation of larger footprint retail units and office space. There is a Scout Hall to the rear of 56 High Street, as an addition to eLP Policy SAF14, and to ensure that community use is not lost to new development, proposals to develop the site at 56 High Street must not be allowed until an equivalent or better scout hall is constructed and opened elsewhere.

POLICY SW15 DEVELOPMENT OF 56 HIGH ST

1. Proposals to develop the site at 56 High Street will not be allowed until an equivalent or better replacement scout hall is constructed and opened elsewhere.
2. The site must not be broken up into small parcels which may prevent the land being commercially useful for modern town centre uses.

This policy supports the Neighbourhood Plan Objectives 1,4,5

POLICY SW16 REGENERATION OF GEORGE ST

Proposals to regenerate George Street would be supported, which may include:

- Redeveloping numbers 2-18 to include town centre A1 uses on the ground floor and accommodation on the first floor.
- Closing the road to traffic to make the street more attractive to pedestrians, visitors and shoppers.
- Development of the site as part of a wider development to include 56 High Street, as mapped in 6.5.11 and eLP Policy SAF14.
- Retention and sensitive redevelopment of the building that was formerly The George pub (now the Nemonthron).

This policy supports the Neighbourhood Plan Objectives 1,4,5

POLICY SW17 DEVELOPMENT OF NEW AND EXISTING COMMERCIAL SPACES

1. Proposals for the replacement or refurbishment of existing industrial units which will result in greater viability, adaptability and energy efficiency will be supported.
2. Proposals for farm diversification involving small-scale business and commercial development which will provide additional employment will be supported.
3. Proposals to convert residential accommodation to additional visitor accommodation will be supported, provided that adequate parking is made available.

This policy supports the Neighbourhood Plan Objectives 1,2,3,4,5

6.5.13 Surveys of the town noted that while George Street has a combination of mostly attractive older buildings there is one strip of unattractive and dated buildings (numbers 2-10) (below):

Photo taken by SWNP

Except on this particular strip, the pavements on the road are particularly narrow and the road is heavily used by HGVs. Despite being in the town centre, businesses on the street do not always receive the foot traffic they need to remain viable. Proposals for the regeneration of George Street would be supported.

6.6 MEASURES TO SUPPORT BUSINESSES

6.6.1 Additional signage to point visitors to the town's car parks would be supported. Installation of high-speed electric charging points will be supported. The provision of public toilets at Swan Meadow Car Park would be supported.

6.6.2 Increased levels of home working are supported by the SWNP and, to enable this, the SWNP also supports and encourages the installation of high-speed broadband across the parish.

6.6.3 Proposals that provide a means for temporary office working spaces, light industrial units and pop-up shops to open to test new business concepts will be supported, subject to the usage classes policy SW11. This might include reduced rents and or rates, and or shorter leases.

6.6.4 Measures to encourage visitors to Audley End House to visit Saffron Walden town centre will be supported. This could include initiatives such as free shuttle bus services. Similar measures to encourage future residents of the proposed North Uttlesford Garden Community to visit Saffron Walden for business and leisure would also be supported.

6.6.5 Measures which promote greater use of the market square as a social gathering space will be supported.

6.6.6 Measures which promote the narrow streets and passageways of The Rows and The Cockpit would be supported. These are the remnants of the medieval streets and should be protected and could be enhanced.

6.6.7 Saffron Walden Town Council holds the Market Charter and has the rights to all stallage in the open air (private or not) within the parish of Saffron Walden. Centuries ago the market footprint was much larger than it is today. Any extension to the footprint of the market, if requested by suitable traders who would enhance the town's commercial offer, would be welcomed.

7. DIGITAL CONNECTIVITY

7.1 Having an efficient connection to the internet will help to enable residents to access up-to-date technologies for their lifestyles, businesses to flourish to their maximum potential, and children and students to gain the skills they will need to access future employment opportunities.

7.2 Installing the best possible technology at the point of building, in a manner which allows for easy upgrades, will be the most efficient way of delivering these connections.

POLICY SW18 HIGH QUALITY COMMUNICATIONS INFRASTRUCTURE

1. All new homes and commercial premises will have superfast fibre connectivity, being Full Fibre to the Premises/Home (FTTP/H) or equivalent or better successor, which will allow residents and businesses a choice of at least two independent providers.

This policy supports the Neighbourhood Plan Objective 1

8. ECOLOGY

8.1 Except for the limited number of brownfield sites within Saffron Walden, the rural location of the parish means that most new developments are built on land that was formerly open fields.

8.2 Development must compensate for this loss of environment for wildlife and prevent excessive urbanisation of the town's location by implementing planning measures which will maintain the town's rural feel and enhance the wildlife.

8.3 Public planting must support bio-diversity. A preference should be given to planting which supports local wildlife and consideration should always be given to planting specimen trees which may grow more slowly but which contribute more to the environment over time than "quick fix" plants.

8.4 Development must contribute to the enhancement of the natural environment by ensuring that planting is connected and by replacing lost green infrastructure at a greater ratio than that which is lost.

8.5 Every square metre of new buildings and roads removes land which previously had natural drainage, which makes the installation of Sustainable Drainage Systems (SuDS) essential to replace this natural soakaway function. The Environment Agency specifies the most appropriate SuDS for each development, with the core principle being that any drainage system must not pose a risk to groundwater quality and must not be constructed in ground affected by contamination. Further requirements for consideration, and resources for further information, are listed in Appendix 4.

8.6 Where underground SuDS are constructed it is sometimes the case that public open space is on the surface in the same location. Underground SuDS should be designed so that ownership of the land above can be transferred to the public sector if appropriate, while the SuDS can remain privately owned.

8.7 The Construction Industry Research and Information Association (CIRIA), in association with the Department for Environment, Food and Rural Affairs (DEFRA), has published The SuDS Manual. This manual, published in 2016, describes in detail the additional benefits of drainage systems alongside flood mitigation, which include enhanced amenity value for the area through good design and opportunities for enhanced biodiversity through careful planting. As well as identifying the benefits of well-designed SuDS, it provides practical advice and planning checklists on achieving these benefits, which makes this document an essential resource for developers.

8.8 Green surface space includes tree canopies, green roofs, private gardens and public open space. Current studies and recommendations point to an ideal quantity of 50% of surface area being "green". The London Environment Strategy published May 2018 sets a target of 50%, to include 22% of tree canopy. The Town and Country Planning Association in

its practical guide for creating successful new communities says *“As a general rule, 50% of the land total in a new Garden City should be green infrastructure, including private gardens and green roofs, and this should be clearly stated in local planning policy.”*⁴⁵

8.9 Achieving these targets will require a step-change in the process of designing developments. Rather than laying out the buildings first and leaving whatever is left to be counted as green space, the green space must be planned in and accounted for at the same time as the buildings.

8.10 Proposals to plant trees in public spaces will be supported where this will improve, or at least not detract from, the amenity of the space for current users.

POLICY SW19 ECOLOGICAL REQUIREMENTS FOR ALL NEW DOMESTIC AND COMMERCIAL DEVELOPMENTS

1. All new development proposals must contain at least 50% green surface space as described in the TCPA guidelines. This can be achieved by including and combining:
 - Planting of wildlife-friendly specimen trees;
 - Incorporating wildlife corridors such as hedgerows or ponds through a site;
 - Private gardens (where the development includes dwellings);
 - Public open space (which must as a minimum meet the requirements in policy SW27); and
 - Green roofs
2. Sustainable drainage systems will be installed in all developments and will be proportionate and appropriate to the site.
3. Sustainable drainage systems will be planted with appropriate plants to encourage a biodiverse habitat, and designed for maximum amenity, using the guidelines and checklists of the CIRIA SuDS Manual 2015 or its successors.
4. Underground SuDS will be designed so that ownership of the land above can be transferred to the public sector while the SuDS can remain in private ownership.

This policy supports the Neighbourhood Plan Objectives 2,3,4

⁴⁵ Guide 7: Planning for green and prosperous places, accessible at tcpa.org.uk

9. INFRASTRUCTURE DELIVERY

9.1 A Neighbourhood Plan may only deal with planning matters. In the most simplistic terms, this means matters which involve planning applications for the development and the use of land.

9.2 As well as the design and layout of the building works, the planning authority must take into consideration the surrounding infrastructure and, where necessary, make provision of additional infrastructure a pre-requisite for the development itself. The NPPF sets out the relationship between the provision of such infrastructure and the planning process in Section 8: “Promoting healthy and safe communities”:

NPPF Paragraph 91. Planning policies and decisions should aim to achieve healthy, inclusive and safe places which:

- a) promote social interaction, [...];*
- b) are safe and accessible, [...]; and*
- c) enable and support healthy lifestyles, [...]*

NPPF Paragraph 92. To provide the social, recreational and cultural facilities and services the community needs, planning policies and decisions should:

- a) plan positively for the provision and use of shared spaces, community facilities (such as local shops, meeting places, sports venues, open space, cultural buildings, public houses and places of worship) and other local services to enhance the sustainability of communities and residential environments;*
- b) take into account and support the delivery of local strategies to improve health, social and cultural well-being for all sections of the community;*
- c) guard against the unnecessary loss of valued facilities and services, particularly where this would reduce the community’s ability to meet its day-to-day needs;*
- d) ensure that established shops, facilities and services are able to develop and modernise, and are retained for the benefit of the community; and*
- e) ensure an integrated approach to considering the location of housing, economic uses and community facilities and services.*

9.3 In very practical terms much of this infrastructure is delivered through developer contributions in the form of Section 106 agreements (S106), or the Community Infrastructure Levy (CIL), or a combination of the two. Whilst the process of calculation of each is different, the end result of both is a financial contribution which is linked to and mitigates the impact on existing infrastructure which is caused by new development. At the time of adoption of the SWNP, the District Council uses S106 and is reviewing the introduction of CIL. The SWNP supports the introduction of CIL.

9.4 Developer contributions are dealt with by the planning authority; however, a neighbourhood plan may describe what additional infrastructure is required to make proposed development sustainable, and how it ought to be delivered.

9.5 The following sections, on transport infrastructure, sport and recreation, arts and cultural spaces, and education and healthcare facilities set out measures which are in part beyond the direct control of the Neighbourhood Plan, but which should form the basis of infrastructure delivery as implemented by the district and county councils.

10. TRANSPORT INFRASTRUCTURE

10.1 INTRODUCTION

10.1.1 The NPPF requires development plan makers to consider transport infrastructure:

NPPF Paragraph 102: “Transport issues should be considered from the earliest stages of plan-making and development proposals, so that:

- a) the potential impacts of development on transport networks can be addressed;*
- b) opportunities from existing or proposed transport infrastructure, and changing transport technology and usage, are realised – for example in relation to the scale, location or density of development that can be accommodated;*
- c) opportunities to promote walking, cycling and public transport use are identified and pursued;*
- d) the environmental impacts of traffic and transport infrastructure can be identified, assessed and taken into account – including appropriate opportunities for avoiding and mitigating any adverse effects, and for net environmental gains; and*
- e) patterns of movement, streets, parking and other transport considerations are integral to the design of schemes, and contribute to making high quality places.”*

NPPF Paragraph 103: “The planning system should actively manage patterns of growth in support of these objectives. Significant development should be focused on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions, and improve air quality and public health. However, opportunities to maximise sustainable transport solutions will vary between urban and rural areas, and this should be taken into account in both plan-making and decision-making.”

10.1.2 Traffic congestion in Saffron Walden is of great concern, particularly in relation to transport in the east of the town, as businesses find it less appealing to use sites in the east because access is difficult. Employment sites in the east of the town are important for the economy and surrounding congestion must not become a factor which causes their loss.

10.1.3 The high level of congestion has meant that the key junctions in the centre of the town operate over capacity and as a result much of Saffron Walden is designated as an Air Quality Management Area (AQMA).⁴⁶ The District Council has a statutory obligation to monitor the air quality, to seek ways to improve the air quality, and to report to DEFRA on progress.

⁴⁶ Appendix 2 provides further information on the AQMA.

Map showing the AQMA, which corresponds with the busiest streets for traffic as illustrated above.

10.1.4 In practice, the ambitions of planners to plan positively to reduce traffic congestion and to improve air quality in Saffron Walden are limited by the following cascade of constraints:

- Public transport networks are relatively poor, reflecting its position in a rural area. County Council funding for public transport is under pressure, and spending is forecast to reduce rather than to increase;
- As a consequence of limited public transport availability, it is very difficult to manage day to day living without the means of private transport. Therefore, car ownership and use in Saffron Walden is relatively high compared to the national average (83% of households have access to a vehicle, compared to 75% in England as a whole).
- In parallel to the above, the imbalance between the cost of housing in the town and the average wages paid in Saffron Walden mean that high volumes of residents commute out each day to achieve the salaries necessary to afford housing in Saffron Walden. Meanwhile many people who work in Saffron Walden cannot afford to live in Saffron Walden so commute in from elsewhere each day. Inevitably almost all of these people travel by private car.
- The key destinations of Cambridge, Harlow, the M11 (for London) and Audley End Station can only be accessed from the North, West and South of the town whilst the

greatest portion of the town, and the area which has seen almost all of the recent development, is towards the east.

- The streets through which most traffic must filter when travelling in or out of the town are simply the original medieval cart tracks, paved over. They go through the historic core of the town and are narrow, leaving little room for pavements. Cars jostle for space and lorries physically block the streets, and regularly strike the listed buildings. The streets are unsuitable for modern-day levels of traffic.
- Finally, various transport assessments have been carried out by Essex Highways (the most recent and fully comprehensive being the Uttlesford Local Plan Highway Impact Assessment October 2013, and subsequent reviews and updates). Each one has failed to find a solution, with the conclusion of each being that the medieval layout of the town, with all routes eventually directing traffic through the AQMA, makes it impossible to resolve the air quality simply by re-routing, and/or speeding up the traffic. The Impact Assessment conclusions note: *“The analysis suggests that if all the [proposed] measures were implemented, some of the key junctions in the Saffron Walden road network would be likely to accommodate the additional traffic resulting from the ULP [Uttlesford Local Plan] developments. However, three junctions in the town would continue to operate over capacity, and it has not been possible to identify further enhancements due to highway land constraints. These are: High St/George St; High St/Church St; Mount Pleasant Rd/Debden Rd”*.

10.1.5 The images below illustrate these constraints:

Map highlighting the main through roads through the town (the High Street) and the small side streets by which vehicles of all sizes access the east of the town. Note that the grey shaded areas show sites either developed but not mapped, or with consented development not yet built. The numbers 1-4 reference the streets through which most traffic travelling to or from key destinations must pass.

Photographs of the roads marked 1-4 on previous map.

1. Castle St – has parking on the right and single file / one-way traffic on the left with narrow pavements

2. Church St/High St – is single lane but widens to two lanes at the junction. However, the junction is narrow so it is difficult for two larger sized cars (or a car plus a van) to exit at the end simultaneously. The pavements are narrow.

3. George St/High St has space for single file /one-way traffic and very narrow pavements. Whilst the space accommodates cars, lorries must cross the kerb and they regularly strike the buildings either side of the junction as they turn.

4. Audley Road is single lane and one way but widens to two lanes at the end

Map showing the location of the listed buildings, which are predominantly in the busiest streets for traffic.

OS PSMA LICENSE NUMBER: 0100057521

10.1.6 The ECC Saffron Walden Traffic Study Update of May 2017 shows that committed development and allocated sites will leave the core junctions in Saffron Walden over capacity by 2031. The conclusion of the update states: *“Following a very simplistic assessment of further major infrastructure and development it is also concluded that, should any further development sites be promoted to the south and east of the town more sophisticated traffic modelling would be required in order to identify the traffic impacts and infrastructure required to mitigate those impacts. This could form part of a Local Plan review of the town, at which time modal shift opportunities would be explored.”* Rather than waiting for a Local Plan review to explore ways of encouraging people to walk or cycle rather than drive, the SWNP makes its own proposals.

10.1.7 The various transport assessments carried out by Essex Highways conclude that encouraging more people to walk or cycle as often as possible for journeys made within the town would be the only way to improve air quality and congestion. The 2013 Impact Assessment says: *“In addition to the identified mitigation measures, it is recommended that demand management methods are investigated in order to reduce overall traffic flows in the town. Activities such as travel planning [...] would help to improve awareness of alternative travel modes and encourage a shift towards non-car modes of travel and reduce traffic congestion in town”*. This is a logical conclusion which would apply to any market town.

10.1.8 As required by DEFRA, the district council has in place an Air Quality Action Plan 2017-2022 (AQAP), with seven measures identified as key to success.

10.1.9 Of the seven measures, three involve encouraging public and private fleet operators to switch to low emission technology. Naturally the SWNP is supportive of these.

10.1.10 One of the measures involves improvements around infrastructure for vehicles:

- *To work with ECC Highways to develop a scheme of measures aimed at improving junction capacity within the AQMA identified to be necessary as part of the emerging Local Plan once adopted.*

The SWNP is supportive of this, provided that the improvement to junction capacity does not have unintended consequences, for example:

- Any measure which speeds traffic through one junction may lead to more traffic idling at the next junction;
- Measures which result in increased traffic in the town centre or where there are a substantial number of people or historic buildings;
- Infrastructure changes which remove parking to speed up traffic can be undesirable because they make walking and cycling feel less safe, ultimately reducing the numbers of pedestrians and cyclists and increasing traffic to fill the space available, at the same time returning congestion and pollution to previous levels; and

- Changes which create one-way systems can be undesirable because they create longer journeys and thus additional congestion and pollution, as well as adversely affecting sustainable transport uses.

10.1.11 The remaining three measures involve aspirations around sustainable transport. They are:

- *To work with ECC to facilitate the provision of new cycle/pedestrian routes and cycle storage and promote the routes available.*
- *To assist ECC in working with local schools and businesses in the review and upgrading, or developing and promotion of travel plans.*
- *To encourage ECC to procure bus services with integrated timetables, high quality facilities, and a frequent and reliable service linked to the rail service at Audley End. Information on Public Transport services to be readily available in UDC buildings and via the website. To encourage ECC to set emission standards for new and existing buses.*

The SWNP fully supports these aspirations and makes proposals in practical detail which can convert them from aspiration to reality.

10.1.12 The detailed actions of the SWNP on transport are:

IMPROVING SAFETY FOR PEDESTRIANS AND CYCLISTS

- 1) To campaign for improved pavements and crossings;
- 2) To campaign for cycling infrastructure;
- 3) To campaign for all streets to have 20mph speed limits; and
- 4) To campaign for time limiting restrictions on movements of HGVs through the town.

As a measurable goal, the town should be safe enough for most children in Year 6 (the final year of primary school) and above to walk to school independently. This will reduce the number of cars doing the school run which will significantly cut congestion and pollution in the town. Anything that improves safety for children should improve safety for all.

IMPROVING PROVISION OF PUBLIC TRANSPORT

- 5) To campaign for improved local and national public transport connections; and
- 6) To insist on developments (past and present) making best use of contributions towards public transport provision

As a measurable goal, public transport should be better timetabled, more frequent, run later in the evenings and operate seven days a week.

RESTRICTIONS THROUGH THE PLANNING PROCESS

- 7) To resist further significant development in the east of the town; and
- 8) To restrict the movement of HGVs through both the historic core and residential outer areas of the town

As a measurable goal, traffic and air quality will not be worse at the end of the SWNP period than at the start, and ideally will be better.

10.1.13 Other aspects of the SWNP also aim to address traffic congestion and associated pollution issues including:

- Policies SW4 and SW5, which seek to improve affordability of housing to reduce in-commuting for jobs in town;
- Policies SW11, SW15, SW16, SW17 and SW18, which seek to encourage the creation of more highly-paid roles in Saffron Walden to reduce out-commuting;
- Policy SW12, which seeks to encourage convenience stores in neighbourhoods so as to reduce car journeys for small shopping trips; and
- Policy SW8, which seeks to maximise the number of charging points in the town, to help encourage residents and commuters to switch to electric vehicles.

10.2 IMPROVING SAFETY FOR PEDESTRIANS AND CYCLISTS

10.2.1 In addition to improved air quality, an increased take-up of sustainable modes of transport will help improve the physical and mental well-being of the community as a whole, through exercise and the sense of community that is gained by walking and cycling.

10.2.2 A well-connected neighbourhood can encourage sustainable journeys. Where connections that can be made on foot or bicycle are quick and convenient, people are more likely to choose these modes of travel. Where footpath connections are not short, residents may find themselves forced to take longer routes and consequently choose to travel by car.

10.2.3 In order to achieve the SWNP objectives, the town must offer an excellent walking and cycling network between and throughout the residential areas and the town centre, with special consideration to be made for school children and the elderly.

10.2.4 The SWNP proposes a “wish list” of infrastructure solutions which would make walking and cycling more attractive in the town. This has been drawn up by local residents, particularly families with children, and is listed in Appendix 3. The SWNP encourages Essex Highways to engage and consult with these proposals. If the District Council adopts the Community Infrastructure Levy and a long-term infrastructure delivery plan is drawn up these proposals should form an integral part of the plans.

10.2.5 The *Manual for Streets* published by The Department for Transport (DfT) sets out a user hierarchy to be applied to the design process, with pedestrians being considered first when designing, building, retrofitting, maintaining and/or improving streets.⁴⁷

10.2.6 The *Manual for Streets* states that works to streets should be designed to keep vehicle speed at or below 20mph in streets and places with significant pedestrian movement

⁴⁷ Manual for Streets Table 4.1

unless there are overriding reasons for accepting higher speeds⁴⁸. This is backed up by the *Essex Design Guide* and is policy across Essex.

10.2.7 For clarity, all streets within the development limits of Saffron Walden are considered to already have, or wish to attract, significant pedestrian movement. Therefore, the SWNP supports all streets, both existing and yet to be built, being designed to keep vehicle speeds at or below 20mph. Some methods of achieving this, for example speed bumps, have since been discovered to be counter-productive. Thus, when designing new schemes, the best-known methods for achieving slower traffic speeds should always be used, bearing in mind the experiences of other local authorities which have already rolled out this measure.

10.2.8 In previous years, police policy was sometimes to object to porosity of developments on grounds that porous developments make it easier for crime to be committed and for criminals to escape along alleyways. Since then the police have issued new guidelines *Secured by Design – New Homes 2014*. These guidelines recognise that permeable developments are better for residents, and that it is possible to ‘design in’ crime reducing measures, for example by ensuring that all footpaths are well lit, are set out where they are overlooked, and surrounding landscaping planting is low. Moreover, as the police make increasing use of drones (something supported by 84% of the population according to DfT research⁴⁹) a good network of footpaths need not be an obstacle to catching criminals.

10.2.9 Essex County Council, as the Highways Authority, has the final say in which highways schemes may be implemented. The barriers to the implementation of new pedestrian infrastructure are largely due to financial constraints. The barriers to the implementation of cycling infrastructure are largely due to Essex-specific design codes, for example on the mandatory width of cycle paths. It should be noted that the roads in Saffron Walden are generally too narrow to meet the Essex criteria for the installation of cycle paths, which is why previous requests have been turned down.

⁴⁸ Manual for Streets paragraph 6.3.19

⁴⁹ Department for Transport Research and analysis *Transport and transport technology: public attitudes tracker* published 26th October 2018

POLICY SW20 PROMOTING WALKING AND CYCLING

1. Development proposals which retain or incorporate safe, attractive and direct walking and cycling routes on site and which appropriately mitigate the impact of additional transport movements in the parish created through the development scheme will be supported.
2. New developments must meet the following criteria:
 - Existing footpaths and pedestrian cut-throughs through town are protected;
 - New footpaths are designed to a standard that they can be recognised as Public Rights of Way and be adopted by Essex County Council Highway Authority;
 - All new developments are designed to be permeable, in order to encourage and enable pedestrians and cyclists to walk or cycle by the shortest route; and
 - Footpaths on new developments conform to recommendations made by Secured by Design – New Homes 2014 or a later equivalent.
3. For developer contributions to any off-site highways schemes or improvements:
 - The scheme design will conform with DfT user-hierarchy guidelines, so that it will make provision for pedestrians first, cyclists second, public transportation third, and private vehicles last.
 - Until or unless an up to date highways study is carried out, when selecting schemes for funding, priority must be given to the SWNP infrastructure schemes.
4. All new streets within the development limits of the parish must be designed to keep vehicle speeds at or below 20mph.

This policy supports the Neighbourhood Plan Objectives 1,2,3,4,5

10.2.10 Travel Plans are projects run with the aim of encouraging people to adopt environmentally sustainable ways of getting about. Developers must deliver them for significant developments, and schools and businesses are encouraged to have up to date plans for their employees and pupils.

10.2.11 The SWNP supports and encourages effective Travel Plans, and the Town Council, which has the longest-term interest in the well-being of the citizens in the town, is keen to deliver travel plans in cases where otherwise they would be delivered by a developer or a company which is based elsewhere.

10.2.12 Travel plans must include measurable objectives.

POLICY SW21 TRAVEL PLANNING

1. Developer travel plans will be expected to include provision for funding and delivery of sustainable travel initiatives.
2. The Town Council will have the right of first refusal in delivery of travel plans.
3. Travel plans must have measurable objectives.

This policy supports the Neighbourhood Plan Objectives 2,3,4,5

10.3 IMPROVING PROVISION OF PUBLIC TRANSPORT

10.3.1 Buses have a positive impact on the environment if they are used by many people, even if the technology they use is not the most environmentally friendly. If they are not heavily used then they only have a positive impact on the environment if the technology is environmentally friendly. If they are both heavily used and have environmentally friendly technology then they have an extremely positive impact on the environment. Low Emission Vehicle (LEV) technologies for other fleets both public and private would improve the air quality in Saffron Walden.

10.3.2 A recurring theme during public consultations was complaints over the timetabling of the bus services in and around Saffron Walden. A lack of Sunday services and the way that buses to and from the railway station are closely timetabled, with long gaps in between, was of particular importance to the respondents. Provision of buses must include the hamlet of Little Walden as well as Saffron Walden town.

10.3.3 Public spending on public transport greatly favours residents of London over people living everywhere else in the country. The Institute for Public Policy Research reported in November 2018 on the public spending per capita for public transport.⁵⁰

⁵⁰ <https://www.ippr.org/news-and-media/press-releases/transport-spending-has-risen-twice-as-much-per-person-in-london-than-in-the-north-since-launch-of-northern-powerhouse>

All figures are in real terms. Figures include capital and revenue; local and central government. Table: Public transport spending per person by region, real terms

Region	2013-14	2014-15	2015-16	2016-17	2017-18
London	£693	£701	£906	£929	£1,019
East	£253	£265	£348	£330	£402

10.3.4 The UK government has committed to move to a net zero carbon emissions economy by 2050. People living in rural areas such as Uttlesford will always have to travel by vehicle for many journeys because the distances involved will often prohibit walking and cycling. In the long-term all private vehicles should be environmentally friendly. It will take a while before the charging infrastructure is in place for all road users to take this up and for the national stock of vehicles to evolve so that it is a financially feasible option for all drivers to make the switch. Therefore, in the medium-term transitional period at least, it is reasonable to expect that provision of public transport must be enhanced, and therefore it is reasonable for the SWNP to campaign for increased funding and provision of public transport.

10.3.5 A comprehensive review and report of the bus services was carried out by Dr David Corke in July 2018 and the recommendations therein are supported by the SWNP.⁵¹ Furthermore the SWNP will advocate to ECC to implement the recommendations, or the recommendations made in any subsequent report by Dr Corke.

POLICY SW22 IMPROVING PROVISION OF PUBLIC TRANSPORT

1. Developers will be required to provide meaningful contributions towards the provision of public transport which can connect their development to main destinations.

This policy supports the Neighbourhood Plan Objectives 1,2,3,5

⁵¹ <http://www.corke.biz/Walden%20Bus%20Report.pdf>

10.4 RESTRICTIONS THROUGH THE PLANNING PROCESS

10.4.1 Heavy goods vehicles moving through Saffron Walden have impacts other than pollution:

- The roads are too narrow for the length of the vehicles, which means that they cannot turn some corners without crossing the kerb, putting pedestrians at danger of being knocked down;
- The weight of the vehicles shakes the listed buildings within the Conservation Areas causing structural damage;
- The height of the vehicles causes them to occasionally clip the facades of the buildings which are very close to the road, causing severe damage and potentially rendering these listed buildings uninsurable; and
- The weight of the lorries damages the surface of the roads⁵², especially in cases where multiple manoeuvres are required to make a left or right-hand turn in a tight space.

This photo taken in the summer of 2018 shows a lorry turning right into George Street from the High Street, and crossing the kerb, almost clipping the adjacent listed buildings. This illustrates the unsuitability of the medieval streets for heavy goods vehicles. Moments before this picture was taken, a mobility scooter user on the pavement had a narrow escape from being hit by the lorry. Large numbers of lorries use this junction each day making the pavement dangerous for pedestrians.

⁵² Source: *Campaign for Better Transport: Lorries cause more damage to roads than cars (13.3.2017)*, “the Generalized Fourth Power Law is the most commonly agreed method to approximate the relative impact of vehicles on roads [...] a six-axle, 44-tonne truck is over 138,000 times more damaging than a typical, small, 1 tonne car (such as a Ford Fiesta) with two axles.”

10.4.5 A last-mile delivery service or other consolidated delivery initiative which would potentially reduce heavy goods traffic through the town centre would benefit people and buildings, reduce congestion and improve air quality.

POLICY SW23 VEHICULAR TRANSPORT

1. Further developments which are beyond the east of the town's development limits and which will generate additional traffic movements through the town will only be supported if:
 - It can be demonstrated that they will not increase congestion by the capacity measures used in the Uttlesford Local Plan Highway Impact Assessment October 2013; and
 - the AQMA has been lifted and the development would not reinstate the AQMA.
2. Development proposals likely to generate HGV vehicle movements through the town centre will be subject to planning conditions restricting the timing of those movements.
3. The provision of charging points for electric vehicles for private, commercial and public transportation electric vehicles will be supported.

This policy supports the Neighbourhood Plan Objectives 2,3,4,5

11. OPEN SPACE, SPORTS AND RECREATION

11.1 INTRODUCTION

“If physical activity was a drug it would be regarded as a miracle”

Professor Dame Sally Davies, Chief Medical Officer for England

11.1.1 As well as protecting existing open space and sports and recreational buildings and land, government policy requires planners to continually review the provision of open space, sports and recreation facilities and to plan positively for additional provision where there is need:

NPPF paragraph 96: “Access to a network of high quality open spaces and opportunities for sport and physical activity make an important contribution to the health and wellbeing of communities. Planning policies should be based on robust and up-to-date assessments of the need for open space, sport and recreation facilities (including quantitative or qualitative deficits or surpluses) and opportunities for new provision.”

11.1.2 Uttlesford District Council produced a Sports and Open Spaces strategy via a suite of documents dated 2019. Maps of the spaces catalogued in the strategy are attached in Appendix 5.

11.1.3 Subject to three considerations, The NPPF allows Neighbourhood Plans to identify and designate Local Green Space:

NPPF Paragraph 100: “The designation of land as Local Green Space through local and neighbourhood plans allows communities to identify and protect green areas of particular importance to them. Identifying land as Local Green Space should be consistent with the local planning of sustainable development and complement investment in sufficient homes, jobs and other essential services. Local Green Spaces should only be designated when a plan is prepared or updated, and be capable of enduring beyond the end of the plan period.”

NPPF Paragraph 101. “The Local Green Space designation should only be used where the green space is:

- a) in reasonably close proximity to the community it serves;*
- b) demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife; and*
- c) local in character and is not an extensive tract of land.*

102. Policies for managing development within a Local Green Space should be consistent with those for Green Belts.”

11.1.4 The quantity standard recommended to UDC in the Uttlesford District Council Open Space Standards Paper is summarised on page 12 of that paper and is reproduced below:

Table 3.4.3: Recommended quantity standard

Typology	Quantity standard (hectares per 1,000 population)
Parks & gardens	0.10
Natural & semi-natural greenspace	5.81
Amenity greenspace	1.60
Provision for children & young people	0.10
Allotments / community food growing	0.20

11.1.5 Parks and Gardens are described in the Assessment as *“urban parks and formal gardens (including designed landscapes) which provide accessible high-quality opportunities for informal recreation and community events.”*

11.1.6 Natural and semi natural greenspace includes woodland, scrub, grassland and other similarly natural environments which assist with wildlife conservation, biodiversity and environmental education and awareness.

11.1.7 Amenity Greenspace is described in the Assessment as *“sites offering opportunities for informal activities close to home or work or enhancement of the appearance of residential or other areas. It includes informal recreations spaces, housing green spaces, village greens and other incidental space.”*

11.1.8 Open space which is of a size which makes it fit for purpose can include the areas fitting or overlapping the categories “parks and gardens”, “natural and semi natural greenspace” and “amenity greenspace. An example is The Common, which has areas fitting into each category. For this reason, the combined quantity of provision is considered in the SWNP. By this method, Saffron Walden ought to have 7.61ha per 1,000 of the population. A holistic approach to considering the needs of people and the environment would determine the actual layout and usage of any sites coming forward, as well as any re-purposing of current space.

11.1.8 Provision for children and young people is predominantly delivered as playgrounds.

11.1.9 Population in Saffron Walden is most recently estimated as 16,719 and the UDC Open Space Standards Paper uses an average of 2.4 residents per household.

11.2 ALLOTMENTS

11.2.1 The Open Space Assessment Report 2019 catalogues the allotments available in Saffron Walden as follows as totalling 5.4205ha, and these sites are listed in Appendix 5 – Open Spaces Audit.

11.2.2 The SWNP notes that this catalogue omits three allotment sites owned by the District Council, although they are relatively small, they should be added to the assessment. They are to the west of Debden Road and Pleasant Valley and are mapped in Appendix 6 – Local Green Space Allocations. In total they represent 0.263ha. These sites are marked as Allotment Gardens in the UDC Constraints Map.⁵³

11.2.3 Including these additionally catalogued allotments, the total quantity of hectares in Saffron Walden is 5.6835 ha, which equates to 0.34ha per thousand people. The quantity standard recommended by the UDC open space strategy is 0.2ha per thousand people. Therefore, Saffron Walden meets the official quantity standard for allotment provision with a reasonably comfortable buffer.

11.2.4 Notwithstanding the above, there is strong evidence that the demand for allotments is greater than the official quantity standard; the Town Council has 88 allotments and a waiting list for 20⁵⁴. Typically, the wait for an allotment is 12-18 months.

11.2.5 Furthermore, as Saffron Walden grows, and sites with consented development are occupied, the official buffer will reduce and could vanish, and simultaneously demand is expected to grow.

11.2.6 Combining the expected growth of the population and the known fact of the waiting list, the SWNP therefore requires all new development to contribute towards a continuing supply of allotments, despite the parish meeting the official standard already.

11.2.7 The allotments sites catalogued by the District Council and the additional sites catalogued by the SWNP should be allocated as Local Green Spaces to ensure their protection and continued provision.

11.2.8 The emerging Local Plan contains a requirement for all developers to provide 2m² of allotments per person, either on or off-site, and the SWNP endorses this requirement.

⁵³ <https://udc.maps.arcgis.com/apps/webappviewer/index.html?id=c0c8399f55f84531800cf9c36944226c> as accessed 07.10.19

⁵⁴ As at April 2019

POLICY SW24 ALLOTMENTS

1. All new residential development must provide 2m² of allotments per person, either on or off-site.
2. The allotment land already catalogued in the Uttlesford District Council Open Space Strategy is designated as Local Green Space and shall be protected from development.
3. Additional allotment land identified by the SWNP as Local Green Space for allotments is designated in the table Appendix 6 – Local Green Space allocations and shall be protected from development.

This policy supports Neighbourhood Plan Objectives 2,3,4,5

11.3 FORMALLY MARKED PLAYING FIELDS AND INDOOR SPORTS FACILITIES

CURRENT PROVISION

11.3.1 Provision of sports facilities in Saffron Walden has declined over recent years. Walden (Friends) School was a private school with large playing fields located in the centre of the town. The school went into administration in 2017 and the site was sold to developers. At the time of writing, the site is not developed; nonetheless the gates remain closed to sports groups which now do not have the benefit of the space. The swimming pool was drained and may now be permanently damaged. The SWNP opposes the loss of these playing fields and notes that they are protected by the NPPF, as well as the Local Plan and the eLP:

NPPF Paragraph 97. "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use."

11.3.2 The land next to Ridgeons to the east of the town was developed into 167 dwellings and commercial buildings (planning application: UTT/16/2701). It had been the location of a youth U11/U12 (9v9) football pitch. The development caused the loss of this pitch and provided in its place a 5v5 pitch. Sport England objected to the planning application. The 5v5 pitch which was provided in its place is inadequate for use for football because it is under the correct size (does not have runoff space) and is perched on the plateau at the top of a steep hill on all sides, with an approximate drop of 2 storeys. The small space provides a very good view over the town and is popular with dog walkers but cannot be described as an adequate 5v5 football pitch because of the unsuitable location and design.

11.3.3 At the same time, no sports facilities have been provided by other recent developments in Saffron Walden, apart from the Persimmon Homes development.

11.3.4 The Open Space Assessment Report 2019 catalogues the outdoor sports facilities space in Saffron Walden as covering 3.48ha, and these are catalogued in Appendix 5 – Green Spaces Audit.

11.3.5 The SWNP has catalogued a further 11.34ha of playing fields and these are catalogued in Appendix 6.

11.3.6 The UDC May 2019 Playing Pitch Strategy and Action Plan confirms SWNP research on the state of provision of outdoor sports facilities in Saffron Walden. It states that there is a:

- A shortfall of grass football pitches of varying sizes;
- A shortfall of 2 full size floodlit 3G football pitches;
- A shortfall of provision for cricket;
- Insecurity of tenure for Saffron Walden rugby club which is based outside of SW, and has no space within the town, and notwithstanding this, an overall shortfall of provision for rugby; and
- A shortfall in tennis courts.

11.3.7 The December 2018 UDC Sports Facilities and Recreation Strategy – Indoor Needs Assessment confirms SWNP research on the state of provision of indoor sports facilities in Saffron Walden. It notes that throughout Uttlesford “Unmet demand for sports halls in Uttlesford roughly equates to 6.4% of the total demand” (page 47). It goes on to note that “Lord Butler Leisure Centre [is] operating at 97% capacity. This means that [it is] operating at uncomfortable levels and [is] probably contributing to the over-stretched capacity levels.”

11.3.8 The report goes on to note that the majority of sports halls are located on education sites and are unavailable during the day, and that a significant proportion of time is given over to outdoor sports in sports halls which reduces the availability for specific indoor sports (page 56). It concludes that increasing outdoor sports provision would improve availability for indoor sports.

11.3.9 There is a project currently in hand to convert a football pitch at County High School into a 3G football pitch which will fulfil half of those requirements as identified by the Playing Pitch Strategy and Action Plan.

11.3.10 Swimming facilities are assessed by the Indoor Strategy as being broadly sufficient across Uttlesford. However, this finding is inconsistent with the fact that the Saffron Walden Swimming Club (Saffron Seals) is at capacity and has to run a waiting list for new members, since the closure of the Walden School pool. The Indoor Strategy further notes that *“it may be more convenient for residents in the western part of the authority to use neighbouring authority pools as they may be viewed as more accessible”* (page 65 of the Indoor Strategy).

CLOSING THE DEFICIT AND MEETING FUTURE NEEDS

11.3.11 In order to meet demand, identified by their own waiting lists and confirmed by the UDC Sports Strategies, the Saffron Walden sports groups have identified the need for a multi-sports campus, which would achieve economies of scale by hosting several different sports across one site, as well as solving important shortages in capacity by providing modern sports facilities.

11.3.12 According to research carried out by Sport England⁵⁵ one in five people in England have a long-standing limiting disability or illness. It notes that *“Disabled people say they are nearly twice as likely to be physically inactive (43%), compared with non-disabled people (21%). This inequality increases sharply as the number of impairments a person has increases, with 51% of people with three or more impairments inactive. If these population disparities are not addressed, the inequalities that already exist for disabled people will increase.”*⁵⁶ Sport England strategy⁵⁷ is to encourage facilities that take a proactive approach to increasing participation by disabled or less-able people.

11.3.13 Early stage scoping projects considered by the Saffron Walden sports groups for a multi sports campus consider that it could include around 3 rugby pitches (2 to be floodlit) and 8 junior and training pitches for rugby and football. This level of provision would enable the Rugby Club to apply to the Rugby Football Union for funding for a 3G pitch. It could also include 6 further fields for training and provision for an athletics track and field training and events. It could further include a cricket pitch for the 2nd XI, and a building which would host a sports hall, clubhouse facilities and a demountable competition standard pool. In addition, walking and running trails would also be included as part of the scheme. Saffron Striders, the running club would be able to use the facilities and therefore accept new members under the age of 17, who are currently excluded for insurance reasons because the club has to train on the pavements through the town. Likewise, WALDENTri, the triathlon club would also have a safe and permanent base to operate from. Ensuring that the facilities would be accessible for less-able and disabled athletes would be key to the design process.

11.3.14 The sports clubs and Saffron Walden Town Council are currently reviewing options for sites. Requirements for the site include accessibility by active travel modes and acceptability in planning terms (to include matters such as impact on landscape and from lighting). Land adjoining Bridge End Garden and Windmill Hill would be an example of a good location for this project, as it is in a good location for access and has been rejected by the UDC as a location for housing. This land is privately owned by a trust connected to the Fry family (who also own Bridge End Garden, on lease to SWTC). Another parcel of land which has been identified as being potentially suitable is the field immediately to the south of the Green Mile

⁵⁵ <https://www.sportengland.org/our-work/disability/mapping-disability/>

⁵⁶ <https://www.sportengland.org/our-work/disability/why-sport-for-disabled-people-matters/>

⁵⁷ <https://www.sportengland.org/media/13245/sport-england-towards-an-active-nation.pdf>

(land next to the leisure centre) with access from Thaxted Road. This belongs to the developer Kier.

11.3.15 A multi-sports campus would be subject to a community use agreement to ensure the facilities afford the widest possible access to everyone in the community.

11.3.16 Regardless of whether the multi-sports campus goes ahead, or whether another project is subsequently viewed as more beneficial to the parish, all development must contribute towards the creation of new or the improvement of existing sports facilities. This would be carried out via Section 106 agreements or CIL contributions. Section 106 agreements are subject to complex rules, one of which is that no more than five sources of funding can be used for any single project. This means that a small development, which would contribute a relatively small amount, could contribute to a project such as refurbishment of existing facilities so as to increase their capacity. Larger developments would provide funding towards larger and more expensive projects such as the supply of whole new facilities.

11.3.17 The May 2019 UDC Playing Pitch Strategy recommendation (g) “*Secure developer contributions*” sets out the clear steps that must be taken to determine the appropriate level of contribution:

“For playing pitches, the Council should use Sport England’s Playing Pitch New Development Calculator as a tool for determining developer contributions linking to sites within the locality. This uses team generation rates (TGRs) from the Assessment Report to determine how many new teams would be generated from an increase in population derived from housing growth. It then converts this into pitch requirements and gives the associated costs (both for providing the provision and for its life cycle).

The PPS should be used to help determine the likely impact of a new development on demand and the capacity of existing sites in the area, and whether there is a need for improvements to increase capacity of existing provision or if new provision is required. Where a development is located within access of existing high-quality provision, this does not necessarily mean that there is no need for further provision or improvement to existing provision, as additional demand arising from the development is likely to result in increased usage (which can result in overplay or quality deterioration).

Where it is determined that new provision is required to accompany a development, priority should be placed on providing facilities that contribute towards alleviating existing shortfalls within the locality. To determine what supply of provision is provided, it is imperative that the PPS findings are taken into consideration and that consultation takes place with the relevant NGBs. This is due to the importance of ensuring that the stock of facilities provided is correct to avoid provision becoming unsustainable and unused, such as single grass pitch football sites without adequate ancillary facilities or new cricket/rugby grounds located away from existing clubs. Instead, multi-pitch and multi-sport sites should be developed, supported by a clubhouse and adequate parking facilities which consider the potential for future AGP development. The guidance should form the basis for negotiation with developers to secure

contributions to include provision and/or enhancement of appropriate playing fields and subsequent maintenance. Section 106 contributions could also be used to improve the condition and maintenance regimes of the pitches in order to increase pitch capacity to accommodate more matches.”

11.3.18 Contributions from developers may take the form of money or an equivalent value of land, depending on which is more appropriate for the circumstances.

POLICY SW25 PLAYING FIELDS AND SPORTS HALLS

1. Plans for a multi-sport site with associated sports hall, clubhouse and indoor pool will be supported, subject to the location being accessible by active travel modes and acceptable in planning terms.
2. Developer contributions will be sought to contribute towards sports provision, and the calculation will be subject to the Sport England Playing Pitch New Development Calculator or its successor.

This policy supports the Neighbourhood Plan Objectives 1,2,3,4,5

11.4 COMMUNITY HALLS AND CENTRES

11.4.1 Saffron Walden has one building which is officially listed as a community centre; Golden Acre. It also has several other community spaces within the parish, such as church halls. All of these spaces are well-used and a survey carried out by the SWNP discovered that they all operate over capacity.⁵⁸

11.4.2 The UDC sports strategy documents published in 2019 are silent on what makes for adequate provision levels for community centres. However, the Uttlesford Open Space, Sport Facility and Playing Pitch Strategy of 2012 noted a benchmark of at least 1 community centre per 1,500 residents. This figure is slightly higher than the provision which is proposed for the garden communities, which is one community centre per 1,469 residents.⁵⁹

11.4.3 Using the garden community standards, Saffron Walden should have 12 community centres. Even including all buildings used but not officially classified as community centres, Saffron Walden has 10. Therefore, the parish has a shortfall of at least two community centres.

11.4.4 Additional community spaces will enable residents to organise a wide range of activities. This will promote positive mental and physical health, reinforce community spirit and promote the town's economy by keeping bookings and ancillary event services local.

11.4.5 There is a presumption that new community facilities will be owned by the Town Council and run either by the Town Council or a community group. The Town Council must be consulted on the design and construction of the buildings in order to ensure that they meet requirements in terms of design, accessibility and appropriateness for end use.

⁵⁸ See Appendix 7 for survey responses

⁵⁹ Source: Uttlesford Local Plan Infrastructure Delivery Plan (IDP) ANNEX: SCHEDULES Garden Communities and Settlements / North Uttlesford GC scheduled to deliver 5,000 homes (i.e. population 12,000), and 8.17 community centres, i.e. one community centre per 1,379 residents.

POLICY SW26 COMMUNITY HALLS AND CENTRES

1. Major new developments with a forecast of 1,500 or more inhabitants will require new centres or halls to be provided as part of the development and in line with the Uttlesford benchmark.
2. Smaller developments will be required to contribute towards the extension or other improvement of existing facilities in order to allow them to deal with the expected increase in demands placed upon them, or towards a general fund to be ringfenced and accessed in the future for the creation of new facilities as required and when total funds permit.
3. When 56 High Street is developed, the Scout Hall will be lost, and contributions or land, as appropriate at the time, to replace it, will be required as mitigation.

This policy supports the Neighbourhood Plan Objectives 1,2,3,5

11.5 OPEN SPACE FOR INFORMAL RECREATION AND BIODIVERSITY

CURRENT PROVISION

11.5.1 The value of sufficient open space is not to be underestimated. The organisation Fields in Trust has quantified the value of open spaces and has identified in its 2018 report: “Revaluing Parks and Green Spaces” that across the UK adequate provision of green space amounts to a saving to the NHS of £111 million per year.

11.5.2 Adding together the sites identified in the Open Space Assessment Report, and additional sites identified by the SWNP, Saffron Walden has 19.388ha of open space for informal recreation, i.e. 1.16ha per thousand people. This includes spaces classed as Amenity Greenspace, Parks and Gardens and Natural and Semi-Natural Greenspace.

11.5.3 Combining the recommendations for Amenity Greenspace, Parks and Gardens and Natural and Semi-Natural Greenspace, Saffron Walden should have 7.51ha per thousand people which equates to 126ha in total. Therefore, the deficit is estimated to be around 107ha.

11.5.4 Recent provision in Saffron Walden has suffered from two key problems. The first is that additional provision has been vastly insufficient to mitigate the additional demand created by development. The second is that where provision has been made, it has been delivered in piecemeal parcels, often individually so small as to be unusable.

11.5.6 New developments tend to provide Local Equipped Areas for Play (LEAPs), which are small playgrounds with slides and so on, suitable for young children.

11.5.7 New developments generally also designate Local Areas for Play (LAPs) which are public open space as separate to play areas. In reality however, these are typically small parcels of land which are ‘left over’ from the developer’s preferred layouts. Their small size makes them of little use for recreation, perhaps enough for very small children to play, but not enough for adults or older children to use for recreation. At best they could be left in a natural state and would serve a purpose of environmental benefit, however this would not then be a LAP.

11.5.8 A case in point is Tudor Park, recently completed on the East of Saffron Walden (UTT/1572/12). These pictures and figures illustrate the problems referred to in paragraph 11.5.7 above.

These “LAP” spaces measure approximately 18m² (on the left) and 27m² (on the right). This size of LAP is inadequate for the purposes of recreation and therefore should not count as amenity greenspace. This development of 130 houses might accommodate 312 people (at 2.4 people per dwelling). These spaces should have provided 2.37ha of open space. Instead there was just 0.0045Ha, and that was broken down into two sections so small as to be unusable.

11.5.9 The SWNP considers that the litmus test question for whether a site is suitable for consideration as an open space for informal recreation is “Can several people use it at once for activities such as flying a kite and throwing a ball for a dog?”. If the answer is no, then it is likely to be too small to be useful for and counted as recreational space, although it may serve as a small piece of land of environmental value if for example the grass inside the fence was left long.

11.5.10 Optimum layout for public open space is an important matter and should be planned in as an integral part of the development layout, rather than just using space not wanted for housing. Where one or two fields are being developed, for example, a sensible planning method would be to put all on-site open spaces together in one central location, to ensure a maximum amenity standard and therefore optimum use.

11.5.11 The layout of the Manor Oak development places the green space adjacent to the main road, which makes them dangerous and severely limits their use. This will not be permitted in future developments.

11.5.12 Modern housing developments have much smaller gardens than older developments did. This places additional pressure on public space to provide for recreation and the wider environment.

11.5.13 Ownership and custodianship of open green spaces should primarily be taken on by the Town Council. Very small parcels of land on new developments which are of little public value should not be permitted. The Town Council has a policy of adopting green spaces wherever possible to avoid residents being obliged to pay service charges for their upkeep, subject to the space and land being

appropriate for use and adequate contribution being made by the developer towards future upkeep. An adequate contribution is defined as being the value required for 20 years of maintenance.

11.5.14 In order to create a healthy environment for Saffron Walden, all new development must provide adequate outdoors space for informal recreation. Even by applying the standards in the UDC Open Space Assessment report, the current deficit will not be removed, however from this point forwards it will not worsen. In order to meet the new standards, each new development must provide 75.1m² per person of green open space for informal recreation⁶⁰.

11.5.15 All open spaces catalogued by the UDC Open Spaces Assessment Report should be considered as Local Green Space, because their inclusion in the report means that they will be considered and referred to in the future as the baseline level of provision from the date of the publication of the report. In addition to those spaces catalogued by the report, the SWNP has identified additional spaces within the parish which it wishes to designate as Local Green Space. Maps and a listing of Local Green Spaces arising from the UDC Open Spaces Assessment Report are detailed in Appendix 5 – Open Spaces Audit. Maps and a listing of Local Green Spaces arising from the SWNP research are detailed in the Appendix 6 – Local Green Space Allocations.

⁶⁰ 7.51ha per thousand of population = 75,100m² per thousand of population = 75.1m² per person

POLICY SW27 OPEN SPACE FOR INFORMAL RECREATION

1. All new residential developments must provide 7.61ha per 1,000 people for informal recreation.
2. All new residential developments must provide a new play area. The design, creation and the location of play areas on developments will be agreed with the Town Council at reserved matters stage. They must be in locations central to the development, well-overlooked and built in durable materials.
3. The amenity greenspace as provided for in the open space requirements must be in a single well-placed location and not divided into small pockets. The “Litmus Test” as described in paragraph 11.5.9 must be considered. It must also be usable; any area which is unusable, sloping or by a road should not be counted towards the greenspace requirements.
4. A fenced and dedicated dog park in Saffron Walden would be welcomed.
5. Community projects to create or regenerate outdoors community amenity space will be welcomed for consideration.
5. Development land may not be divided into separate parcels so as to reduce the overall size of the development and reduce liability for provision for amenity space.
6. The amenity greenspace already catalogued in the Uttlesford District Council Open Space Strategy is designated as Local Green Space. Additional Local Green Space identified by the SWNP is designated in the Appendix 6 – Local Green Space Allocations. All Local Green space shall be protected from development.

This policy supports the Neighbourhood Plan Objectives 2,3,4,5

PUBLIC RIGHTS OF WAY

11.5.16 As Saffron Walden expands it becomes harder to access public rights of way across open space. While new consented development requires the preservation of rights of way, there is a huge difference in the amenity provided by a footpath through a housing development compared to a footpath at the side of a field. The picture below shows in green the footpaths radiating out through the open fields from Saffron Walden, and the greyed-out sections show areas consented for development.

11.5.17 The public rights of way within Saffron Walden and especially around the built-up areas of the town are an important asset. They provide a free-to-access escape from traffic and thus provide health and wellbeing benefits. The SWNP aims to retain these public rights of way. In retaining these rights of way, the SWNP recognises that it is not only the existence of the right of way, but also the setting, which provides the enjoyment, which must be safeguarded.

11.5.18 Where a development proposal is in a location on or near to any public right of way, careful consideration will be required for what impact the proposal may have on it and whether there is an opportunity to enhance the public right of way.

Maps showing public rights of way around Saffron Walden and Little Walden

OS PSMA LICENSE NUMBER: 0100057521

11.5.19 The HarCamLow Way is an especially important trail stretching 141 miles which provides opportunity for walking, cycling and horse riding. It is described by the Long Distance Walkers Association as *“A figure-of-eight walk, mainly on tracks and green lanes passing many places of historic interest, crossing low hills, woods and arable land via Standon and Manuden to meet the cross-over point at Newport. It continues through Saffron Walden and over the low Bartlow Hills to Horseheath and the Fleam Dyke, to enter Cambridge, the return route passing through Melbourn and Chrishall to Newport, continuing via Debden, Thaxted, Takeley and Hatfield Forest.”*⁶¹

11.5.20 Where the HarCamLow Way adjoins Saffron Walden to the north east of the town, it passes around arable fields and travels along the brow of a hill at highest point on that side of town. Without travelling far along the path away from the built-up area, it is possible to enjoy views stretching clearly over the whole of Saffron Walden and to the countryside beyond as is illustrated in the photos below.

⁶¹ www.ldwa.org.uk

11.5.21 Where the HarCamLow Way adjoins Saffron Walden to the West it passes along a public right of way through Audley End Park and then turns south along a route also known as Beechy Ride. All sections of the route, whether to the north east or south west of the town are very well used by local walkers and cyclists. Saffron Walden's location as a point on this route also has potential as an additional generator of tourism. Any development along or adjacent to the route would be severely detrimental to the amenity value of the route.

POLICY SW28 PUBLIC RIGHTS OF WAY

1. Development proposals that would obstruct or would result in a detrimental impact upon the enjoyment of a public right of way will not normally be allowed. This can include, but is not limited to:

- proposals for the creation of new dwellings;
- new buildings for commercial uses;
- for the change of use where the proposed use would materially increase the activity on site; or
- where the proposed use would result in an impact through size, noise, odour, light or other pollution,

where this would have the potential to diminish the accessibility or connectivity or tranquillity or the enjoyment of views and clean air that are intrinsic to the right of way.

2. Development that will be clearly visible from a public right of way should consider the appearance of the proposal from the right of way and incorporate green landscaping to reduce any visual impacts.

This policy supports the Neighbourhood Plan Objectives 2,3,4,5

LAND OF VALUE TO THE NATURAL ENVIRONMENT

11.5.22 The SWNP has a catalogued map of all areas of land within the Parish which are of environmental value. Most of them are in private ownership and in relatively remote locations, being adjacent to fields and not always with public footpaths through them or near to them. It is unlikely that these sites would ever be a consideration for development in the near future, although future generations may appreciate the fact that they are referenced in this plan. A map and table are in Appendix 8.

11.5.23 In 2018 the Government published a 25 Year Environment Plan to protect and enhance the environment and landscape. As an element of this, The Department for Environment, Food, and Rural Affairs is considering introducing legislation for conservation covenants. Conservation covenants will be agreements made between a landowner and a responsible body requiring either party to do or not do something on land. They will be made for the public good, and for the purpose of conserving, protecting, restoring or enhancing: (1) the natural environment, including flora, fauna or geological features of the land; (2) the natural resources of the land; (3) cultural, historic, archaeological, architectural or artistic features of the land; or (4) the surroundings, setting or landscape of any land

which has any of these features. The conservation covenant may contain provision for public access to the land concerned. Conservation covenants once in place become material considerations for planners, and the SWNP supports their creation in any relevant area in Saffron Walden parish.

11.5.24 Saffron Walden as a whole has no publicly accessible woodland. Both the environment and the population would benefit from the creation of woodland which is freely available for the public to visit. The Woodland Trust has conducted research into the benefits of publicly accessible woodland, and recommends:

- That no person should live more than 500m from at least one area of accessible woodland of no less than 2ha in size; and
- That there should also be at least one area of accessible woodland of no less than 20ha within 4km (8km round trip) of people's homes.⁶²

POLICY SW29 LAND OF VALUE TO THE NATURAL ENVIRONMENT

1. Sites of value to the natural environment which are close to the town of Saffron Walden and which are of benefit to the community are listed in Appendix 8 and are designated as Local Green Space. These sites are protected from development.
2. The creation of a publicly accessible woodland adjacent or very close to the town of Saffron Walden would be supported.

This policy supports the Neighbourhood Plan Objectives 2,3,4,5

⁶² Woodland Trust's Woodland Access Standard: Published in *Residential developments and Trees A guide for planners and developers* January 2019

12. ARTS AND CULTURAL FACILITIES

12.1 The strong arts and culture community in Saffron Walden is an asset to the town and continuing support for it meets the objectives of the SWNP.

12.2 On an economic note, public art and cultural events can and do boost and build upon the town's aesthetic appeal, increasing local and visitor footfall and providing commercial opportunities for local businesses. This helps the town to remain economically active and self-sustaining.

12.3 Public art and cultural events contribute to helping people live healthy lives. An Inquiry Report published in June 2017 by the All-Party Parliamentary Group on Arts, Health and Wellbeing delivered three key messages: 1) "The arts can help keep us well, aid our recovery and support longer lives better lived." 2) "The arts can help meet major challenges facing health and social care: ageing, long-term conditions, loneliness and mental health." 3) "The arts can help save money in the health service and social care".

12.4 This finding is endorsed by Government planning policy

NPPF Paragraph 93: "To provide the social, recreational and cultural facilities and services the community needs, planning policies and decisions should:

a) plan positively for the provision and use of shared spaces, community facilities (such as local shops, meeting places, sports venues, open space, cultural buildings, public houses and places of worship) and other local services to enhance the sustainability of communities and residential environments;

b) take into account and support the delivery of local strategies to improve health, social and cultural well-being for all sections of the community;"

12.5 Publicly accessible art and cultural events help to sustain the market town feel of Saffron Walden, which is enjoyed by residents and visitors alike. Proposals for cultural events will be supported, especially those that can be accessed by individuals and families on low incomes.

12.6 The town benefits from a strong and varied diary of community events, all free to attend, including: a tri-annual 8-day carnival, a tri-annual Maze Festival, and the tri-annual Fete de la Musique. The market square hosts an annual Dance in the Square, Cinema in the Square and Christmas Lights events. The annual firework display is held on The Common

12.7 The town also has the Fry Art Gallery, Saffron Walden Castle and the Museum, Bridge End Gardens, Saffron Hall (a globally recognised concert hall) and a local community cinema, Saffron Screen. An English Heritage site, Audley End House, lies just outside the town. Local amateur theatre groups stage performances at the Town Hall.

12.8 Most of the events and organisations are staffed wholly or in great part by volunteer groups including Saffron Arts Trust, Saffron Walden Initiative, Saffron Walden Round Table,

Saffron Hall Trust and Saffron Walden Community Cinema Ltd, and numerous other arts groups.

12.9 The arts and culture groups have identified gaps in infrastructure which, if filled, would enable them to further broaden their offer. These gaps include more space for studio bookings, art and cultural exhibitions, stage shows and concerts, and more capacity for film screenings.

12.10 Saffron Walden Museum is the district museum service for Uttlesford, operated by Uttlesford District Council under a management agreement with Saffron Walden Museum Society Ltd (a registered charity). The grounds of the Museum, a grade II listed building, built in 1834, sit in the bailey of Walden Castle, and the whole site is a Scheduled Monument. Historic England has carried out a major conservation project to enable the Castle keep to be opened to the public. The Museum has long-term plans for upgrading and expanding its offer and has already been granted Resilient Heritage lottery funding. This funding will enable the Museum to explore ways to develop and improve the Museum building (sympathetically to and within the restrictions of its site), and to develop and improve its service and activities, with the aim of increasing visitors, community engagement, income and sustainability, and ultimately to solidify its position as the 'heritage hub' of the town and the district. The SWNP fully supports this project.

12.11 Saffron Screen is a 200-seat single screen community cinema based at County High School. The service it provides is constrained by the fact that it shares a hall with the High School; for example, it cannot get new films because they must be shown for 7 consecutive days and the hall does not have the bookings capacity to offer this. Ideally, in order to achieve economies of scale for management, and provide the fullest programme, it seeks a site whereby it can have 3 screens of approximately 160, 120 and 80 seats. With retractable seating the spaces could be used for other events. A café/bar area would be essential for revenue and to enhance the visitor experience. The current location at the High School is on the edge of the town, so visitors tend to drive to it and then return straight home after the screening. A new site within the town would encourage people to walk or use the town centre public car parks and this would boost the evening economy in the town centre.

12.12 Fairycroft House is an arts and media centre within the town. A 19th Century building, formerly a large home, since the 1950s it has hosted youth activities and in 2016 was sold by Essex County Council to a Community Interest Company (CIC). It serves all age groups and offers a range of arts and media activities including music, singing, dance and drama, as well as youth counselling services. It has soundproofed rooms for bands to practise, a professional-level recording studio, and larger multi-use rooms. The CIC has plans for expansion over the next two years (from 2019) and has identified a number of changes that can be made to the building which will increase capacity and extend the possibilities for usage for various events and classes.

12.13 The Tourist Information Centre (TIC), run by the Town Council, provides a huge service to visitors and residents, with ticket sales and other services for residents complementing the services for visitors. Some 118,000 people visit the TIC each year. The space currently available to the TIC is limiting expansion of services.

12.14 Current planning policies seek to transform town centres away from being 'retail-only' spaces and more towards being 'community gathering' spaces. These community gathering spaces will include retail, work, leisure and living units, and can return town centres to the vibrant locations they were before large out-of-town sites became dominant.

12.15 As a way of filling the gaps in the cultural infrastructure as identified by the arts groups, and to meet with current planning policy thought, the SWNP would welcome the construction of additional multi-purpose arts centre space in Saffron Walden. A town centre location for this would be essential to encourage cross-usage with other arts venues and local businesses and to ensure that the town centre as a whole can gain a maximum benefit from the project.

12.16 Fairycroft House successfully provides arts groups with space for classes, rehearsals and performances. For the purpose of policies on arts facilities, the footprint of the Fairycroft site is considered to be 'town centre'.

POLICY SW30 ARTS AND CULTURAL FACILITIES

1. Proposals for new public art will generally be supported, subject to any site-specific considerations.
2. A community cinema and/or an arts centre would be supported, subject to it being in a town centre location or at or next to the Fairycroft site
3. Contributions from development will be sought towards arts and arts facilities.

This policy supports the Neighbourhood Plan Objectives 1,2,4,5

13. EDUCATION

13.1 Essex County Council has full responsibility for provision of education and sets contribution rates for developers. ECC also sets out specifications for school sites, which if followed will make any new school sites sustainable from a planning perspective, and which are therefore fully supported by the SWNP.

13.2 Public consultations demonstrated widespread concern about a lack of school places available in Saffron Walden. This concern was supported by the report *Commissioning School Places in Essex 2016-2021* which forecasted deficits in Saffron Walden of 138 secondary school places and 102 primary school places by 2021.

13.3 Statistical forecasts appear to have shifted since then. The Parliamentary Under Secretary of State for the School System officially announced in March 2016 that there was no need for an additional primary school as the population of young children is growing more slowly than forecast, possibly because the current housing developments are attracting older families.

13.4 The SWNP expects this demographic to shift again, as it puts more focus on building homes for younger families, which will in turn increase the birth-rate and become a driver for the need for additional primary school places. It is likely that this need will arise in the east of Saffron Walden, which has seen the most new development.

13.5 A site for a single form entry primary school at the east of the town was secured as part of a planning condition for application UTT/13/3467/OP. This site would be augmented to a two-form entry primary school as part of the planning application UTT/17/2832/OP. These sites must be reserved for educational use, or for community use unless or until they are required for educational use.

13.6 An additional secondary school is unlikely to be forthcoming, as the funding for this would require development of around 2,000 additional homes, and the current transportation infrastructure would not support this level of development. However, the current constraint on places at Saffron Walden County High School may need to be addressed in the near future.

13.7 The County Council, in response to planning applications submitted in 2018, noted that there are zero unfilled places in early years childcare. The CIC or Community Interest Company structure is more likely to be able to deliver a feasible early years childcare business than a purely profit-driven organisation.

13.8 Adult and Community Learning (ACL) Essex offers a limited number of adult education courses at 37-39 Fairycroft Road, and for all other courses adult students travel out of the town or do online courses. Additional facilities provision for adult and vocational courses will be welcomed.

13.9 The SWNP strongly supports the retention of a single high school which serves the whole town.

13.10 The library in Saffron Walden is located in the former Corn Exchange situated on the Market Square. This site puts this educational and cultural facility in the centre of Saffron Walden and change of use for this building will not be supported.

POLICY SW31 EDUCATION

1. Planning application for early years childcare provision will be supported, where the potential provider has assessed that there is a local need.
2. The land allocated in planning applications UTT/13/3467/OP and UTT/17/2832/OP for a primary school must be reserved for educational use, or for community use unless or until required for educational use.
3. Change of use for the Corn Exchange which houses the library will not be supported.
4. Planning applications and provision for a separate 6th Form College, or expansion of Saffron Walden County High School (SWCHS) onto a separate site to allow space for SWCHS to expand will be supported.

This policy supports the Neighbourhood Plan Objectives 1,2,5

14. HEALTHCARE

14.1 Alongside the medical practices, the NHS has responsibility for provision of healthcare and sets the rates that developers pay to mitigate additional demand created by development.

14.2 Healthcare provision in Saffron Walden is provided by two GP surgeries and some services available at the Community Hospital. The hospital has two geriatric wards but otherwise offers out-patient care only. The nearest maternity services are at Addenbrookes Hospital in Cambridge (14 miles away) and for mental health services patients must either travel out of town or see staff who travel into the town specifically for appointments. The nearest walk-in health centre is in Bishop's Stortford (11.5 miles away) and the nearest 24hr and A&E care is in Cambridge.

14.3 One of the surgeries is split across two sites, with one in Saffron Walden and the other in Great Chesterford, 4.5 miles away. Both practices are based in old buildings which are not easily enlarged. Public consultation for the SWNP revealed high levels of concern that doctors' surgeries are overstretched and that the town needs a bigger and more sophisticated 'state of the art' health centre.

14.4 The response made by the West Essex Clinical Commissioning Group to a major planning application in 2018 (UTT/18/0824/OP) confirms that primary healthcare provision in Saffron Walden is already under capacity by almost 500m².

14.5 The eLP identifies the Saffron Walden Community Hospital (2.25ha) as a site which is to be "*safeguarded for healthcare unless it can be demonstrated that the land or buildings are surplus to the operational healthcare requirements of the NHS*". The SWNP considers that this site, which is reasonably well served by public transport, is accessible on foot, and which is also accessible by private car, would be suitable for a full health centre.

14.6 Saffron Walden has several dental practices; however, in consultations residents regularly note that there are not enough NHS appointments available. Additional NHS practices would be welcomed.

POLICY SW32 HEALTHCARE

1. Planning applications and provision for a community health centre in the town of Saffron Walden will be supported, subject to the following criteria:
 - (a) The site is accessible by public transport;
 - (b) The site is accessible on foot;
 - (c) The site is accessible by car; and
 - (d) Sufficient parking is provided.

2. The creation of a combined community health centre at the current community hospital will be supported.

This policy supports the Neighbourhood Plan Objectives 1,2,5

APPENDIX 1 – STRATEGIC LOCAL PLAN POLICIES

UTTLESFORD DISTRICT COUNCIL CONSIDERS THE FOLLOWING ADOPTED LOCAL PLAN (2005) POLICIES “STRATEGIC” FOR THE PURPOSES OF NEIGHBOURHOOD PLANNING:

- Policy S1 Development Limits for the Main Urban Areas
- Policy S3 Other Development Limits
- Policy S4 Stansted Airport Boundary
- Policy S7 The Countryside
- Policy GEN 1 Access
- Policy GEN 2 Design
- Policy GEN 3 Flood Protection
- Policy GEN 4 Good Neighbourliness
- Policy GEN 6 Infrastructure Provision to support Development
- Policy Gen 7 Nature Conservation
- Policy E1 Distribution of Employment Land
- Policy E2 Safeguarding Employment Land
- Policy ENV 1 Design of Development within Conservation Areas Policy
- ENV 5 Protection of Agricultural Land Policy
- ENV 7 The Protection of the Natural Environment (Designated Sites)
- Policy ENV 9 Historic Landscapes
- Policy ENV 10 Noise Sensitive Development and Disturbance from Aircraft
- Policy H 1 Housing Development (Not consistent with NPPF – LPA required to identify 5-year land supply with additional 5% buffer, increased to 20% if there is a record of persistent under delivery of housing)
- Policy H 3 New Houses within Development Limits
- Policy H 9 Affordable Housing
- Policy H 11 Affordable Housing on “Exception Sites”
- Policy LC 2 Access to Leisure and Cultural Facilities
- Policy RS 1 Access to Retailing Centres
- Policy RS 2 Town and Local Centres
- Policy RS 3 Retention of Retail and Other Services in Rural Areas
- Policy T 1 Transport Improvements

UTTLESFORD DISTRICT COUNCIL CONSIDERS THE FOLLOWING EMERGING LOCAL PLAN POLICIES “STRATEGIC” FOR THE PURPOSES OF NEIGHBOURHOOD PLANNING:

- Policy SP 1 Presumption in favour of Development
- Policy SP 2 The Spatial Strategy 2011- 2033
- Policy SP 3 The Scale and Distribution of Housing Development
- Policy SP 4 Provision of Jobs
- Policy SP 5 Garden Community Principles
- Policy SP 6 Easton Park Garden Community
- Policy SP 7 North Uttlesford Garden Community
- Policy SP 8 West of Braintree garden Community
- Policy SP 9 Development within Development Limits

- Policy SP 10 Protection of the Countryside
- Policy SP 11 London Stansted Airport
- Policy SP 12 Sustainable Development Principles
- Policy H 1 Housing Density
- Policy H 2 Housing Mix
- Policy H 6 Affordable Housing
- Policy H 9 Sites for Gypsies, Travellers and Travelling Showpeople
- Policy EMP 1 Employment Strategy
- Policy EMP 2 Existing and Proposed Employment Areas
- Policy EMP 3 Rural Economy
- Policy RET 1 Town and Local Centres
- Policy RET 2 The Local an Impact of New Retail Development
- Policy RET 4 Loss of Shops and Other Facilities
- Policy TA 1 Accessible Development
- Policy TA 2 Sustainable Transport
- Policy TA 5 New Transport Infrastructure or Measures
- Policy INF 1 Infrastructure Delivery
- Policy INF 4 High Quality communications Infrastructure and Broadband
- Policy D 1 High Quality Design
- Policy D 4 Design Frameworks and Codes
- Policy D 8 Sustainable Design and Construction
- Policy EN 1 Protecting Historic Environment
- Policy EN 8 Design of Development within Conservation Areas
- Policy EN 11 Surface Water Flooding
- Policy C 1 Protection of Landscape Character
- Policy SAF 1 Land North of Thaxted Road
- Policy SAF 8 Land South of Radwinter Road
- Policy SAF 10 Residential Commitments
- Policy SAF 11 Land North of Ashdon Road
- Policy SAF 13 Land at Thaxted Road
- Policy M 1 Monitoring and Review
- Policy M 2 Implementation and Monitoring of Strategic projects

APPENDIX 2 – AIR QUALITY MANAGEMENT AREA

Defra Website July 2018 www.uk-air.defra.gov.uk:

Since December 1997 each local authority in the UK has been carrying out a review and assessment of air quality in their area. This involves measuring air pollution and trying to predict how it will change in the next few years. The aim of the review is to make sure that the national air quality objectives will be achieved throughout the UK by the relevant deadlines. These objectives have been put in place to protect people's health and the environment.

If a local authority finds any places where the objectives are not likely to be achieved, it must declare an Air Quality Management Area there.

In 2009 Defra declared 3 small Air Quality Management Areas (AQMAs) in Saffron Walden.

In 2012 further monitoring of air quality in Saffron Walden resulted in a larger AQMA being declared which covers the central area of the town. The figure below illustrates the radius.

Source: Uttlesford District Council Air Quality Action Plan 2017-2022,

Figure 3 Map of AQMA Boundary showing diffusion tube locations

APPENDIX 3 – TRANSPORT WISH LIST

Sustainable development must take into account the health and well-being for future generations as well as meeting immediate needs.

For reasons of improved mental and physical health and wellbeing, sustainable development is therefore inextricably linked to the reduction of private car journeys and a “modal shift” towards walking and cycling as much as possible, and towards public transport where distances are too far for these first options.

The Saffron Walden Neighbourhood Plan supports the following infrastructure improvements to help encourage people to walk or cycle for shorter journeys. This is not an exhaustive list and is in no particular order.

FOR CYCLISTS

	Location	Description
1.	Battle ditches from Abbey Lane to Saxon Way -	Widen existing tarmac path to permit cycle path (no need to separate) along top of battle ditches, as per 1998 ECC Cycle Strategy proposal, which establishes continuity between the town centre and the cycle route along Wenden Road (via Abbey Lane, the battle ditches and Saxon Way)
2.	Abbey Lane	Make two-way for cycling up to High St junction
3.	Gold St	Make 2-way for cyclists. Enables cyclists to reach the town centre from the south avoiding the High St / George St junction
4.	Audley Road	Make 2-way for cyclists between Station Street and Faircroft Road (change of signs and signage on carriageway or formal path as preferred)
5.	Market Row	Make 2-way for cyclists
6.	Museum Street	Make 2-way for cyclists
7.	London Road / Gibson Gardens	Remove cycle prohibition on cut through behind UDC offices
8.	King Street	Possibly introduce an advisory lane or just allow 2-way cycling (change of signs and signage on carriageway)

9.	South Road	Make 2-way for cyclists (change of signs and signage on carriageway - space for formal cycle path in parts potentially?)
10.	Market Hill	Make 2-way for cyclists (change of signs and signage on carriageway - no space for formal cycle path)
11.	High St / Park Lane	Cycle access on cut through between High St and Park St - dropped kerb if not installed as part of High St crossing
12.	Ashdon Road	On wide pavement on south side, delineate part as cycle path between Elizabeth Way and Hollyhocks Road - should just require white line and carriageway markings
13.	Hinxton to Saffron Walden	Introduce cycle route
14.	Wimbish to Saffron Walden	Introduce cycle route

FOR PEDESTRIANS

	Location	Description
1.	Church Street / Museum street / Market Hill	Improve the crossing facilities at this junction
2.	Debden Road junction w. London Road	Improve the crossing safety at this junction e.g. by introducing a pedestrian refuge
3.	Audley End Road between Copperfields and County High School	Improve the desirability of this footpath; upgrade the surface from mud to tarmac and add lighting
4.	Market Square	Part or wholly pedestrianise
5.	Junction of Castle Street and High Street/Bridge Street	Improve the crossing safety at this junction
6.	Raised table across Ashdon Road at De Bohun Court	Formalise crossing point by e.g. by making it a zebra crossing
7.	Junction of Highfields and Ashdon Road	Make it safer to cross Ashdon Road at the bottom of Highfields
8.	Little Walden Road by Caton Lane	Add double yellow lines to make this junction safer
9.	Ashdon Road north side between	Formalise desire line (mud path) and install tarmac footway

	Whiteshot Way and Harvey Way	
10.	Ashdon Road crossing next to Harvey Way	Install a zebra crossing
11.	Ashdon road roundabout next to Clutton Road and De Vigier Avenue	Improve the crossing safety at this junction e.g. by introducing a pedestrian refuge
12.	High Street crossing between Park Lane and King Street	Install a pedestrian crossing
13.	Newport Road	Pedestrian crossing near Beeches Close
14.	Little Walden Road crossing adjacent to Pound Walk	Install a pedestrian crossing
15.	Landscape View crossing between Rowntree Way and Hill Top Lane	Install a pedestrian crossing
16.	London Road near UDC offices	Install a pedestrian crossing
17.	Whole town of Saffron Walden	Introduce 20mph speed limits to improve safety throughout town.

APPENDIX 4 – DESIGN OF SUSTAINABLE DRAINAGE SYSTEMS

Sustainable Drainage Systems (SuDS) should always be carefully considered in discussions with the Lead Local Flood Authority.

However, any drainage system must not pose a risk to groundwater quality and must not be constructed in ground affected by contamination.

The Environment Agency sustainable planning services provides the following general requirements:

“

1. *Infiltration SuDS such as soakaways, unsealed porous pavement systems or infiltration basins shall only be used where it can be demonstrated that they will not pose a risk to the water environment;*
2. *Infiltration SuDS have the potential to provide a pathway for pollutants and must not be constructed in contaminated ground. They would only be acceptable if a phased site investigation showed the presence of no significant contamination;*
3. *Only clean water from roofs can be directly discharged to any soakaway or watercourse. Systems for the discharge of surface water from associated hard-standing, roads and impermeable vehicle parking areas shall incorporate appropriate pollution prevention measures and a suitable number of SuDS treatment train components appropriate to the environmental sensitivity of the receiving waters;*
4. *The maximum acceptable depth for infiltration SuDS is 2.0 m below ground level, with a minimum of 1.2 m clearance between the base of infiltration SuDS and peak seasonal groundwater levels; and*
5. *Deep bore and other deep soakaway systems are not appropriate in areas where groundwater constitutes a significant resource (that is where aquifer yield may support or already supports abstraction). If deep soakaways are proposed you should contact us, as an environmental permit maybe needed.*

Further information can be found in the SuDS Manual (CIRIA C753, 2015), the Susdrain website (<http://www.susdrain.org/>) and the draft National Standards for SuDS (Defra, 2015).

Foul Drainage from new developments should connect to the public mains sewer, wherever possible. Government guidance contained within Planning Policy Guidance and building regulations drainage and waste disposal approved document H provides a hierarchy of drainage options that must be considered and discounted in the following order:

- *Connection to the public sewer;*
- *Connection to a private sewer, communicating with a public sewer;*
- *Either a septic tank or another wastewater treatment system; and*
- *A cesspool*

If you are unable to connect to the mains sewer, your planning application should outline how you will deal with foul drainage discharge. You should include evidence as to why it is not possible to connect to the mains system, including details of any prohibitive costs. Please note that some 'non-mains' foul drainage systems will require an environmental permit, as well planning as permission.

“

APPENDIX 5 – OPEN SPACES AUDIT

Table listing open space provision as identified by UDC Open Spaces Assessment and Strategy

Site name	See map:	Typology	Size (ha)	Accessible? *
Anglo American Playing Fields	Open Space North West	Accessible Green-space	0.9471	YES
Crocus Fields allotments	Open Space North West	Allotment	1.0093	YES
Little Walden Road allotments	Open Space North West	Allotment	1.072	YES
Peaslands Road allotments	Open Space South East	Allotment	0.3648	YES
Radwinter Road allotments	Open Space North West	Allotment	0.2929	YES
Windmill Hill allotments	Open Space North West	Allotment	2.6815	YES
Greenways	Open Space South West	Accessible Green-space	0.3331	YES
Greenways play area	Open Space South West	Accessible Green-space	0.0117	YES
Monk's Hill	Open Space South East	Accessible Green-space	0.7251	YES
Museum Street	Open Space North West	Accessible Green-space	0.8538	YES
Tukes Way AGS (Leisure Centre)	Open Space South East	Accessible Green-space	1.9881	YES
Anglo American Playing Fields play area	Open Space North West	Children's Playground	0.1076	YES
Claypits Plantation BMX	Open Space South West	Children's Playground	0.62	YES
Common play area	Open Space North West	Children's Playground	0.1023	YES
Long Horse Close play area	Not mapped but listed in UDC report	Children's Playground	0.2611	YES
Petlands play area	Not mapped but listed in UDC report	Children's Playground	0.3017	YES
Thaxted Road (One Minet) skate park	Open Space South East	Children's Playground	0.3272	YES
Bridge End Gardens	Open Space North West	Parks and Gardens	3.0021	YES
Common Hill (The Common)	Open Space North West	Parks and Gardens	5.5329	YES
Bridge Street	Open Space North West	Parks and Gardens	0.0855	YES
Dorset House	Open Space North West	Parks and Gardens	0.0604	YES
Jubilee Garden	Open Space North West	Parks and Gardens	0.1892	YES
Claypits Plantation	Open Space South West	Natural/Semi-natural Greenspace	0.5005	YES
The Green Little Walden Road	Open Space North West	Natural/Semi-natural Greenspace	0.2317	YES
De Vigier Avenue	Open Space North West	Natural/Semi-natural Greenspace	0.5031	NO
Beeches Close	Open Space South West	Accessible Green-space	0.2061	NO

Blacklands Close and Seven Devils Lane	Open Space South West	Accessible Green-space	1.6838	NO
Elizabeth Way 1	Open Space North West	Accessible Green-space	0.2884	NO
Elizabeth Way 2	Open Space North West	Accessible Green-space	0.293	NO
			24.576	

* Accessible – usually yes unless it is a roadside verge or deliberately left overgrown to benefit the environment

NPPF LOCAL GREEN SPACE

In order to meet the NPPF requirements to be listed as Local Green Space, these sites must meet the following requirements (paragraph 100):

“(a) In reasonably close proximity to the community it serves”

These sites meet these criteria as evidenced by their locations, mapped below – they are all within or at the edge of the town.

“(b) demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife”

These sites meet these criteria as evidenced by their listing in the UDC Open Space Assessment and Strategy

“(c) local in character and is not an extensive tract of land”

These sites meet these criteria as demonstrated by their mapped locations and data on the small size of the sites.

In meeting these requirements, these sites are listed as Local Green Space.

APPENDIX 6 – LOCAL GREEN SPACE ALLOCATIONS

ADDITIONAL OPEN SPACES IDENTIFIED BY THE SWNP

In addition to the spaces catalogued by the Uttlesford district Council Open Spaces Assessment and listed as Local Green Spaces in Appendix 5, the SWNP has identified additional spaces to be listed as Local Green Spaces. The SWNP considers that these are simple omissions from the UDC Open Spaces Assessment. They are mapped below and the table below provides evidence that they meet the criteria as set out in Paragraph 100 of the NPPF.

ADDITIONAL ALLOTMENTS (3 SITES) BIRDBUSH AVENUE NORTH, BIRDBUSH AVENUE SOUTH, LAWS CLOSE SOUTH

OS PSMA LICENSE NUMBER: 0100057521

ADDITIONAL PLAY AREAS (2 SITES) WHITESHOT WAY AND HOWLAND CLOSE

OS PSMA LICENSE NUMBER: 0100057521

ADDITIONAL SPORTS FIELD – HERBERTS FARM

OS PSMA LICENSE NUMBER: 0100057521

ADDITIONAL SPORTS FIELD – LIME AVENUE

OS PSMA LICENSE NUMBER: 0100057521

ADDITIONAL SPORTS FIELD AND LAND OF ENVIRONMENTAL VALUE – FORMER FREINDS (WALDEN) SCHOOL

OS PSMA LICENSE NUMBER: 0100057521

ADDITIONAL LAND OF ENVIRONMENTAL VALUE – LAND ADJACENT TO LIME AVENUE FOOTBALL PITCH

OS PSMA LICENSE NUMBER: 0100057521

ADDITIONAL LAND ON ENVIRONMENTAL VALUE – LAND ADJACENT TO BLOOR HOMES / RIDGEONS DEVELOPMENT

OS PSMA LICENSE NUMBER: 0100057521

Reference	Description	Owner	Approx. size in Ha	NPPF Paragraph 100 defines the criteria for Local Green Spaces: <i>The Local Green Space designation should only be used where the green space is:</i>		
				(a) In reasonably close proximity to the community it serves	(b) demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife	(c) local in character and is not an extensive tract of land

ALLOTMENTS

Mapped above	Birdbush Avenue North	UDC	0.058	Yes	Currently in use as an allotment	Yes, Yes
Mapped above	Birdbush Avenue South	UDC	0.100	Yes	Currently in use as an allotment	Yes, Yes
Mapped above	Laws Close South	UDC	0.105	Yes	Currently in use as an allotment	Yes, Yes

PLAY AREAS

Mapped above	Whiteshot Way Green	UDC	0.0821	Yes, surrounded by houses	Yes, well used	Yes, Yes
Mapped above	Tudor Park Play Area (adjacent to Howland Road)	Persimmon Homes (due for transfer to SWTC)	0.1504	Yes, surrounded by houses	Yes, well used	Yes, Yes

SPORTS FIELDS

Mapped above	Herberts Farm	SWTC	3.2624	At the edge of the town	Yes, well used	Yes, and size is appropriate for sports
Mapped above	Lime Avenue	Persimmon Homes (due for transfer to SWTC)	2.0171	Yes, surrounded by houses	Yes, well used	Yes, and size is appropriate for sports
Mapped above	Former Friends Walden school	Chase New Homes	6.0641	Yes, surrounded by houses	Yes, was well used prior to closure of school	Yes, and size is appropriate for sports

LAND OF BENEFIT TO THE ENVIRONMENT

Mapped above	Former Friends Walden school	Chase New Homes	0.9140	Yes, surrounded by houses	Yes, not accessible and hosts a considerably biodiverse wildlife population	Yes, Yes
Mapped above	Land adjacent to Lime Avenue sports pitches	Persimmon Homes (due for transfer to SWTC)	2.8045	At the edge of the town	Yes, SWTC plans for tree planting	Yes, Yes
Mapped above	Land adjacent to Bloor Homes / Ridgeons development		2.9011	At the edge of the town	Yes, not accessible and hosts a considerably biodiverse wildlife population	Yes, Yes

APPENDIX 7 – COMMUNITY CENTRE SURVEY RESPONSES

	1. Do you have any indoors space or spaces that can be hired by community groups or clubs?	2. What sort of activities is the space used for?	3. How many days/hours per week is the space available for hire?	4. Roughly speaking, what is your occupancy rate?	5. If you find that you turn bookings down because of capacity or suitability of use, please describe the issues.	6. Please let us know here if you have any other comments or suggestions regarding indoor community spaces in Saffron Walden.
Almshouses	Yes	Various groups use it. We do not accept parties for young children. Current examples are craft clubs, yoga, drama and bingo	available most times – have to phone to check.	Sometimes booked	turn bookings down if the Trustees are having meetings or the booking is for a noisy activity (have to take into account the residents living here)	
URC Hall	Yes	A wide range. Pre-school, Yoga, U3A Art, Line Dancing, Badminton, Scouts, Cubs, Guides, Girls' Brigade, plus ad hoc, parties, quiz nights, socials etc. Some of these are church-affiliated, most are not.	6 ½ days/week	generally booked	Generally booked' becomes 'fully booked' in the context of weekday evenings. We have recently had to turn away a number of applications	Pressure for this sort of space has increased considerably since the closure of the Friends School
Golden Acre Community Centre	Yes	Sports clubs, performing arts, pre -school classes, language classes, polling station christening receptions & wakes	The hall is available 9am – 9pm 7 days a week	always fully booked	We do not have the time available that people want as the hall is so busy.	We need another Community Centre that is available like the Golden Acre for people to book time slots for their classes, especially a hall that is on one floor with no steps for disabled facilities
Lord Butler Leisure Centre	Yes	Sports and a meeting room	7 days	GENERALLY FULLY BOOKED DURING THE EVENINGS AND ONLY SOMETIMES BOOKED DURING THE DAY (WEEK DAYS).	WE ONLY TURN BOOKINGS AWAY IF WE HAVE NO AVAILABILITY.	
New Life church	Yes	(e.g. sports, arts/crafts, hobby or games clubs, performing arts, pre-school, services for the elderly)	The room at the front can be hired out every day except Sunday morning. We have our own Toddler Group on a Wednesday morning	generally booked	Sometimes I have had to turn people away as some days seem to be more popular than others! Plus, as we are a church, certain activities are not allowed on the premises.	

			too. The room is also hired out in the evenings.			
Parish Rooms	Yes	Church Groups, Sunday school, Youth Groups, Mothers Union etc, Uniformed groups i.e. Rainbows, brownies and guides; Community Choir, Children's dance and movement group, baptism parties etc, church functions	5 days per week and occasionally on Saturdays			
RA Butler School	Yes	Evening lettings e.g. sports clubs	Mon-Fri 5pm - 8pm, some daytime availability during school holidays	Already booked on the days needed, limited timings available		
Saffron Walden County High School	Yes	Sports in the sports centre and performing arts in the small drama hall	The space is available Monday – Saturday every week apart from 2 weeks closure at Christmas and bank holidays. We also may have to close if there is a big school event such as Open Evening. The hours are 6pm – 10pm Monday – Friday and 8am – 1pm on Saturday	Always fully booked with regular users	We turn people away purely because the available space we have is fully booked.	We have had lots of enquiries from Dance groups, Badminton Groups and theatre groups but we are unable to accommodate because we have limited space and availability.
Quaker Meeting House	Yes	Lectures, meetings, exercise classes, yoga, rehearsals, counselling	8am-10pm	Majority of hires are in evenings when it is generally booked. At other times it is partly booked.	Sometimes we don't have space available when people need it and will turn down bookings which we think are inconsistent with Quakers values. Other than that parking is the only issue.	

Town Hall	Yes	meetings, concert & shows, sales, fashion shows and open events, Pilates, yoga, kids acting classes, training meetings	6 days a week, 7 by negotiation	generally booked	The building being old does not warrant big musical events the capacity does not allow this, also we have things on that are booked years in advance so we have to turn away because of availability at the time.	Another community centre in the town that does not have as many restrictions as an old building gives in term of size and disabled access would be a very welcome space in Saffron Walden
------------------	-----	--	---------------------------------	------------------	---	---

APPENDIX 9 – SITE ALLOCATIONS

Policy SAF 3**Land at Viceroy Coaches, to rear of 10-12 Bridge Street****Quantum of Development:** 10 No. dwellings**Site Area:** 0.25 hectares

Land at Viceroy Coaches, to r/o 10 – 12 Bridge Street, Saffron Walden, as shown on the Policies Map, is allocated for the development of approximately 10 dwellings. Detailed proposals that comply with other relevant policies and meet the following site specific development requirement will be permitted:

1. The development provides for a mixed and balanced community;
2. Development respects the amenity of existing dwellings adjoining the site;
3. A Transport Assessment may be required to support a planning application and appropriate access arrangements to be agreed and to the satisfaction of the highway authority;
4. A Landscape and Visual Impact Assessment will be required and should inform the design and layout of the site proposals;
5. Appropriate ecological survey will be required;
6. Development will need to be implemented in accordance with design guidance approved by the Council and other Development Management policies.
7. Implementation of the proposals will be regulated by legal obligation in association with the grant of planning permissions;
8. Development does not have an adverse impact on Conservation Area and does not impact upon the Listed building of 12 Bridge Street.

Site Description: This is a brownfield site located in the north western part of Saffron Walden. Site is bound by a public house to the north, residential properties to the south and west and Bridge End Gardens to the east.

Constraints: Site is within a Conservation Area. There is a listed building on the site frontage and there are numerous listed buildings surrounding the site. Any proposals on site will need to demonstrate that they will not impact upon the setting of the Conservation Area, the listed building on site and adjacent listed buildings. AQMA - Site is within the Saffron Walden AQMA and will need to demonstrate that the development proposal will not have an adverse impact on the AQMA.

Did the site have planning permission at 1st April 2017: No

PLAN MONITORING AND DELIVERY

Two measures will be in place to promote the monitoring and delivery of the SWNP.

1. The Chair of the Town Council Planning and Road Traffic Committee will report to the Full Council on progress of delivery of the Neighbourhood Plan at the Annual Meeting.
2. The Policies in the Saffron Walden Neighbourhood Plan will be referenced in all Town Council responses to planning applications.
