

# Tattooing and body piercing guidance

## PART B – Appendix 08

### Template protocol for environmental cleaning of premises

ITEM	FREQUENCY	METHOD
<b>High risk treatment surfaces</b>	After use	Treatment area surfaces cleaned and dried between clients using detergent and then disinfected using a bleach solution (1000 ppm)  Use disposable cloths/paper towels
<b>Non high risk surfaces</b>	At least daily	Use general-purpose detergent  Dry thoroughly  Use disposable cloths/paper towels
<b>Hand wash basins and sinks</b>	Daily	Standard detergent
<b>Floors</b>	Daily	Mop with water and detergent  Disinfectant is required only after contamination with blood spillages
<b>Bins</b>	As required	Empty bins daily.  If contaminated, clean with water and detergent and then disinfect
<b>Couches</b>	Between clients	Wipe with hot, soapy water and dry thoroughly  Clean with disinfectant against blood borne viruses if contaminated with blood
<b>Walls/ceilings</b>	As required	Routine cleaning not required  Clean periodically with water and general purpose detergent  Clean with disinfectant against blood borne viruses if contaminated with blood
