

UTTLESFORD DISTRICT COUNCIL

**HOUSING TRAJECTORY AND 5-YEAR LAND SUPPLY STATEMENT
1 April 2018**

Diagram 1: - HOUSING COMPLETIONS AND TRAJECTORIA 2011 TO 2033

Introduction

1. The purpose of this Statement is to set out the Council’s 5 year housing supply and an indicative trajectory of housing delivery during the plan period for the purposes of decision-making. The 5 year period covers the period 2018/19 to 2022/23.
2. The 5-year land supply data uses a base date of 31 March 2018 and only uses known data i.e. actual completions, permission and allocation in the Regulation 19 Pre-Submission Local Plan (2018).
3. Paragraph 73 of the National Planning Policy Framework 2018 (NPPF 2018) requires local authorities to identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements with an additional buffer of 5% (moved forward from later in the plan period) to ensure choice and competition in the market for land. Where there has been a record of persistent under delivery of housing, local planning authorities should increase the buffer to 20% (moved forward from later in the plan period) where there has been significant under delivery of housing of the previous 3 years, to provide a realistic prospect of achieving the planned supply.
4. Paragraph 74 of the NPPF 2018 sets out the circumstances a 5-year land supply can be demonstrated, with the appropriate buffer, these are either through a recently adopted plan, or in a subsequent annual position statement.

Housing Need

5. The Council's adopted Local Plan 2005 pre-dates the National Planning Policy Framework (NPPF) and a new Local Plan reflecting the NPPF 2012 is being prepared. This Framework applies to Plans being submitted prior to 24 January 2019 and it is the Council's intention to submit the Local Plan in January before this date.
6. Paragraph 214 Annex 1: Implementation of the NPPF 2018 states that policies in this Framework are material considerations which should be taken into account in dealing with applications from the day of publication. This includes the use of the standard methodology for calculating housing supply as set out in Planning Practice Guidance on Housing and economic development needs assessments. The new methodology is based on the government's official household formation projections, adjusted to reflect local housing affordability and then subject to a 40% cap on any increase above projected household growth or current local plan annual requirements. Appendix 1 to this report sets out the calculation of minimum annual local housing need for Uttlesford using the standard methodology.
7. The standard methodology identifies a housing need of 632.8 dwellings per annum. This is slightly lower than the Interim SHMA 2016 of 641 dwellings per annum and higher than the SHMA 2017 of 606 dwellings per annum.
8. NPPF 2018 Paragraph 73(a) states that an additional buffer of 5% is required and paragraph (c) states that a buffer of 20% is required where there has been significant under delivery of housing over the previous three years. Table 1 below shows that over the last 3 years there has been an oversupply of dwellings whether based on the housing need calculated by the standard methodology or the SHMA. The Council therefore considers it is appropriate to apply a 5% buffer.

Table 1: Delivery over last 3 years

Year	Delivery	Target based SHMA / standard methodology	Target based on standard methodology
2015/2016	554	568 ¹	632.8
2016/2017	722	641 ²	632.8
2017/2018	966	723 ³	632.8
TOTAL	2242	1932	1898.4
Over Supply		+310	+343.6

Housing Supply

9. Appendix 2 lists, all the sites which are considered to provide housing during the period up to 2033. There are 9 categories of site and Appendix 2 lists the sites with planning permission first followed by the draft allocations in the Regulation 19 Pre-submission Local Plan (June 2018) split into sites in the towns and villages followed by the Garden Communities.

¹ SHMA September 2015

² SHMA Interim update August 2016

³ Standard methodology

10. It also includes an allowance for windfall sites of 70 dwellings per year based on historic rates of completions on windfall sites and the policy context in which they are likely to continue to be provided at this rate. The evidence for this allowance is set out in the Housing Supply Windfall Allowance (UDC, 2017) paper available on the [website](#).
11. Appendix 2 includes 10 large sites which have not been identified through the SLAA nor are they identified in the Pre-submission Local Plan 2018 and are therefore technically windfall sites. They are identified by the word “windfall” in the SLAA Reference column. In total these sites will provide 66 dwellings net. Nine of these sites were permitted in the year 2017/18. Two of these sites are for 10 or more dwellings and would be identified in the Local Plan.
12. There is currently outstanding planning permission for 275 dwellings on windfall sites (sites for 5 or less dwellings which are not garden land). The Housing Supply Windfall Allowance paper demonstrates that 63% of windfall sites are built and the majority of completions take place in the second and third year following consent. It can therefore be estimated that of the 275 dwellings 173 dwellings will be completed over the next 3 years. In addition there will be new windfall sites permitted which will be delivered during that time. The trajectory includes an allowance of 210 dwellings over the next 3 years. It is therefore considered that the windfall allowance covers these small sites and the Council is justified in identify the 10 large sites in the trajectory.
13. The 9 categories are
1. under construction
 2. with planning permission (full or reserved matters covering whole site)
 3. with outline permission with part(s) covered by reserved matters
 4. with outline only
 5. where full, outline or reserved matters at post committee resolution subject to S106 negotiations
 6. with application submitted
 7. with pre-application discussions occurring
 8. allocation only
 9. draft allocation
14. Tables 2 to 4 below sets out the actual and estimated completions for each year during the plan period. The tables show estimated completions with and without the draft allocations.

Table 2 Actual completion rate since 2011								
Year	11/12	12/13	13/14	14/15	15/16	16/17	17/18	total
completions	521	540	390	463	554	722	966	4156

Table 3 Estimated completion rate for 5-year period

Year	18/19	19/20	20/21	21/22	22/23	Total
	Year 1	Year 2	Year 3	Year 4	Year 5	
estimated completions years 1-5 (sites with planning permission + windfall allowance)	737	461	529	453	316	2496
estimated completions years 1-5 (sites with planning permission + windfall allowance + draft allocations)	737	461	686	701	625	3210

Table 4 Estimated completion rate for years 6 to 18

Year	23/24	24/25	25/26	26/27	27/28	28/29	29/30	30/31	31/32	32/33
	6	7	8	9	10	11	12	13	14	15
Estimated completions (sites with planning permission + windfall allowance)	289	230	230	230	230	180	159	130	130	110
estimated completions (sites with planning permission + windfall allowance + draft allocations)	493	475	620	710	730	780	859	860	880	980

Calculation of 5 year housing land supply

15. Table 5 shows the calculation of the 5 year housing land supply. It is based on the target of 632.8 dwellings per annum calculated by the standard methodology as set out in Appendix 1. It applies a 5% buffer, as justified in paragraph 7 above, of 171.88 dwellings. It includes making up the shortfall since 2011 of 905.70 dwellings within the first 5 years (the Sedgefield Methodology).
16. The Council's overall target over the next 5 year period is 4747 dwellings.
17. The Council estimates that from sites with planning permission and windfall sites 2496 dwellings will be delivered over the next 5 years which provides the District with 3.46 years of supply.
18. If the draft allocations are included in the supply the Council estimates that 3210 dwellings will be delivered over the next 5 years which provides the District with 4.45 years of supply.

Table 5 Calculation of 5 year housing supply		Supply from sites with planning permission+ windfall allowance only	Supply from sites with Planning permission, windfall allowance and sites with draft allocation
Annual Target	AT	632.8	632.8
Target years 1 – 5	AT x 5	3164	3164
Shortfall	(ATx7) – completions since 11/12	273.6	273.6
Target plus shortfall		3437.6	3437.6
5% of target plus shortfall		171.88	171.88
Overall target	T+	3609.48	3609.48
Supply	S	2496	3210
% of target available on deliverable sites	(S/T+)x100	69.15	88.93
Supply in years	S/(T+ /5)	3.46	4.45
Deficit/Surplus	S-(T+)	-1113.48	-399.48

19. Appendix 3 of the Regulation 19 Pre-Submission Local Plan showed a 5 year land supply of 5.98 years as at April 2017. It was calculated using the 'Liverpool methodology' which spread any backlog from previous years throughout the plan period. The reason for this was that the development strategy plans to deliver a significant amount of housing in the new Garden Communities. These have a longer lead-in time which means that they do not deliver early in the plan period, but once they start delivering, they will provide significant levels of housing throughout the rest of the plan period, and beyond.
20. Furthermore the trajectory is 'stepped' to reflect the higher delivery in the later years once the garden communities start to see housing completions. The annual requirement is stepped from 568 dwellings a year from 2011/12 to 2021/22 up to 704 dwellings a year from 2022/23 to the end of the plan period.
21. Table 6 below calculates the 5 year land supply as at April 2018 using the methodology used in the Local Plan and demonstrates a 5 year supply of houses.

Table 6 Calculation of 5 year housing supply		Supply from sites with Planning permission, windfall allowance and sites with draft allocation
Target – years 2018/19 – 2022/23	$(4 \times 568) + (1 \times 704)$	2976
Shortfall years 2011/12 – 2016/12	$(568 \times 7) - (521+540+390+463+554+722+966)$	+180 surplus
As there is no shortfall the target remains at -		2976
Adding in 5% of target – Final Target	2976×1.05	3125
Supply – years 2018/19 – 2022/23	$737+461+686+701+625$	3210
% of target available of deliverable sites	$100 \times (3210 / 3125)$	103
Supply in years	$5 \times (3210 / 3125)$	5.1

**Appendix 1:
Calculation of minimum local housing need using the standard method.**

The methodology is set in the Planning Practice Guidance on [Housing and economic development needs assessments](#).

Step 1 – Setting the baseline

Set the baseline using national [household growth projections](#), for the area of the local authority. Taking the most recent projections, calculate the projected average annual household growth over a 10 year period (this should be 10 consecutive years, with the current year being the first year).

Number of households 2018	34,920
Number of households 2028	39,440
Household growth 2018-2028	4,520
Average annual household growth	452 per year
Source: 2016-based Live Tables on household projections: Table 406: Household projections by District, England, 2001 - 2041	

Step 2 – An adjustment to take account of affordability

Then adjust the average annual projected household growth figure (as calculated in step 1) based on the affordability of the area.

The most recent [median workplace-based affordability ratios](#), published by the Office for National Statistics at a local authority level, should be used.

For each 1% increase in the ratio of house prices to earnings, where the ratio is above 4, the average household growth should be increased by a quarter of a percent. No adjustment is applied where the ratio is 4 or below. Where an adjustment is to be made, the precise formula is as follows:

$$\text{Adjustment factor} = \left(\frac{\text{Local affordability ratio} - 4}{4} \right) \times 0.25$$

Uttlesford's most recent median workplace based affordability ratio		13.37
Adjustment factor	$((13.37 - 4)/4) \times 0.25 =$	0.585625
Minimum annual local housing need figure	$(1 + 0.585625) \times 452 =$	716.70

Step 3 – Capping the level of any increase

A cap may then be applied which limits the increase in the minimum annual housing need figure an individual local authority can face. How this is calculated depends on the current status of relevant strategic policies for housing.

Where these policies were adopted within the last five years (at the point of making the calculation), the local housing need figure is capped at 40% above the average annual housing requirement figure set out in the existing policies.

This also applies where the relevant strategic policies have been reviewed by the authority within the five year period and found to not require updating.

Where the relevant strategic policies for housing were adopted more than five years ago (at the point of making the calculation), the local housing need figure is capped at 40% above whichever is the higher of:

- a. the projected household growth for the area over the 10 year period identified in step 1; or
- b. the average annual housing requirement figure set out in the most recently adopted strategic policies (if a figure exists).

Average annual housing requirement in the existing relevant policies		374
Average annual household growth over ten years	as per step 1	452
The minimum annual local housing need figure	as per step 2	716.70
The cap is set at 40% above the higher of the most recent average annual housing requirement figure or household growth	$452 + (40\% \times 452) = 452 + 180.8$	632.8
Average annual household requirement		632.8
This equates to a housing requirement over 22 years		13,921.6
